CONTENTS*

9429 Two nuclear factors compete for the skeletal muscle actin promoter.
   Kenneth Walsh and Paul Schimmel

9433 Radiation inactivation analysis of enzymes. Effect of free radical scavengers on apparent target sizes.
   Duane C. Eichler, Larry P. Solomonson, Michael J. Barber, Michael J. McCreery, and Gene C. Ness

9437 Calcium-calmodulin stimulates inositol 1,4,5-trisphosphate kinase activity from insulin-secreting RINm5F cells.
   Trevor J. Bidon, Michelle Comte, Jos A. Cox, and Claes B. Woldheim

9441 Molecular oxygen controls nitrate transport of Escherichia coli nitrate-respiring cells.
   Sumiharo Noji and Shigehiko Taniguchi

9444 The metabolism of inositol 1,3,4-trisphosphate to inositol 1,3-bisphosphate.
   Vinay S. Bansal, Roger C. Inhorn, and Philip W. Majerus

9448 Properties of the γ subunit of phosphorylase kinase.
   Scott M. Kee and Donald J. Graves

9454 Characterization of the calmodulin-binding sites of muscle phosphofructokinase and comparison with known calmodulin-binding domains.
   Barbel Buschmeier, Helmut E. Meyer, and Georg W. Mayr

9463 Wild type and mutant signal peptides of Escherichia coli outer membrane lipoeprotein interact with equal efficiency with mammalian signal recognition particles.
   Pablo D. Garcia, John Ghrayeb, Masayori Znouye, and Irwin Modak

9469 Degradation and regurgitation of extracellular proteins by cultured mouse peritoneal macrophages and baby hamster kidney fibroblasts. Kinetic evidence that the transfer of proteins to lysosomes is not irreversible.
   Susan Buktenica, Sarah J. Olenick, Raui Salgin, and Allen Frankfater

9477 A tyrosine kinase related to pp60c-s is associated with membranes of Electrophorus electricus electric organ.
   Carol G. Shores, Michael E. Cox, and Patricia F. Maness

9486 Glycogen phosphorylase in Dictyostelium. Developmental regulation of two forms and their physical and kinetic properties.
   Michel J. Cloutier and Charles L. Rutherford

9494 Interaction of terminal transferase with single-stranded DNA.
   David J. Robbins, Mary D. Barkley, and Mary Sue Coleman

9503 Initiation of the extrinsic pathway of coagulation. Association of factor VIIa with a cell line expressing tissue factor.
   Victoria A. Plogis, Thomas S. Edgington, and Daryl S. Fair

9509 Interaction between NAD-dependent isocitrate dehydrogenase, α-ketoglutarate dehydrogenase complex, and NADH ubiquinone oxidoreductase.
   Zoltan Porpazcy, Balazs Sumegi, and Istvan Alkonyi

9515 Ionomycin inhibits thyrotropin-releasing hormone-induced translocation of protein kinase C in GH3 pituitary cells.
   Claire W. Fearon and Armen H. Tashjian, Jr.

9521 Regulation of thyrotropin-releasing hormone receptor binding and phospholipase C activation by a single GTP-binding protein.
   Debra L. Aub, Marilyn E. Gossweiler, and Thomas E. Cote

9529 Gluconeogenesis from fructose predominates in periportal regions of the liver lobule.
   Irene Anundi, F. C. Kaufman, and Ronald G. Thurman

9535 Formation and utilization of acetoin, an unusual product of pyruvate metabolism by Ehrlich and AS30-D tumor mitochondria.
   Loria G. Baggetto and Albert L. Lehniger

9542 Influx of 5'-deoxy-5'-methylthioadenosine into HL-60 human leukemia cells and erythrocytes.
   Johanna D. Stoekeler and Shih-Ying Li

9547 Yeast cytochrome c peroxidase. Coordination and spin states of heme prosthetic group.
   Takashi Yonetani and Helen Anni

