COMMUNICATIONS

4359 Human esophageal carcinoma cells have fewer, but higher affinity epidermal growth factor receptors.  Susan P. Banka-Schlegel and Jesse Quintero

4363 Identification of a plasma gelatinase in preparations of fibronectin.  Staffan Johansson and Bård Smedsrød

4367 Components responsible for transport between successive Golgi cisternae are highly conserved in evolution.  Michel R. Pâquet, Suzanne R. Pföffer, John D. Burzah, Ben S. Glick, and James E. Rothman

4371 Binding of iron by factor IX. Possible role for β-hydroxyaspartic acid.  Scott A. Fowler, Dale Paulson, Barbara A. Owen, and Whyte G. Owen

4373 Two different forms of cytochrome c oxidase can be purified from the slime mold Dictyostelium discoideum.  Roberto Bisson and Giampietro Schiavo

4377 The murine transforming growth factor-β precursor.  Rík Derynck, Julie A. Jarrett, Elsson Y. Chen, and David V. Goeddel

4380 Metabolism and structure of triacylglycerols in rat epididymal fat pad adipocytes determined by 13C nuclear magnetic resonance.  Laurel O. Sillerud, Chung H. Han, Mark W. Bitesney, and Albert A. Francendese

4389 Pyruvyl-dependent histidine decarboxylase from Lactobacillus 30a. Covalent modifications of aspartic acid 191, lysine 155, and the pyruvoyl group.  Quang K. Huynh and Esmond E. Snell

4395 The complete amino acid sequence of monkey pepsinogen A.  Takashi Kageyama and Kenji Takahashi

4406 The complete amino acid sequence of monkey progastricins.  Takashi Kageyama and Kenji Takahashi

4420 Branched chain α-keto acid oxidative decarboxylation in skeletal muscle mitochondria. Effect of isolation procedure and mitochondrial ΔΨ.  Susan M. Hutson

4426 Do human neutrophils make hydroxyl radical? Determination of free radicals generated by human neutrophils activated with a soluble or particulate stimulus using electron paramagnetic resonance spectroscopy.  Bradley E. Britigan, Gerald M. Rosen, Y. Chai, and Myron S. Cohen

4432 Inhibition of ACTH action on cultured bovine adrenal cortical cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin through a redistribution of cholesterol.  Michael J. DiBartolomeis, Christopher Williams, and Colin R. Jefcoate

4438 1,2-diacylglycerol, protein kinase C, and pancreatic enzyme secretion.  Stephen J. Pandol and Mari S. Schoeffield

4445 The elongation factor G carries a catalytic site for GTP hydrolysis, which is revealed by using 2-propanol in the absence of ribosomes.  Emmanuele De Vendittis, Mariorosario Masullo, and Vincenzo Bocchini

4451 Mechanism and activation for allosteric adenosine 5'-monophosphate nucleosidase. Kinetic α-deuterium isotope effects for the enzyme-catalyzed hydrolysis of adenosine 5'-monophosphate and nicotinamide mononucleotide.  Mark T. Shog

4460 Glycosaminoglycan sulfotransferases in human and animal sera.  Hirofumi Inoue, Kaoru Otsu, Masahiko Yoneda, Koji Kinata, Sakaru Suzuki, and Yasuo Nakashiki

4470 Difference between N-acetylglucosamine 4-sulfate-6-O-sulfotransferases from human serum and squid cartilage in specificity toward the terminal and interior portion of chondroitin sulfate.  Hirofumi Inoue, Kaoru Otsu, Sakaru Suzuki, and Yasuo Nakashiki

4476 Polyphosphate glucokinase from Propionibacterium shermanii. Kinetics and demonstration that the mechanism involves both processive and nonprocessive type reactions.  Catherine A. Pepin and Harland G. Wood

4481 Polyphosphate kinase from Propionibacterium shermanii. Demonstration that the synthesis and utilization of polyphosphate is by a processive mechanism.  Nancy A. Robinson and Harland G. Wood

4486 Specific pools of phospholipids are used for lipoprotein secretion by cultured rat hepatocytes.  Jean E. Vance and Dennis E. Vance

