MINIREVIEW

11539 α-Macroglobulins: structure, shape, and mechanism of proteinase complex formation.
Lars Sotrup-Jensen

COMMUNICATIONS

11543 Formation of highly ordered cross-linked lattices between asparagine-linked oligosaccharides and lectins observed by electron microscopy.
Lokesh Bhattacharyya, M. Islam Khan, Jane Fant, and C. Fred Brewer

11546 Overproduction and preliminary crystallographic study of ribonuclease H from Escherichia coli.
Shigeneru Kanaya, Atsuko Kohara, Mayuko Miyagawa, Takao Matsuzaki, Kousuke Morihawa, and Morio Ihebara

11550 A jack bean protein similar to pea seed ferritin and unrelated to concanavalin A is the only iron storage protein in jack bean seeds, although concanavalin A can form ferritin-like iron cores in vitro.
Jean-Francois Briat, Olivier Massenet, and Jean-Pierre Laulhere

11554 Transforming growth factor-β stimulation of lung fibroblast prostaglandin E2 production.
Arturo Diaz, John Varga, and Sergio A. Jimenez

ARTICLES

11558 Temporal integration of α1-adrenergic responses in BC3H-1 muscle cells. Regulation of glycogen phosphorylase activity.
Shahrrokh Toranj and R. Dale Brown

11565 Purification and characterization of proline-β-naphthylamidase, a novel enzyme from pig intestinal mucosa.
Takayuki Takahashi, Atsushi Ikai, and Kenji Takahashi

11572 Ligand-induced modulation of the hepatic receptor for asialoglycoproteins. Evidence for the role of cell surface hyposialylation.
Peretz Weiss and Gilbert Ashwell

11575 Amino acid sequence of a Crotalus atrox venom metalloproteinase which cleaves type IV collagen and gelatin.
John D. Shannon, Eugenia N. Baramova, Jon B. Bjarnason, and Jay W. Fox

11583 Regulation of the expression of the L-type pyruvate kinase gene in adult rat hepatocytes in primary culture.
Jean-Francois Decaux, Bénédicte Antoine, and Axel Kahn

11591 Tumor necrosis factor α inhibits gonadotropin hormonal action in nontransformed ovarian granulosa cells. A modulatory noncytotoxic property.
Elis Y. Adashi, Carol E. Resnick, Carol S. Croft, and Donna W. Payne

11598 Studies on the purified, lipid-reconstituted (Na+ + Mg2+)-ATPase from Acholeplasma laidlawii B membranes. Dependence of enzyme activity on lipid headgroup and hydrocarbon chain structure.
Rojan George, Ruthven N. A. H. Lewis, Sandeep Mahajan, and Ronald N. McElhaney

11605 The magnetic and electronic properties of Methanobacterium thermoautotrophicum strain (strain 2 strain 20) methyl coenzyme M reductase and its nickel tetrapyrrole cofactor P450. A low temperature magnetic circular dichroism study.
Cristi L. Hamilton, Robert A. Scott, and Michael K. Johnson

11614 Conformational stability and mechanism of folding of ribonuclease T1.
James A. Thomasen, Bret A. Shirley, Gerald R. Grimsley, and C. Nick Pace

11621 Conformational stability and activity of ribonuclease T1 and mutants. Gin$^{90}$ → Lys, Glu$^{90}$ → Ala, and the double mutant.
Bret A. Shirley, Patrick Stansens, Jan Steyaert, and C. Nick Pace

11626 Bovine heart pyruvate dehydrogenase kinase stimulation by monovalent ions.
James G. Robertson, Lynn L. Barron, and Merle S. Olson

11632 A partial methylation profile for a CpG site is stably maintained in mammalian tissues and cultured cell lines.
Mitchell S. Turker, Karen Swissheim, Annette C. Smith, and George M. Martin

11637 Metabolism of [125$I^{-}$-atrial natriuretic factor by vascular smooth muscle cells. Evidence for a peptidase that specifically removes the COOH-terminal tripeptide.
Gibbs R. Johnson, Leyla Arik, and Corbyn J. Foster

11643 Carboxyl-terminal truncations of the melibiose carrier of Escherichia coli.
Martyn C. Botfield and T. Hastings Wilson

11649 Peptide-specific antibody for the melibiose carrier of Escherichia coli localizes the carboxyl terminus to the cytoplasmic face of the membrane.
Martyn C. Botfield and T. Hastings Wilson

11653 Chromatin aggregation changes substantially as pH varies within the physiological range.
Xiao-zen Guo and R. David Cole

11658 Metabolism of 20-hydroxyeicosatetraenoic acid by cyclooxygenase. Formation and identification of novel endothelium-dependent vasoconstrictor metabolites.
Michal Laniado Schwartzman, J. R. Falck, Pendri Yadagiri, and Bruno Escalante

11663 Topology of the transposon Tn10-encoded tetracycline resistance protein within the inner membrane of Escherichia coli.
Bernhard Ebert and Christoph F. Beck

* The CONTENTS arranged by Subject Categories will be found immediately following these CONTENTS.