9555 Mechanism of inhibition of glycolysis by vanadate.
   Julio E. Benabe, Luis A. Escogoy, Belinda Pastrana, and Manuel Martinez-Maldonado

9561 Pyridine nucleotide metabolites stimulate calcium release from sea urchin egg microsomes desensitized to inositol trisphosphate.
   David L. Clapper, Timothy F. Walsh, Peter J. Dargie, and Hon Cheung Lee

9569 Phosphorylation of the 20,000-dalton light chain of smooth muscle myosin by the calcium-activated, phospholipid-dependent protein kinase. Phosphorylation sites and effects of phosphorylation.
   Mitsuo Ibeke, David J. Hartshorne, and Marshall Elzinga

9574 Primary structure of the human 4F2 antigen heavy chain predicts a transmembrane protein with a cytoplasmic NH2 terminus.
   Santuza Teixeira, Salvatore Di Grandi, and Lukas C. Kahn

9581 The effect of divalent cations on the amidolytic activity of bovine plasma activated protein C and des I-41-light chain activated protein C.
   Keiji A. W. Hill, L. Maria E. Koon, and Francis J. Castellino

9587 Sequence of the halobacterial glycosaminoglycan.
   Gerhard Paul and Felix Wieland

   Chin-Yi Jenny Hsu and Fred R. Frambel

9601 Ferrate oxidation of Escherichia coli DNA polymerase-I. Identification of a methionine residue that is essential for DNA binding.
   Amaresh Basu, Kenneth R. Williams, and Mukund J. Medak

* The CONTENTS arranged by Subject Categories will be found immediately following these CONTENTS.

Full Instructions to Authors will be found in (1987) J. Biol. Chem. 262, 1–11, and reprints may be obtained from the editorial office.
Ethanenitronate is a peroxide-dependent suicide substrate for catalase.
David J. T. Porter and Harold J. Bright

Enzymes that process somatostatin precursors. A novel endoprotease that cleaves before the arginine-lysine doublet is involved in somatostatin-28 conversion activity of rat brain cortex.
Pablo Glaucshankof, Sophie Gomez, Alain Morel, and Paul Cohen

The Na⁺/H⁺ exchanger is constitutively activated in P19 embryonal carcinoma cells, but not in a differentiated derivative. Responsiveness to growth factors and other stimuli.
Arjo J. Bierman, Leon G. J. Tertoomen, Siegfried W. de Laat, and Wouter H. Moolenaar

pH regulation of mitochondrial branched chain α-keto acid transport and oxidation in rat heart mitochondria.
Susan M. Hulsen

pH-dependent structural transition in rabbit skeletal troponin C.
Chih-Lueh Albert Wang, Qian Zhan, Terence Tao, and John Gergely

Plastid run-on transcription. Application to determine the transcriptional regulation of spinach plastid genes.
Xing-Wang Deng, David B. Stern, John C. Tonkyn, and Wilhelm Grussmus

Subcellular localization of the enzymes of cholesterol biosynthesis and metabolism in rat liver.
Michael P. Reinhart, Jeffrey T. Bilheimer, Jerry R. Faust, and James L. Gaylor

Characterization of the chicken histone H1 gene complement. Generation of a complete set of vertebrate H1 protein sequences.
Leeanne S. Coles, Allan J. Robins, Lisa K. Madley, and Julian R. E. Wells

Characterization of the six chicken histone H1 proteins and alignment with their respective genes.
M. Frances Shannon and Julian R. E. Wells

Selective covalent labeling of cysteines in bovine serum albumin and in hepatoma tissue culture cell glucocorticoid receptors by dexamethasone 21-mesy late.
S. Stoney Simons, Jr.