4492 Neplanocin A. Actions on S-adenosylhomocysteine hydrolase and on hormone synthesis by GH/LC cells.  Gaita Wolfson, Jane Chisholm, Arren H. Tashjian, Jr., Sue Fish, and Robert H. Abeles

4499 Identification of tyrosine and lysine peptides labeled by 5'-fluorosulfonylbenzoyl adenosine in the active site of pyruvate kinase.  Dianne L. DeCamp and Roberta F. Colman

4504 Isolation and characterization of two isoformes of myosin heavy chain from canine atrium.  Issei Komuro, Hitetsugu Tsuchimochi, Seigo Ueda, Masahiko Kurabayashi, Yoshinori Seko, Fumimaro Takaku, and Yoshio Yazaki

* The CONTENTS arranged by Subject Categories will be found immediately following these CONTENTS.

Full Instructions to Authors will be found in (1986) J. Biol. Chem. 261, 1-11, and reprints may be obtained from the editorial office.
The mechanism of inactivation of dopamine β-hydroxylase by hydrazines.
Paul F. Fitzpatrick and Joseph J. Villafranca

UDP-glucose 4-epimerase from Saccharomyces fragilis. Presence of an essential arginine residue at the substrate-binding site of the enzyme.
Sucheta Mukherji and Amar Bhaduri

Identification of an essential sulfhydryl group in the ouabain binding site of (Na,K)-ATPase.
Terence L. Kiley, Lois K. Lane, and Earl T. Wallich

Na+/H+ exchange in Ehrlich ascites tumor cells. Regulation by extracellular ATP and 12-O-tetradecanoylphorbol 13-acetate.
Erik Wiener, George Dubyah, and Antonio Scarpa

Stereochemistry and function of oxaloacetate keto-enol tautomerase.
Josephine D. Johnson, Donald J. Creighton, and Mindy R. Lamberi

The formation of a novel free radical metabolite from CCL, in the perfused rat liver and in vivo.
Henry D. Connor, Ronald G. Thurman, Marlene D. Galizi, and Ronald P. Mason

Leucine-proton cotransport system in Chang liver cell.
Yasuhide Mitsumoto, Kumie Sato, Takao Ohyashihi, and Tetsuro Mohri

D-2 dopamine receptor-mediated inhibition of proopiomelanocortin synthesis in rat intermediate lobe. Abolition by pertussis toxin or activators of adenylate cyclase.
Thomas E. Cole, Robin Felder, John W. Keibabian, Ronald D. Sekura, Perry Resse, and Hans-Urs Aeffder

The role of the essential sulfhydryl group in assimilatory NADH:nitrate reductase of Chlorella.
Michael J. Barber and Larry P. Solomonson

Nonmuscle tropomyosin from ascites tumor cell microvilli.
Yuechueng Liu, Coralie A. Carothers Carraway, and Kermit L. Carraway

Sequence of a peptide susceptible to mixed-function oxidation. Probable cation binding site in glutamine synthetase.
Joshua M. Farber and Rodney L. Levine

Modulation of guanine nucleotide affinity does not affect the first order rate constant of activation of adenylate cyclase in native membranes.
Alicja M. Tokhowsky

Regulation of intracellular iron distribution in K562 human erythroleukemia cells.
Elena Mattia, Djuro Josic, Gilbert Ashwell, Richard Klausner, and des van Renswoude

Isolation and characterization of a 37,000-dalton protein associated with the erythrocyte membrane.
Travis Lin and Robert W. Allen

Gee Ching and Masayori Inouye

The exchange of Fe⁺ between pyrophosphate and transferrin. Probing the nature of an intermediate complex with stopped flow kinetics, rapid multimixing, and electron paramagnetic resonance spectroscopy.
Richard E. Cowart, Susan Swope, T. T. Loh, N. Dennis Chasteen, and George W. Bates

Activation of a novel KpnI transcript by downstream integration of a human T-lymphotropic virus type I provirus.
Takashi Ohimoto, Marvin S. Reitz, Jr., Michael F. Clarke, Linda L. Jagodziński, and Flossie Wong-Staal

