COMMUNICATIONS

12261 Absence of a cleavable signal sequence in Sindbis virus glycoprotein P65.  
Stefano Bonatti and Gunter Blobel

12265 Protease of adenovirus type 2. Subcellular localization.  
A. Rashid Bhatti and Joseph Weber

12269 Oxygen-dependent cleavage of DNA by the 1,10-phenanthroline-copper complex. Inhibition of Escherichia coli DNA polymerase I.  
David S. Sigman, Daniel R. Graham, Vito D'Aurora, and Andrew M. Stern

12273 Gelation of deoxyhemoglobin A in concentrated phosphate buffer. Exhibition of delay time prior to aggregation and crystallization of deoxyhemoglobin A.  
Kazushii Adachi and Toshio Asakura

12277 Aminoacyl-tRNA synthetase-catalyzed cleavage of the glycosidic bond of 5-halogenated uridines.  
Stephen W. Koontz and Paul R. Schimmel

12281 Regulation by temperature of the chain length of fatty acids in yeast.  
Harumi Okuyama, Masaki Saito, Vasudev C. Joshi, Stanley Gunsberg, and Saikh J. Wali

12285 Thymidylate synthetase and 2'-deoxyuridylate form a tight complex in the presence of pteroylglutamate.  
Arnold Lockshin and Peter V. Danenberg

12289 A calorimetric study of the interaction of ATP with rabbit muscle phosphofructokinase.  
Neil M. Wollman and Gordon G. Hammes

12291 Inhibition of protein synthesis also inhibits synthesis of lipid-linked oligosaccharides.  
John W. Schmitt and Alan D. Elbein

Binks W. Wattenberg, Carl E. Freter, and David F. Silber
t

12299 Oxygenated iron bleomycin. A short-lived intermediate in the reaction of ferrous bleomycin with O2.  
Richard M. Burger, Susan Band Horwitz, Jack Peisach, and Andrew M. Stern

12303 Interactions of cartilage proteoglycans with hyaluronate. The role of the hyaluronate acetylomide groups.  
James E. Christner, Martin L. Brown, and Dominic D. Dziewiatkowski

12306 Isolation of yeast tRNA$^{Glu}$ genes. DNA sequence of a cloned tRNA$^{Glu}$ gene.  
Alejandro Venegas, Margarita Quiroga, Josefina Zaldivar, William J. Rutter, and Pablo Valenzuela

12310 Synthesis of chromatophoric, spin label enzyme substrates useful for cryoenzymology.  
Timothy R. Koch, Lawrence C. Kuo, Elizabeth G. Douglas, Shams Jaffer, and Marvin W. Makinen

12314 Effect of polymethylpolysaccharides on the hydrolysis of palmitoyl coenzyme A by a thiosterase from Mycobacterium smegmatis.  
Kenichi Yabuuchi and Clinton E. Ballou

12318 Purification and characterization of a flavoprotein from bovine thyroid with iodotyrosine deiodinase activity.  
Isadore N. Rosenberg and Ajit Goswami

12326 Characterization of a flavoprotein iodotyrosine deiodinase from bovine thyroid. Flavin nucleotide binding and oxidation-reduction properties.  
Ajit Goswami and Isadore N. Rosenberg

12331 Hormonal regulation of glucokinase in primary cultures of adult rat hepatocytes.  
Joseph T. Spence and Henry C. Pitol

12335 Kinetics of the tissue factor-dependent activation of coagulation factors IX and X in a bovine plasma system.  
Jolyon Jesty and Sidonie A. Silverberg

12346 Characterization and biosynthesis of proteoglycans of corneal stroma from rhesus monkey.  
John R. Hassell, David A. Newsome, and Vincent C. Hascall

12355 Biosynthesis of proteoglycans by rat granulosa cells cultured in vitro.  
Masaki Yanagishita and Vincent C. Hascall

12365 Purification of a heparin-neutralizing protein from rabbit platelets and its homology with human platelet factor 4.  
Mark H. Ginsberg, Ronald Hoskins, Peter Sigrist, and Richard G. Painter

12372 Composition of complex V of the mitochondrial oxidase phosphorylation system.  
Yves M. Galante, Siu-Yin Wong, and Youssef Hatefi

12379 Studies of the electron-nuclear coupling between Fe(III) and 14N in cytochrome P-450 and in a series of low spin heme compounds.  
J. Feisach, W. B. Mims, and J. L. Davis

12390 The linkage between oxygenation and subunit association in human hemoglobin Kansas. Concentration dependence of the oxygen binding equilibria.  
Donald H. Atha, Michael L. Johnson, and Austen F. Rugs

12395 Isolation and characterization of metallothionein which is highly concentrated in newborn rat liver.  
King Lit Wong and Curtis D. Claassen

12404 In vitro effects of palmitoylcarnitine on cardiac plasma membrane Na,K-ATPase, and sarcoplasmic reticulum Ca++-ATPase and Ca++ transport.  
Robert J. Adams, Dan W. Cohen, Sharmila Gupta, J. David Johnson, Earl T. Wallick, Taiizer Wang, and Arnold Schwartz

12411 Effect of modification of the essential catalytic residues in o-chymotrypsin on the thermodynamics of substrate analog association.  