Identification of cysteine 656 as the amino acid of hepatoma tissue culture cell glucocorticoid receptors that is covalently labeled by dexamethasone 21-mesy late.
S. Stoney Simons, Jr., Janet G. Pumphrey, Stuart Rudikoff, and Howard J. Eisen

Probing ribosome function and the location of Escherichia coli ribosomal protein L5 with a monoclonal antibody.
Bishwajit Nag, Dinesh S. Tewari, Andreas Sommer, Helen McKuskie Olson, Dohn G. Glitz, and Robert R. Traut

Identification of the probable inhibitory reactive sites of the cysteine proteinase inhibitors human cystatin C and chicken cystatin.
Magnus Abrahamson, Anka Ritonja, Molly A. Brown, Anders Grubb, Werner Machleidt, and Alan J. Barrett

Identification of spectrin-related peptides associated with the reticulocyte hemoglobin-controlled oxygen subunit of erythrocyte translational initiation factor 2 kinase and of a 95,000 peptide that appears to be the catalytic subunit.
Wieslaw Rudlicki, Susan Fulilove, Robert Read, Gisela Kramer, and Boyd Hardisty

Purification and partial characterization of small proteoglycans I and II, bone sialoproteins I and II, and osteonectin from the mineral compartment of developing human bone.
Larry W. Fisher, Guy R. Hawkins, Noreen Turoos, and John D. Termine

Analysis of the tissue-specific expression, developmental regulation, and linkage relationships of a rodent gene encoding heart fatty acid binding protein.
Robert O. Hecheroth, Eduard H. Birkenmeier, Marc S. Levin, and Jeffrey I. Gordon

Isolation and characterization of antistasin. An inhibitor of metastasis and coagulation.
George P. Tuszynski, Tatiana B. Gasic, and Gabriel J. Gasic

The primary structure of a procaryotic glycoprotein. Cloning and sequencing of the cell surface glycoprotein gene of halobacteria.
John Lehrer and Manfred Sumper

Altered actin and troponin binding of amino-terminal variants of chicken striated muscle α-tropomyosin expressed in Escherichia coli.
Sarah E. Hitchcock-DeGregori and Rebecca W. Heald

Half-site reactivity of the tyrosyl radical of ribonucleotide reductase from Escherichia coli.
Britt-Marie Sjöberg, Margareta Karlsson, and Hans Jornwall

Rat liver UDP-glucuronosyltransferase. Identification of cDNAs encoding two enzymes which glucuronidate testosterone, dihydrotestosterone, and β-estradiol.
Peter I. Mackenzie

Inactivation of Factor Va by plasmin.
Mohamed Nagib Omar and Kenneth G. Mann

Distinct sets of acute phase plasma proteins are stimulated by separate human hepatocyte-stimulating factors and monokines in rat hepatoma cells.
Heinz Baumann, Victoria Onorato, Jack Gauldie, and Gerald F. Jahres

Characterization of an endogenous substrate of the insulin receptor in cultured cells.
Morris F. White, Edwin W. Stegmann, Thomas J. Dull, Axel Ulrich, and C. Ronald Kahn

Biocytin-conjugated antibodies to the human insulin receptor and their use in pituitary membranes.
Thomas O. Daniel, Dale F. Milray, Jaime Escobedo, and Lewis T. Williams

Rapid activation of calmodulin-dependent protein kinase III in mitogen-stimulated human fibroblasts. Correlation with intracellular Ca²⁺ transients.
H. Cloe Palfrey, Angus C. Nairn, Leslie L. Muldoon, and Michel L. Villereal

Mechanism of oxidation of α bonds by cytochrome P-450. Electronic requirements of the transition state in the turnover of phenylacetylenes.
Elizabeth A. Komives and Paul R. Ortiz de Montellano

Light-regulated methylation of chloroplast proteins.
Michael T. Black, Daniel Meyer, William R. Widger, and William A. Cramer

Isolation of a cDNA clone encoding a high molecular weight precursor to a 6-kDa pulmonary surfactant-associated protein.
Kenneth A. Jacobs, David S. Phelps, Randall Steinbrink, Judith Fisch, Ronald Kritz, Lisa Mitsook, Joseph P. Dougherty, H. William Taeusch, and Joanna Floros