The effect of mild diamide oxidation on the structure and function of human erythrocyte spectrin.
Pamela S. Becker, Carl M. Cohen, and Samuel E. Lux

Nucleotide sequence of the Saccharomyces cerevisiae ADE5 gene encoding C₇-tetrahydrololate synthase.
Chuck Staben and Jesse C. Rabinowitz

The charge polymorphism of rat apoprotein E.
Catherine A. Reardon, Donna M. Driscoll, Roger A. Davis, Roy A. Borchardt, and Godfrey S. Getz

Monoclonal antibody analysis of bovine epithelial keratins. Specific pairs as defined by coexpression.
David Cooper and Tung-Tien Sun

Modulation of actin-bundling activity of 55-kDa protein by multiple isoforms of tropomyosin.
Fumio Matsuura and Shigeko Yamashiro-Matsuura

Coordinate induction of multiple cytochrome c mRNAs in response to thyroid hormone.
Richard C. Scarpulla, Mary C. Kilr, and Kathleen M. Scarpulla

Mechanism of the dexamethasone effect on α-fetoprotein gene expression in Mca-RH8994 rat hepatoma cells.
Jeffry E. Cook and Jen-Fu Chiou

Histone H1 kinase in exponential and synchronous populations of chinese hamster fibroblasts.
Terry A. Woodford and Arthur B. Pardee

Pretranslational regulation of type I collagen, fibronectin, and a 50-kilodalton noncollagenous extracellular protein by dexamethasone in rat fibroblasts.
Rajendra Raghav, David Gossage, and Andrew H. Kang

A re-examination of the 5′ termini of mouse dihydrofolate reductase RNA.
Shelley Sazer and Robert T. Schimke

Insulin activation of insulin receptor tyrosine kinase in intact rat adipocytes. An in vitro system to measure histone kinase activity of insulin receptors activated in vivo.
Harald H. Klein, Gary R. Freidenberg, Michael Kladde, and Jerrold M. Olefsky

Randi Albin, Richard Weber, and Philip M. Silverman

Intestinal basement membrane of Ascaris suum. Molecular organization and properties of the collagen molecules.
Milton E. Noikhen, Billie J. Wisdom, Jr., Doug C. Dean, Chung-Ho Hung, and Billy G. Hudson

Tyrosine phosphorylation of insulin receptor β subunit activates the receptor tyrosine kinase in intact H-35 hepatoma cells.
Kin-Tak Yu and Michael P. Czech

Crystallization and preliminary characterization of CheY, a chemotaxis control protein from Escherichia coli.
Karl Voig, John Bemun, and Philip Matsumura

Properties of a nuclear protein marker of human myeloid cell differentiation.
Amy Goldberger, Lubomir S. Hnilica, Susan B. Casey, and Robert C. Briggs
Isolation and properties of the active γ subunit of phosphorylase kinase.
Scott M. Kee and Donald J. Graves

The Escherichia coli dnaB replication protein is a DNA helicase.
Jonathan H. LeBowitz and Roger McMacken

Phosphorylation of rhodopsin by protein kinase C in vitro.
Daniel J. Kelleher and Gary L. Johnson

The soluble form of rat liver α-mannosidase is immunologically related to the endoplasmic reticulum membrane α-mannosidase.
Joyce Bischoff and Rosalind Kornfeld

ADDITIONS AND CORRECTIONS

Jan-Fang Cheng, Laurie Raid, and Ross C. Hardison

Debashis Ghosh, John S. Punzi, and William L. Duax

GENERAL INFORMATION FOR 1986

Submit all manuscripts in triplicate to
Editor, The Journal of Biological Chemistry
9650 Rockville Pike
Bethesda, MD 20814, U.S.A.

Accepted manuscripts will be published with the implicit understanding that the author(s) will pay a charge per page (miniprint supplement excluded). Current page charges may be obtained by contacting the JBC Office. Under exceptional circumstances, when no source of grant or other support exists, the author(s) may apply, at the time of submission, for a grant-in-aid to Chairman, Publications Committee, American Society of Biological Chemists, Inc., 9650 Rockville Pike, Bethesda, MD 20814. All such applications must be countersigned by an appropriate institutional official stating that no funds are available for page charges.

