CONTENTS

3199 Rat intestinal brush border membrane peptidases. I. Solubilization, purification, and physicochemical properties of two different forms of the enzyme.
Young S. Kim and Emmet J. Brophy

3206 Rat intestinal brush border membrane peptidases. II. Enzymatic properties, immunochemistry, and interactions with lectins of two different forms of the enzyme.
Young S. Kim, Emmet J. Brophy, and J. Alex Nicholson

3213 Preparation and properties of partially purified pulmonary cytochrome P-450 from rabbits.
Emel Arinc and Richard M. Philpot

3221 Transport of riboflavin into yeast cells.
Meir Perl, Edna B. Kearney, and Thomas P. Singer

3229 Demonstration of pyrogallolpeptidase and amidase activities toward thyrotropin-releasing hormone in hamster hypothalamus extracts.
Chandran Prasad and Alan Peterkofsky

3235 Substitution of lanthanide ions for calcium ions in the activation of bovine prothrombin by activated factor X. High affinity metal-binding sites of prothrombin and the derivatives of prothrombin activation.
Barbara C. Parke, Kenneth G. Mann, and Bruce Parke

3242 Phospholipidserine synthetase mutants of Escherichia coli. Genetic mapping and membrane phospholipid composition.
Christian R. H. Roet

3250 Partial amino acid sequences around the essential carboxylate in the active sites of the intestinal sucraseisomaltase complex.
Andrea Quaroni and Giorgio Semenza

3254 Tryptophanyl transfer ribonucleic acid synthetase of Escherichia coli. Character of required thiol group and structure of thiol peptides.
Gary V. Kuehl, Ming-liang Lee, and Karl H. Muench

3261 Human tryptophanyl transfer ribonucleic acid synthetase. Composition, function of thiol groups, and structure of thiol peptides.
Myynti S. Lipscomb, Ming-liang Lee, and Karl H. Muench

3269 Soluble enzyme system for vitamin K-dependent carboxylation.
Donald O. Mack, Eric T. Suen, Jean Marie Girardot, Julie A. Miller, Robert Delaney, and B. Craig Johnson

3277 Restoration of a regulatory response to low density lipoprotein in acid lipase-deficient human fibroblasts.
Michael S. Brown, Mary K. Sobbani, Gloria Y. Bunschode, and Joseph L. Goldstein

3297 Stabilization of an RNA molecule by 3′-(terminal poly(A))-induced inhibition of RNase activity.
Philip A. Hieter, Stephen M. LeGendre, and Carl C. Levy

3294 Glutamate synthase. Properties of the glutamine-dependent activity.
Pekka Mantzala and Howard Zalkin

3300 Properties of apoglutamate synthase and comparison with glutamate dehydrogenase.
Pekka Mantzala and Howard Zalkin

3306 Mechanism of the irreversible inhibition of aspartate aminotransferase by the bacterial toxin L-2-amino-4-methoxy-trans-3-hutenoic acid.
Robert R. Rando, Noel Reyeva, and Lorna Cheng

3313 Cell cycle-specific activity of type I and type II cyclic adenosine 3′:5′-monophosphate-dependent protein kinases in Chinese hamster ovary cells.
Max Costa, Eugene W. Gerner, and Diane H. Russell

3320 Conversion of a 2C-deoxy-C₃, steroid, 5-pregn-3β-ol, into testosterone by rat testicular microsomes.
Richard B. Hoehnberg, Shoshana Ladony, and Seymour Lieberman

3326 Properties of follitropin-receptor interaction. Characterization of the interaction of follitropin with receptors in purified membranes isolated from mature rat testes tubules.
Haeleen Abou-Isaa and Leo E. Reichert, Jr.