Characterization of the mitochondrial carnitine palmitoyltransferase enzyme system. I. Use of inhibitors.
Peter E. Declercq, John R. Falck, Masamichi Kurosima, Herminia Tyminska, Daniel W. Foster, and J. Denis McGarry

Characterization of the mitochondrial carnitine palmitoyltransferase enzyme system. II. Use of detergents and antibodies.
Keith F. Wootje, Masamichi Kurosima, Daniel W. Foster, and J. Denis McGarry
Major and minor forms of the rat liver asialoglycoprotein receptor are independent galactose-binding proteins. Primary structure and glycosylation heterogeneity of minor receptor forms.

Dione F. Haberg, Ruth E. Wagner, David C. Farrell, John Hildreth IV, Michael S. Quenzenbery, Jeffrey A. Loeb, Eric C. Holland, and Kurt Drickamer

Modulation of the cellular ratio of chromosomal high mobility group proteins 14 to 17 in transfected cells.

Gurudas Giri, David Landsman, Nirmolini Soares, and Michael Bustin

Type X collagen synthesis during endochondral ossification in fracture repair.

William T. Grant, Guo-Jaw Wang, and Gary Balin

Role of the aggregation factor in the regulation of phosphoinositide metabolism in sponges. Possible consequences on calcium efflux and on mitogenesis.

Werner E. G. Müller, Michael Rottmann, Bärbel Diehl-Seifert, Branko Kurelec, Gerhard Uhlenbruck, and Heinz C. Schroder

Sites of in vivo phosphorylation of the T cell tyrosine protein kinase in LSTRA cells and their alteration by tumor-promoting phorbol esters.

John E. Casnellie

A protein phosphatase associated with rat heavy gastric membranes enriched with (H⁺-K⁺)-ATPase influences membrane K⁺ transport activity.

Whai Bin Im, David P. Blakeman, John E. Blesdale, and John P. Davis

Effect of phenylarsine oxide on insulin-dependent protein phosphorylation and glucose transport in 3T3-L1 adipocytes.

Susan C. Frost, Ronald A. Kohnaki, and M. Daniel Lane

Identification of the receptor for ω-conotoxin in brain. Probable components of the calcium channel.

Teruo Abe and Hideo Saisa

Thermolabile proton translocating ATPase and pump activities in a clathrin-coated vesicle fraction from an acidification defective Chinese hamster cell line.

Dennis K. Stone, Mary Marnell, Young Yang, and Rockford K. Draper

O-Linked N-acetylgalactosamine is attached to proteins of the nuclear pore. Evidence for cytoplasmic and nucleoplasmic glycoproteins.

John A. Hanover, Clara K. Cohen, Mark C. Willingham, and Min K. Park

Protein damage and degradation by oxygen radicals. I. General aspects.

Kelvin J. A. Davies

Protein damage and degradation by oxygen radicals. II. Modification of amino acids.

Kelvin J. A. Davies, Marta E. Delsignore, and Sharon W. Lin

Protein damage and degradation by oxygen radicals. III. Modification of secondary and tertiary structure.

Kelvin J. A. Davies and Marta E. Delsignore

Protein damage and degradation by oxygen radicals. IV. Degradation of denatured protein.

Kelvin J. A. Davies, Sharon W. Lin, and Robert E. Pacifici

ADDITIONS AND CORRECTIONS

Anne L. Plant, Roger D. Knapp, and Louis C. Smith

Ross A. Tubo and Ronald Berezney

GENERAL INFORMATION FOR 1987

Submit all manuscripts in triplicate to

Editor, The Journal of Biological Chemistry
9650 Rockville Pike
Bethesda, MD 20814, U.S.A.

Accepted manuscripts will be published with the implicit understanding that the author(s) will pay a charge per page (miniprint supplement excluded). Current page charges may be obtained by contacting the JBC Office. Under exceptional circumstances, when no source of grant or other support exists, the author(s) may apply, at the time of submission, for a grant-in-aid to Chairman, Publications Committee, American Society of Biological Chemists, Inc., 9650 Rockville Pike, Bethesda, MD 20814. All such applications must be countersigned by an appropriate institutional official stating that no funds are available to pay page charges.