Queries on matters of general editorial policy, requests for reprints of the "Instructions to Authors," or of the "Editorial Policy and Practices," or for permission to reproduce any part of a previously published article should be directed to the Journal Editorial Office in Bethesda, telephone 301-550-7150.

The Journal of Biological Chemistry publishes papers on a broad range of topics of interest to biochemists. The views expressed are those of the author(s) and not of The Journal of Biological Chemistry or the American Society of Biological Chemists.

The Journal of Biological Chemistry is copyrighted by the American Society of Biological Chemists, Inc. Reprographic copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law is allowed, provided that the $1.50 per-copy fee is paid through the Copyright Clearance Center, 21 Congress Street, Salem, MA 01970. Reproduction of any portion of an article for subsequent republication requires permission of the copyright owner. Requests should be made in writing to the American Society of Biological Chemists, Inc., Attn.: Editorial Office, 9650 Rockville Pike, Bethesda, MD 20814, and should include a statement of intended use as well as explicit specifications of the material to be reproduced.

Address all correspondence and orders relative to subscriptions and back issues to:
The Journal of Biological Chemistry
428 East Preston Street, Baltimore, MD 21202, U.S.A.

The Journal of Biological Chemistry (ISSN 0021-9258) is published three times per month by the American Society of Biological Chemists, Inc., 428 East Preston Street, Baltimore, MD 21202, U.S.A.

Volume 261: United States, $410; other countries, $485. Single copy: United States, $12.00; other countries, $15.00. Special subscription rates are available to members, graduate students, and postdoctoral fellows for personal use only. Qualifying forms are available from the ASBC Office, 9650 Rockville Pike, Bethesda, MD 20814. Second-class postage paid at Baltimore, MD 21202, U.S.A. and at additional mailing offices. Send address changes to The Journal of Biological Chemistry at 428 East Preston Street, Baltimore, MD 21202, U.S.A.
4715 Tyrosine phosphorylation of insulin receptor \( \beta \) subunit activates the receptor tyrosine kinase in intact H-35 hepatoma cells.
Kin-Tak Yu and Michael P. Czech

4749 Phosphorylation of rhodopsin by protein kinase C in vitro.
Daniel J. Kelleher and Gary L. Johnson

MEMBRANES AND BIOMEMBRANETS

4737 Two different forms of cytochrome c oxidase can be purified from the slime mold Dictyostelium discoideum.
Roberto Bisson and Giampietro Schiavo

4549 Leucine-proton cotransport system in Chang liver cell.
Yasuhide Mitsumoto, Kumie Sato, Takao Ohyashiki, and Tisuro Mohtani

4594 Isolation and characterization of a 37,000-dalton protein associated with the erythrocyte membrane.
Travis Lin and Robert W. Allen

NUCLEIC ACIDS, PROTEIN SYNTHESIS, AND MOLECULAR GENETICS

4737 The murine transforming growth factor-\( \beta \) precursor.
Rui Derynck, Julie A. Jarrett, Elsson Y. Chen, and David V. Goeddel

4445 The elongation factor G carries a catalytic site for GTP hydrolysis, which is revealed by using 2-propanol in the absence of ribosomes.
Emmanuelle De Vendittis, Mariorosario Masullo, and Vincenzo Bocchini

4555 D-2 dopamine receptor-mediated inhibition of proopiomelanocortin synthesis in rat intermediate pituitary. Abolition by pertussis toxin or activators of adenylate cyclase.
Thomas E. Cote, Robin Felder, John W. Kebabian, Ronald D. Sekura, Terry Reisine, and Hans-Urs Alfetler

Gee Ching and Masayori Inouye

4615 Activation of a novel KpnI transcript by downstream integration of a human T-lymphotropic virus type I provirus.
Takahiro Ohamoto, Marvin S. Reitz, Jr., Michael F. Clarke, Linda L. Jagodzinski, and Flossie Wong-Staal