12419 Mutants of Escherichia coli that do not contain 1,4-diaminobutane (putrescine) or spermidine.  
Edmund W. Hafner, Celia White Tabor, and Herbert Tabor

12427 Radioimmunoassay of the regulatory subunit of type I cAMP-dependent protein kinase.  
Chiranjui L. Kapoor, Joseph A. Beavo, and Alton L. Steiner

12433 Bovine thymus poly(ADP-ribose) polymerase histone-dependent and Mg++-dependent reaction.  
Yasuhiro Tanaka, Tomotaka Hashida, Hiroko Yoshikara, and Koichiro Yoshikara

Charles S. Rubin

Full Instructions to Authors will be found in The Journal, 254, 1 (1979), and reprints may be obtained on request from the editorial office.
Effects of thios, sugars, and proteins on nitric oxide activation of guanylate cyclase.
J. Mark Braughler, Chandra K. Mittal, and Ferid Murad

Kinetic behavior of 25-hydroxyvitamin D-1-hydroxylase and -24-hydroxylase in rat kidney mitochondria.
Reinhold Vieth and Donald Fraser

Transcription, processing, and mapping of mitochondrial RNA from large and yeast cell. Paul H. Hallick, Joseph Locker, Richard M. Synenki, and Murray Rubinowitz

Purification and characterization of a proteinase from Dictyostelium discoideum.
Gary L. Gustafson and Laurie A. Thon

Is Na⁺-dependent exchange diffusion a true exchange?
Rose M. Johnstone

Ribonuclease inhibitor from human placenta: rapid purification and assay.
Peter Blackburn

Ribonuclease inhibitor from human placenta: interaction with derivatives of ribonuclease A.
Peter Blackburn and Dansi L. Jakubczak

Intracellular polypeptide hormone receptors. Characterization and induction of lactogen receptors in the Golgi apparatus of rat liver.
Barry I. Posner, Zeev Josefse, and John J. M. Berners

Characterization of the lipoidal derivatives of pregnenolone prepared by incubation of the steroid with adrenal mitochondria.
Synthia Melon-Nussbaum, Laura Ponticorvo, and Seymour Lieberman

Interconversion of carbamyl-L-aspartate and L-dihydroorotate by dihydroorotase from mouse Khril ascites carcinoma.
Richard I. Christopherson and Mary Ellen Jones

Antibodies specific for bovine abnormal (desγ-carboxy-)prothrombin.
Rita A. Blanchard, Barbara C. Furie, and Bruce Furie

Metal binding sites of γ-carboxyglutamic acid-rich fragment of bovine prothrombin.
Barbara C. Furie, Michael Blumenstein, and Bruce Furie

Biosynthesis of mammalian glycoproteins. Glycosylation pathways in the synthesis of the nonreducing terminal sequences.
Thomas A. Beyer, James I. Rearick, James C. Paulson, Jean-Paul Prieels, Zeev Josefse, and Robert L. Hill

Ca²⁺-dependent protein phosphorylation of purely cholinergic Torpedo synaptosomes.
Daniel M. Michaelson and Sofia Avissar

The influence of adrenocorticotropic on transport of a cholesteryl linolate-low density lipoprotein complex into adrenal tumor cells.
Peter F. Hall and Masahira Nakamura

Primary structure of yeast proteinase B inhibitor 2.
Ronald Jemmerson, Hanscorel Möller, Rudolf Tosch, Rainer Trolp, Irene Witt, and Helmut Holzer

Electrostatic effects on the kinetics of oxidation-reduction reactions of c-type cytochromes.
Claudette Klein

Isotope trapping studies of yeast hexokinase during steady state catalysis. A combined rapid quench and isotope trapping technique.
Keith D. Wilkinson and Irwin A. Rose

A slowly dissociating form of the cell surface cyclic adenosine 3':5'-monophosphate receptor of Dictyostelium discoideum.
Claudette Klein

Some properties of polyethylene glycol:phenylalanine ammonia-lyase adducts.
Kenneth J. Wieder, Nicholas C. Patzczuk, Theo van Es, and Frank F. Davis

The relationship between human serum and human pancreatic DNase I.
Jack D. Love and Roger R. Hewitt

Simultaneous estimation of rates of pyrimidine and purine nucleotide synthesis de novo in cultured human cells.
William H. Huisman, Kari O. Raivio, and Michael A. Becker

Very low density lipoprotein. Removal of apolipoproteins C-II and C-III-1 during lipolysis in vitro.
Shlomo Eisenberg, Josef J. Patsch, James T. Sparrow, Antonio M. Gotto, and Thomas Olivercrona

