Vol. 252, No. 18

The Journal of Biological Chemistry

September 25, 1977

CONTENTS

COMMUNICATIONS

6247 Isolation and characterization of a novel trisialoganglioside, Glb4, from human brain.
Susumu Ando and Robert K. Yu

6251 Escherichia coli protein X is the RecA gene product.
W. John Little and Dennis G. Kleid

6253 Circular dichroism studies of fd coat protein in membrane vesicles.
Robert W. Williams and A. Keith Dunker

6256 Calcium stimulation of plasminogen activator secretion/production by Swiss 3T3 cells.
Ish-Nan Chou, Richard O. Robin, and Paul H. Black

6260 Isolation of a warfarin binding protein from liver endoplasmic reticulum of Sprague-Dawley and warfarin resistant rats.
Marylee T. Scarvey, C. Bruce Graves, and Robert E. Olsen

6268 Cobalt-substituted horseradish peroxidase.
Ming-Yu R. Wang, Paul F. Hollenberg, and Brian M. Hoffman

6276 Isolation, crystallization, and primary amino acid sequence of human platelet factor 4.
Mark Hermodson, Gottfried Schmer, and Kotoku Kurachi

6280 Micrococcus luteus correndonucleases. I. Resolution and purification of two endonucleases specific for DNA containing pyrimidine dimers.
Sheikh Riazuddin and Lawrence Grossman

6287 Micrococcus luteus correndonucleases. II. Mechanism of action of two endonucleases specific for DNA containing pyrimidine dimers.
Sheikh Riazuddin and Lawrence Grossman

6294 Micrococcus luteus correndonucleases. III. Evidence for involvement in repair of 5 endonucleases specific for DNA containing pyrimidine dimers.
Sheikh Riazuddin, Lawrence Grossman, and Inga Mahrer

6299 Identification of UDP-glucose as an intermediate in the biosynthesis of the membrane-derived oligosaccharides of Escherichia coli.
Howard Schulman and Eugene P. Kennedy

6304 Energy-dependent calcium uptake activity in cultured mouse fibroblast micosomes. Regulation of the uptake system by cell density.
Leon Moore and Ira Pastan

6310 Pseudouridine-deficient transfer RNAs from Escherichia coli B and their use as substrates for pseudouridine synthetase.
Linda K. Kwong, Virginia G. Moore, and Ivan I. Kaiser

6316 Regulation of chondroitin sulfate synthesis. Effect of fi-xoyloides on synthesis of chondroitin sulfate proteoglycan, chondroitin sulfate chains, and core protein.
Nancy B. Schwartz

6322 Isolation and characterization of a protein from rat testis which inhibits cyclic AMP-dependent protein kinase and phosphodiesterase.
Elgin G. Beale, John K. Dedman, and Anthony R. Means

6329 Stereospecificity of microsomal and purified epoxide hydrazine from rat liver. Hydration of arene oxides of polycyclic hydrocarbons.

6335 Comparative studies on cyclic AMP binding and protein kinase in cyclic AMP-responsive and -unresponsive Walker 256 mammary carcinoma.
Yoon Sang Cho-Chung, Timothy Clair, Pon Nyong Yi, and Clifford Parkinson

6342 Cyclic AMP-binding proteins and protein kinase during regression of Walker 256 mammary carcinoma.
Yoon Sang Cho-Chung, Timothy Clair, and Rochelle Potter

6349 Loss of nuclear cyclic AMP binding in cyclic AMP-unresponsive Walker 256 mammary carcinoma.
Yoon Sang Cho-Chung, Timothy Clair, and Pamela Huffman

6356 Determination of the amino acid sequence of troponin C from rabbit skeletal muscle.
John H. Collins, Marion L. Greaser, James D. Potter, and Marcus J. Horn

6363 Properties of dihydroxyacetone phosphate acyltransferase in the Harderian gland.
Charles O. Rock, Veronica Fitzgerald, and Fred Snyder

6367 Purification of thioredoxin, thioredoxin reductase, and glutathione reductase by affinity chromatography.
Vincent P. Pigiset and Robert R. Cowley

6373 Heterogeneity of cytochrome P-450s induced by polychlorinated biphenyls.
Alvito F. Alcares and Atallah Kappas

6379 Purification from hamster cells of the multifunctional protein that initiates de novo synthesis of pyrimidine nucleotides.
Patrick F. Coleman, D. Parker Suttle, and George R. Stark

6386 Precursor of egg white lysozyme. Amino acid sequence of an NH2-terminal extension.

6394 Activation by phosphate of yeast phosphofructokinase.
Marcelino Banuelos, Carlos Gancedo, and Juana M. Gancedo

6399 Catabolite inactivation of the galactose uptake system in yeast.
Heidrun Matern and Helmut Holzer

6403 Role of antronon bases in aminooxyacetic acid of Escherichia coli methionine transfer RNAs.
Linda Stern and LaDonne H. Schulman

6409 Purification and subunit structure of adenosine deaminase from human kidney.
William P. Schrader and Andrew R. Stacy

6416 Purification and mode of action of exoribonuclease from bovine brain.
Arabinda Guha

6421 Purification and properties of superoxide dismutase from a red alga, Porphyridium cruentum.
Hara P. Misra and Irwin Fridovich

6424 Metabolism of benzo(a)pyrene with isolated hepatocytes.
Walter E. Smolik, Jorgen H. Lasson, and Sten Orrenius

6426 Human blood coagulation Factor XI. Purification, properties, and mechanism of activation by activated Factor XII.
Bonno N. Bouma and John H. Griffin

6438 A simple generalized equation for the analysis of multiple interactions of Michaelis-Menten kinetic systems.
Ting-Chao Chou and Paul Talalay

6443 Guanosine 3'-5'-monophosphate-dependent protein kinase

Full Instructions to Authors will be found in The Journal, 252, 1 (1977), and reprints may be obtained on request from the editorial office.