4660 Coordinate induction of multiple cytochrome c mRNAs in response to thyroid hormone.
Richard C. Scarpulla, Mary C. Kilar, and Kathleen M. Scarpulla

4663 Mechanism of the dexamethasone effect on \( \alpha \)-fetoprotein gene expression in MCA-RH8994 rat hepatoma cells.
Jeffrey R. Cook and Jen-Fu Chiu

4677 Pretranslational regulation of type I collagen, fibronectin, and a 50-kilodalton noncollagenous extracellular protein by dexamethasone in rat fibroblasts.
Rajendra Raghow, David Gossage, and Andrew H. Kang

4685 A re-examination of the 5' termini of mouse dihydrofolate reductase RNA.
Shelley Sazer and Robert T. Schimke

Rudi Albin, Richard Weber, and Philip M. Silverman

4738 The Escherichia coli dnaB replication protein is a DNA helicase.
Jonathan H. LeBoeuf and Roger McMachen

4775 (Correction) Isolation and nucleotide sequence of the rabbit globin gene cluster \( \psi'^{-}1\psi^{-}\). Absence of a pair of \( \psi^{-}\)-globin genes evolving in concert. Vol. 261 (1986) 839-848.
Jan-Fang Cheng, Laurie Raid, and Ross C. Hardison

PROTEIN CHEMISTRY AND STRUCTURE

4363 Identification of a plasma gelatinase in preparations of fibronectin.
Staffan Johansson and Birgir Smrslard

4371 Binding of iron by factor IX. Possible role for \( \beta\)-hydroxyaspartic acid.
Scott A. Fowler, Dale Paulson, Barbara A. Owen, and Whyte G. Owen

4395 The complete amino acid sequence of monkey pep- sinogen A.
Takahashi Kageyama and Kenji Takahashi

4404 The complete amino acid sequence of monkey pro- gastrin.
Takahashi Kageyama and Kenji Takahashi

4470 Difference between N-acetylglactosamine 4-sulfate-6-O-sulfotransferases from human serum and squid cartilage in specificity toward the terminal and interior portion of chondroitin sulfate.
Hirofumi Inoue, Kaoru Ono, Sakazu Suzuki, and Yasuo Nakanishi

4499 Identification of tyrosine and lysine peptides labeled by 5'-p-fluorosulfonylbenzoyl adenosine in the active site of pyruvate kinase.
Dianne L. DeCamp and Roberta F. Colman

4504 Isolation and characterization of two isozymes of myosin heavy chain from canine atrium.
Isser Komurow, Hitetsugu Tsuchimocho, Seigo Ueda, Masaiko Kurabayashi, Yoshinori Seko, Fumimaro Tabaku, and Yoshio Yatsuki

4525 Identification of an essential sulfhydryl group in the ouabain binding site of \( \beta\)-\( \alpha\) subunits of Na,K-ATPase.
Terence L. Kirby, Lois K. Lane, and Earl T. Wallick

4568 Nonmucous tropomyosin from ascesic tumor cell microvilli.
Yuechang Liu, Coralie A. Carothers Carraway, and Kermit L. Carraway

4574 Sequence of a peptide susceptible to mixed-function oxidation. Probable cation binding site in glutamine synthetase.
Joshua M. Farber and Rodney L. Levine

4607 The exchange of Fe\(^{3+}\) between pyrophosphate and transferrin. Probing the nature of an intermediate complex with stopped flow kinetics, rapid multitransfering, and electron paramagnetic resonance spectroscopy.
Richard E. Cowart, Susan Swope, T. T. Loh, N. Dennis Chasteen, and George W. Bates

4620 The effect of mild diamide oxidation on the structure and function of human erythrocyte spectrin.
Pamela S. Becker, Carl M. Cohen, and Samuel E. Lux

4629 Nucleotide sequence of the Saccharomyces cerevisiae ADE3 gene encoding C1-tetrahydrofolate synthase.
Chuck Staben and Jesse C. Rabinowitz

4638 The charge polymorphism of rat apoprotein E.
Catherine A. Reardon, Donna M. Driscoll, Roger A. Davis, Roy A. Borchardt, and Godfrey S. Getz