Human α-tetroprotein. Fluorescence studies on binding and proximity relationships for fatty acids and bilirubin.
Charles D. Berde, Masanori Nagai, and Harold F. Deutsch

dnaG (Primase)-dependent origins of DNA replication. Nucleotide sequences of the negative strand initiation sites of bacteriophages St-1, 06, and 03.
John Sims, Daniel Capon, and David Dressler

Transferin receptor in human placental brush border membranes. Studies on the binding of transferrin to placental membrane vesicles and the identification of a placental brush border glycoprotein with high affinity for transferrin.
H. Garrett Wada, Philip E. Hass, and Howard H. Sussman

Bacteriophage fd gene II-protein I. Purification, involvement in RF replication, and the expression of gene II.
Thomas F. Meyer and Klaus Geider

Bacteriophage fd gene II-protein II. Specific cleavage and relaxation of supercoiled RF from filamentous phages.
Thomas F. Meyer and Klaus Geider

Phenylglyoxal modification of cardiac myosin S-1. Evidence for essential arginine residues at the active site.
Eugene Morkin, Irwin L. Flinth, and Sarah K. Banerjee

The association of var1 with the 38 S mitochondrial ribosomal subunit in yeast.
Peter Terpstra, Eduard Zanders, and Ronald A. Butow

The role of var1 in the assembly of yeast mitochondrial ribosomes.
Peter Terpstra and Ronald A. Butow

Conservation of microtubule associated proteins. Isolation and characterization of α and the high molecular weight microtubule associated protein from chicken brain and from mouse fibroblasts and comparison to the corresponding mammalian brain proteins.
Don W. Cleveland, Bruce M. Spiegelman, and Marc W. Kirschner

Evidence for conformational differences between precursor and processed forms of thyroid-stimulating hormone β subunit.
Linda C. Giudice and Bruce D. Weintaub

A new system for studying molecular mechanisms of mutation by carcinogens.
Oponder S. Banot, Saleem A. Khan, and Robert W. Chambers

Mapping and cloning of Neurospora crassa mitochondrial transfer RNA genes.
Joyce E. Heckman, Samuel Yin, Birgit Alzner-De Weerd, and Uttam L. RajBhandary

Purification of P-glycoprotein from plasma membrane vesicles of Chinese hamster ovary cell mutants with reduced calbindin permeability.
John R. Riordan and Victor Ling

Topographic antigenic determinants on cytochrome c. Immunoabsorbed separation of the rabbit antibody populations directed against horse cytochrome c.
Ronald Jemmerson and E. Margoliash

Site-specific anti-cytochrome c antibodies. Inhibition of the reactions between cytochrome c and its respiratory chain electron exchange partners.
Neil Osheroff, Ronald Jemmerson, Samuel H. Speech, Shelagh Ferguson-Miller, and E. Margoliash

Transcription termination in the Escherichia coli ribosomal RNA operon rnc.
Richard A. Young
Extent and localization of conformational changes in troponin C caused by calcium binding. Spectral studies in the presence and absence of 6 M urea.
  Bela Nagy and John Gergely

ADDITIONS AND CORRECTIONS

  Steven R. Peikin, Cynthia L. Costenbader, and Jerry D. Gardner

Spectrin-actin interaction. Phosphorylated and dephosphorylated spectrin tetramer cross-link F-actin.
  Stephen L. Brenner and Edward D. Korn

THE JOURNAL OF BIOLOGICAL CHEMISTRY

GENERAL INFORMATION
MANUSCRIPT SUBMISSION AND PAGE CHARGES

Submit manuscripts of full papers in duplicate and Communications in triplicate to
  Editor, The Journal of Biological Chemistry
  9650 Rockville Pike
  Bethesda, Maryland 20014, U.S.A.

Accepted manuscripts will be published with the implicit understanding that the authors will pay a charge of $35 per published page (miniprint supplements excluded). Under exceptional circumstances, when no source of grant or other support exists, the author(s) may apply at the time of submission for a grant-in-aid to Chairman, Publications Committee, American Society of Biological Chemists, Inc., 9650 Rockville Pike, Bethesda, Maryland 20014.

Queries on matters of general editorial policy, requests for reprints of the “Instructions to Authors,” or of the “Editorial Policy and Practices,” or for permission to reproduce any part of a previously published article should be directed to the Journal Editorial Office in Bethesda. (Telephone 301–530–7150).

Address all correspondence relative to subscriptions, subscription fulfillment, and orders for back copies to: THE JOURNAL OF BIOLOGICAL CHEMISTRY, 426 East Preston Street, Baltimore, Maryland 21202, U.S.A. Requests for termination of subscriptions will be honored with proportional refunds less a $10 cancellation charge. Allow at least six weeks for address changes. Claims for replacement copies must be received within four months of the issue date.

Published semimonthly by the American Society of Biological Chemists, Inc. Annual volume: $200, United States; $220, other countries. Single copy $8.50. Subscriptions are entered on a calendar year basis only. Special subscription rates are available to members, graduate students, and postdoctoral fellows for personal use only. Qualifying forms are available from the Bethesda Office. Second class postage paid at Baltimore, Maryland 21202, U.S.A., and at additional mailing offices.