Queries on matters of general editorial policy, requests for reprints of the "Instructions to Authors," or of the "Editorial Policy and Practices," or for permission to reproduce any part of a previously published article should be directed to the Journal Editorial Office in Bethesda, telephone 301-530-7150.

The Journal of Biological Chemistry publishes papers on a broad range of topics of interest to biochemists. The views expressed are those of the author(s) and not of The Journal of Biological Chemistry or the American Society of Biological Chemists.

The Journal of Biological Chemistry is copyrighted by the American Society of Biological Chemists, Inc. Reprographic copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law is allowed, provided that the $1.50 per-copy fee is paid through the Copyright Clearance Center, 21 Congress Street, Salem, MA 01970. Reproduction of any portion of an article for subsequent republication requires permission of the copyright owner. Requests should be made in writing to the American Society of Biological Chemists, Inc., Attn.: Editorial Office, 9650 Rockville Pike, Bethesda, MD 20814, and should include a statement of intended use as well as explicit specifications of the material to be reproduced.

Address all correspondence and orders relative to subscriptions and back copies to: The Journal of Biological Chemistry, 428 East Preston Street, Baltimore, MD 21202, U.S.A., telephone 301-528-4255. Subscriptions are entered on a calendar year basis only. Requests for termination of subscriptions will be honored with proportional refunds less a $10 cancellation charge. Allow at least six weeks for address changes. Claims for replacement copies must be received within four months of the issue date.

The Journal of Biological Chemistry (ISSN 0021-9258) is published three times per month by the American Society of Biological Chemists, Inc., 428 East Preston Street, Baltimore, MD 21202, U.S.A. Volume 362: United States, $455; other countries, $530. Single copy: United States, $17.00; other countries, $19.00. Special subscription rates are available to members, graduate students, and postdoctoral fellows for personal use only. Qualifying forms are available from the ASBC Office, 9650 Rockville Pike, Bethesda, MD 20814. Second class postage paid at Baltimore, MD 21202, U.S.A., and at additional mailing offices. Send address changes to The Journal of Biological Chemistry at 428 East Preston Street, Baltimore, MD 21202, U.S.A.
9509 Interaction between NAD-dependent isocitrate dehydrogenase, α-ketoglutarate dehydrogenase complex, and NADH:ubiquinone oxidoreductase.
Zoltan Pospycz, Balazs Sumegi, and Istvan Albonsi

9511 The effect of divalent cations on the amidolectic activity of bovine plasma activated protein C and des-1–41-light chain activated protein C.
Kelvin A. W. Hill, L. Maria E. Kroon, and Francis J. Castellino

9588 Ethanenitronate is a peroxide-dependent suicide substrate for catalase.
David J. T. Porter and Harold J. Bright

9515 Enzymes that process somatostatin precursors. A novel endoprotease that cleaves before the arginine-lysine doublet is involved in somatostatin-28 conversion activity of rat brain cortex.
Pablo Giuschankof, Sophie Gomez, Alain Morel, and Paul Cohen

9588 Identification of the probable inhibitory reactive sites of the cysteine proteinase inhibitors human cystatin C and chicken cystatin.
Magnus Abrahamson, Anka Riona, Moity A. Brown, Anders Grubb, Werner Macheidt, and Alan J. Barrett

9595 Identification of spectrin-related peptides associated with the reticulocyte heme-controlled α subunit of eukaryotic translational initiation factor 2 kinase and of a M, 95,000 peptide that appears to be the catalytic subunit.
Wieslaw Kudlicki, Susan Fulilove, Robert Read, Gisela Kramer, and Boyd Hardesty

9736 Half-site reactivity of the tyrosyl radical of ribonucleotide reductase from Escherichia coli.
Brett-Marie Sjöberg, Margareta Karlsson, and Hans Jörnvall