6450 Binding of 3H-catecholamines to alpha-noradrenergic receptor sites in calf brain. David C. U'Prichard and Solomon H. Snyder

6464 Human ornithine transcarbamylase. Purification and characterization of the enzyme from normal liver and the liver of a Beige's syndrome patient. Duane L. Pierson, Sherry L. Cox, and Brian E. Gilbert

6470 The link protein in proteoglycan aggregates from the swim rat chondrosarcoma. Theodore R. Oegema, Jr., Martin Brown, and Dominic Dziejewitkowski

6478 DNA polymerase III holoenzyme of Escherichia coli. Purification and resolution into subunits. Charles McHenry and Arthur Kornberg

6485 Further characterization of bacteriophage T3-induced ribonucleic acid polymerase. Studies on the size of in vivo transcripts and interaction of T3 RNA polymerase with T3 DNA. Prasanta R. Chakraborty, Rino A. Salvo, Hemanta K. Majumder, and Umadas Maitra

6494 Identification, characterization, and quantitative measurement of cyclic AMP receptor proteins in cytosol of various tissues using a photoaffinity ligand. Ulrich Walter, Tsuo Uno, Alice Y.-C. Liu, and Paul Greengard

6501 Acanthamoeba myosin II. Hiroshi Maruta and Edward D. Korn

6510 Radioiodination of proteins in single polyacrylamide gel slices. Tryptic peptide analysis of all the major members of complex multicompontent systems using microgram quantities of total protein. John H. Elder, Richard A. Pickett, II, Jacqueline Hampton, and Richard A. Lerner

6516 Localization of the sites along nucleosome DNA which interact with NH2-terminal histone regions. James P. Whitlock, Jr. and Robert T. Simpson

6528 DNA polymerase-a. Purification and structural characterization of the near homogeneous enzyme from human KB cells. Paul A. Fisher and David Korn

6536 Isolation and characterization of an avian hepatic binding protein specific for N-acetylglucosamine-terminated glycoproteins. Toshihuke Kawasaki and Gilbert Ashwell

6544 Nuclease B. A possible precursor of nuclease A, an extracellular nuclease of Staphylococcus aureus. Austine Davis, India B. Moore, Diana S. Parker, and Hiroshi Taniuchi

6554 Partial purification of the d-glucose transport system in rat adipocyte plasma membranes. Michael F. Shanahan and Michael P. Czech

6562 Organization of the yeast ribosomal RNA gene cluster via cloning and restriction analysis. Kamalendu Nath and Arthur P. Bollon

THE JOURNAL OF BIOLOGICAL CHEMISTRY

GENERAL INFORMATION
MANUSCRIPT SUBMISSION AND PAGE CHARGES

Submit manuscripts of full papers in duplicate and Communications in triplicate to Editor, The Journal of Biological Chemistry 9650 Rockville Pike Bethesda, Maryland 20014, U.S.A.

Each manuscript submitted must be accompanied by a remittance of $25 in the form of a check (or institutional purchase order) to cover the manuscript handling charge levied by the JOURNAL. The editorial review of manuscripts will be initiated only upon receipt of this payment. A revised manuscript received later than six months after the last decision letter (three months in the case of Communications) will be treated as a new submission requiring payment of a new handling charge in addition to other charges.

Accepted manuscripts will be published with the implicit understanding that the authors will pay a charge of $25 per published page (miniprint supplements and repository items excluded). Under exceptional circumstances, when no source of grant or other support exists, the author(s) of accepted manuscripts may apply for a grant-in-aid to Chairman, Publications Committee, American Society of Biological Chemists, Inc., 9650 Rockville Pike, Bethesda, Maryland 20014.

Queries on matters of general editorial policy, requests for reprints of the "Instructions to Authors," or of the "Editorial Policy and Practices," or for permission to reproduce any part of a previously published article should be directed to the Journal Editorial Office in Bethesda. (Telephone 301-530-1750).

Address all correspondence relative to subscriptions, subscription fulfillment, and orders for back copies to: The Journal of Biological Chemistry, 429 East Preston Street, Baltimore, Maryland 21202, U.S.A. Requests for termination of paid and duly entered subscriptions will be honored with proportional refunds less a $10 cancellation charge.

Published semimonthly by the American Society of Biological Chemists, Inc. Annual volume: $200, United States; $210, other countries. Single copy $8.50. Special subscription rates are available to members, graduate students, and postdoctoral fellows for personal use only. Qualifying forms are available from the Bethesda Office. Second class postage paid at Baltimore, Maryland 21202, U.S.A., and at additional mailing offices.