3338 Interaction of bacterial initiation factor 2 with initiator tRNA.
K. Maya Sundari, Evan A. Stronger, LaDonne H. Schuman, and Umadas Maitra

3346 Chondroitin sulfate glycosyltransferases in cultured chondrocytes. Turnover, oscillatory change during growth, and suppression by 5-bromodeoxyuridine.
Nancy B. Schwartz

3352 Identification of separate acyl-CoA:glycine and acyl-CoA:glutamine N-acyltransferase activities in mitochondrial fractions from liver of rheas monkey and man.
Leslie T. Webster, Jr., Usman A. Siddiqui, Samuel V. Lucas, John M. Strong, and John J. Miyake

3359 Mutations affecting the quaternary structure of the lac repressor.
Albert Schmitz, Ursula Schmeisser, Jeffrey H. Miller, and Ponzy Lu

3369 The activating system of chitin synthetase from Saccharomyces cerevisiae. Purification and properties of the activating factor.
Rodney E. Ulane and Enrico Cabib

3375 Dissociation and reassociation of the phosphorylated and nonphosphorylated forms of adenosine 3′:5′-monophosphate-dependent protein kinase from bovine cardiac muscle.
Rafael Range-Aldao and Oda Mondelsohn Rosen

3381 Prostaglandin biosynthesis and catabolism in the developing fetal sheep brain.
Cecil Robert Pace-Asciak and G. Rangaraj

3386 Limited proteolytic digestion of lac repressor by trypsin.
Chemical nature of the resulting trypsin-resistant core.
James G. Files and Klaus Weber

3392 Peptidyl transfer RNA dissociates during protein synthesis from ribosomes of Escherichia coli.
John R. Menninger

3399 Neuroblastoma adenylate cyclase. Role of 2-chloroadenosine, prostaglandin E₂, and guanine nucleotides in regulation of activity.
Arthur J. Blume and Carolyn J. Foster

3405 Transport and utilization of methyltetrahydrofolates by Lactobacillus casei.
Barry Shane and E. L. R. Stokstad

3411 Origins of circular dichroism bands in Bowman-Birk soybean trypsin inhibitor.
Ernest Kay

3417 Comparison of initial velocity and binding data for allostERIC adenosine monophosphate nucleosidase.
Vern L. Schramm

3425 Importance of full size complementary DNA in nucleic acid hybridization.
Gary B. Weiss, Goldner N. Wilson, Alan W. Stoggeles, and W. French Anderson

3432 Modification of Escherichia coli DNA ligase by cleavage with trypsin.
Sharon M. Pansengko, Paul Modrich, and I. R. Lehman

Sharon M. Panasenko, Paul Modrich, and I. R. Lehman

3436 Full Instructions to Authors will be found in The Journal, 251, 1 (1976), and reprints may be obtained on request from the editorial office.
effects of the divalent cation ionophore A23187 on potassium permeability of rat erythrocytes.

John J. Mieyal and Jeffrey L. Blumer

3450 Side chain hydroxylations in biosynthesis of cholic acid. 25- and 26-hydroxylation of 5β-cholestan-3α,7α,12α-triol by reconstituted systems from rat liver microsomes.

Ingemar Björkhem, Henry Danielsson, and Kjell Wikvall

3457 Glycophospho-enriched vesicles from sheep erythrocyte ghosts obtained by spontaneous vesiculation.

Hans U. Lutz, Roger Barber, and Robert F. McGuire

ADDITIONS AND CORRECTIONS

Takami Oka and John W. Perry

Theoharis C. Theoharides and Zoe N. Canellakis

THE JOURNAL OF BIOLOGICAL CHEMISTRY

GENERAL INFORMATION

MANUSCRIPT SUBMISSION AND PAGE CHARGES

American Society of Biological Chemists, Inc., 9650 Rockville Pike, Bethesda, Maryland 20014

Queries on matters of general editorial policy, requests for reprints of the "Instructions to Authors," or of the "Editorial Policy and Practices," or for permission to reproduce any part of a previously published article should be directed to the Journal Editorial Office in Bethesda. (Telephone 301-530-7150).

Address all correspondence relative to subscriptions, subscription fulfillment, and orders for back copies to: THE JOURNAL OF BIOLOGICAL CHEMISTRY, 428 East Preston Street, Baltimore, Maryland 21202, U.S.A. Requests for termination of paid and duly entered subscriptions will be honored with proportional refunds less a $10 cancellation charge.

Published semimonthly by the American Society of Biological Chemists, Inc. Annual volume: $200. United States; $210, other countries. Single copy $8.50. Special subscription rates are available to members, graduate students, and postdoctoral fellows for personal use only. Qualifying forms are available from the Bethesda Office. Second class postage paid at Baltimore, Maryland 21202, U.S.A., and at additional mailing offices.