9752 Inactivation of Factor Va by plasmin.
Mohamed Nagib Omar and Kenneth G. Mann

9793 Mechanism of oxidation of ρ-bonds by cytochrome P-450. Electronic requirements of the transition state in the turnover of phenylacetylenes.
Elizabeth A. Komives and Paul R. Ortiz de Montellano

MEMBRANES AND BIOENERGETICS

9441 Molecular oxygen controls nitrate transport of Escherichia coli nitrate-respiring cells.
Sumihare Noji and Shigehiko Taniguchi

9542 Influx of 5′-deoxy-5′-methylthioadenosine into HL-60 human leukemia cells and erythroid cells.
Johanna D. Stoeckler and Shih-Ying Li

9803 Light-regulated methylation of chloroplast proteins.
Michael T. Black, Daniel Meyer, William R. Widger, and William A. Cramer

9828 Major and minor forms of the rat liver asialolglycoprotein receptor are independent galactose-binding proteins. Primary structure and glycosylation heterogeneity of minor receptor forms.
Diane P. Halberg, Ruth E. Wager, Daun C. Farrell, John Hildreth IV, Michael S. Quesenberry, Jeffrey A. Loeb, Eric C. Holland, and Kurt Drickmmer

9865 A protein phosphatase associated with rat heavy gastric membranes enriched with (H"-K")-ATPase influences membrane K⁺ transport activity.
Woo Bin Im, David P. Blakeman, John E. Beasley, and John P. Davis

9871 Identification of the receptor for α-conotoxin in brain. Probable components of the calcium channel.
Teruo Abe and Hideo Saisu

9883 Thermolabile proton translocating ATPase and pump activities in a clathrin-coated vesicle fraction from an acidification defective Chinese hamster cell line.
Dennis K. Stone, Mary Marnell, Young Yang, and Rockford K. Draper

Anne L. Plant, Roger D. Knapp, and Louis C. Smith

NUCLEIC ACIDS, PROTEIN SYNTHESIS, AND MOLECULAR GENETICS

9429 Two nuclear factors compete for the skeletal muscle actin promoter.
Kenneth Walsh and Paul Schimmel

9494 Interaction of terminal transferase with single-stranded DNA.
David J. Robbins, Mary D. Barkley, and Mary Sue Coleman

9574 Primary structure of the human 4F2 antigen heavy chain predicts a transmembrane protein with a cytoplasmic NH₂ terminus.
Santosu Tesseira, Salvatore Di Grandi, and Lukas C. Kühn

Chin-Yi Jenney Ilsu and Fred R. Frankel

9610 Ferrate oxidation of Escherichia coli DNA polymerase-I. Identification of a methionine residue that is essential for DNA binding.
Amareesh Basu, Kenneth R. Williams, and Mukund J. Modak

9636 pH-dependent structural transition in rabbit skeletal troponin C.
Chih-Lueh Albert Wang, Qian Zhan, Terence Tao, and John Georgely

9641 Plastid run-on transcription. Application to determine the transcriptional regulation of spinach plastid genes.
Xing-Wang Deng, David B. Stern, John C. Tonkyn, and Wilhelm Grassem

9681 Probing ribosome function and the location of Escherichia coli ribosomal protein L5 with a monoclonal antibody.
Bishwajit Nag, Dinesh S. Tewari, Andreas Sommer, Helen McKuske Olson, John G. Glins, and Robert R. Traut

9709 Analysis of the tissue-specific expression, developmental regulation, and linkage relationships of a rodent gene encoding heart fatty acid binding protein.
Robert O. Hueschroth, Edward H. Birenheime, Marc S. Levin, and Jeffrey L. Gordon

9808 Isolation of a cDNA clone encoding a high molecular weight precursor to a 6-kDa pulmonary surfactant-associated protein.
Kenneth A. Jacobs, David S. Phelps, Randal Steinbrink, Judith Fisch, Ronald Kria, Lisa Mitsock, Joseph P. Dougherty, H. William Toews, and Joanna Flora

9839 Modulation of the cellular ratio of chromosomal high mobility group proteins 14 to 17 in transfectedy cells.
Chandrakant Giri, David Landsman, Nimroli Soares, and Michael Bustin

9844 Type X collagen synthesis during endochondral ossification in fracture repair.
William T. Grant, Gwo-Jaw Wang, and Gary Balian

9892 Identification of 100 and 150 kDa polypeptide bands that participate in the assembly of cartilage extracellular matrix.
Ross A. Tubo and Ronald Berenson
Radiation inactivation analysis of enzymes. Effect of free radical scavengers on apparent target sizes.
Duane C. Eichler, Larry P. Solomonson, Michael J. Barber, Michael J. McCreery, and Gene C. Ness

Characterization of the calmodulin-binding sites of muscle phosphofructokinase and comparison with known calmodulins-binding domains.
Bärbel Buschmeier, Helmut E. Meyer, and Georg W. Mayr

A tyrosine kinase related to pp60"src" is associated with membranes of Electrophorus electricus electric organ.
Carol G. Shores, Michael E. Cox, and Patricia F. Maness

Characterization of the calmodulin-binding sites of muscle phosphofructokinase and comparison with known calmodulin-binding domains.
Bärbel Buschmeier, Helmut E. Meyer, and Georg W. Mayr

Yeast cytochrome c peroxidase. Coordination and spin states of heme prosthetic group.
Takashi Yonetani and Helen Anni

Phosphorylation of the 20,000-dalton light chain of smooth muscle myosin by the calcium-activated, phospholipid-dependent protein kinase. Phosphorylation sites and effects of phosphorylation.
Mitsuo Ikebe, David J. Hartshorne, and Marshall Elzinga

Characterization of the chicken histone H1 gene complement. Generation of a complete set of vertebrate H1 protein sequences.
Leanne S. Coles, Allan J. Robins, Lisa K. Madley, and Julian R. E. Wells

Characterization of the six chicken histone H1 proteins and alignment with their respective genes.
M. Frances Shannon and Julian R. E. Wells

Selective covalent labeling of cysteines in bovine serum albumin and in hepatoma tissue culture cell glucocorticoid receptors by dexamethasone 21-mesyate.
S. Stoney Simons, Jr.

Identification of cysteine 656 as the amino acid of hepatoma tissue culture cell glucocorticoid receptors that is covalently labeled by dexamethasone 21-mesyate.
S. Stoney Simons, Jr., Janet G. Pumphrey, Stuart Rudloff, and Howard J. Eisen

Purification and partial characterization of small proteoglycans I and II, bone sialoproteins I and II, and osteoneckin from the mineral compartment of developing human bone.
Larry W. Fisher, Guy R. Hawkins, Noreen Tuross, and John D. Termine

Isolation and characterization of antistasin. An inhibitor of metastasis and coagulation.
George P. Tuszyński, Tatiana B. Gasic, and Gabriel J. Gasic

The primary structure of a procaryotic glycoprotein. Cloning and sequencing of the cell surface glycoprotein gene of halobacteria.
Johann Lechner and Manfred Sumper

Altered actin and troponin binding of amino-terminal variants of chicken striated muscle a-tropomyosin expressed in Escherichia coli.
Sarah E. Hitchcock-DeGregori and Rebecca W. Heald

Rat liver UDP-glucuronosyltransferase. Identification of cDNAs encoding two enzymes which glucuronidate testosterone, dihydrotestosterone, and 8-estradiol.
Peter I. Mackenzie

Biochemical and glycosylation studies of cell surface platelet-derived growth factor receptors.
Thomas O. Daniel, Dale F. Milfay, Jaime Escobedo, and Lewis T. Williams

Sites of in vivo phosphorylation of the T cell tyrosine protein kinase in LSTRA cells and their alteration by tumor-promoting phorbol esters.
John E. Casnellie