Full Instructions to Authors will be found in (1989) J. Biol. Chem. 264, 11527-11537, and reprints may be obtained from the editorial office.
Interacti of the γ-subunit of retinal rod outer segment phosphodiesterase with transducin. Use of synthetic peptides as functional probes.  
Daniel F. Morrison, Jess M. Cunick, Brenda Oppert, and Dolores J. Takemoto

Mutations affecting the catalytic activity of Bacillus cereus 5/B/6 β-lactamase II.  
Heon M. Lim and Jacques J. Pène

Thryotropin-releasing hormone and phorbol esters stimulate sphingomyelin synthesis in GH, pituitary cells. Evidence for involvement of protein kinase C.  
Richard N. Kolesnik

The function of Gp170, the multidrug resistance gene product, in rat liver canalicular membrane vesicles.  
Yukio Komimoto, Zenaida Gatmaitan, Joseph Hu, and Irwin M. Aras

Ligand-induced dimerization of the platelet-derived factor receptor. Monomer-dimer interconversion occurs independent of receptor phosphorylation.  
Subal Bishtaye, Subrata Majumdar, Jayant Khire, and Manjusri Das

The ap5b coding region has been disrupted and a novel reading frame generated in the mitochondrial genome of cytoplasmic male-sterile radish.  
Christopher A. Makaroff, Ingrid J. Apel, and Jeffrey D. Palmer

Identification, purification, and characterization of truncated forms of the human nerve growth factor receptor.  

Kinetic analysis of the formation of inositol 1,2-cyclic phosphate in carbachol-stimulated pancreatic mininbules. Half is formed from direct phosphodiesteratic cleavage of phosphatidylinositol.  
John F. Dixon and Lowell E. Hokin

Widespread occurrence in animal tissues of an enzyme catalyzing the conversion of NAD⁺ into a cyclic metabolite with intracellular Ca²⁺-mobilizing activity.  
Nancy Rusinko and Hon Cheng Lee

A single gene codes for two forms of rat nuclear protein B23 mRNA.  
Jin-Hong Chang and Mark O. J. Olson

Interaction of type I plasminogen activator inhibitor with the enzymes of the contact activation system.  
Mauro Berrettini, Raymond R. Schleef, Francisco Espańska, David J. Leskauf, and John H. Griffin

Effect of N²,N¹²-bis(ethyl)spermine and related compounds on growth and polyamine acetylation, content, and excretion in human colon tumor cells.  
Antoniya E. Pegg, Rita Wechter, Rajabul Papala, and Raymond J. Bergeron

Reconstitution of the thermostable trimeric phage P22 tailspike protein from denatured chains in vitro.  
Robert Seckler, Albert Fuchs, Jonathan King, and Rainer Jaenicke

Cloning, sequence analysis, and permanent expression of a human α₂-adrenergic receptor in Chinese hamster ovary cells. Evidence for independent pathways of receptor coupling to adenylate cyclase attenuation and activation.  
Claire M. Fraser, Shoji Arakawa, W. Richard McCombie, and J. Craig Venter

Gonadotropin-releasing hormone activates phospholipase D in ovarian granulosa cells. Possible role in signal transduction.  
Mordechai Liscovitch and Abraham Amsterdam

The "regulatory" sulfhydryl group of Penicillium chrysogenum ATP sulfurylase. Cooperative ligand binding after SH modification; chemical and thermodynamic properties.  

Solubilization and partial purification of a hyaluronate synthetase from olgidendroglioma cells.  
Kian F. Ng and Nancy B. Schwartz

Examination of the function of active site lysine 329 of ribulose-bisphosphate carboxylase/oxygenase as revealed by the proton exchange reaction.  
Fred C. Hartman and Eva H. Lee

Studies on the active site of the Neurospora crassa plasma membrane H⁺-ATPase with periodate-oxidized nucleotides.  
Ashok P. Bidou, Nihmat A. Morjana, and Gene A. Scarborough

The intracellular transport of low density lipoprotein-derived cholesterol is inhibited in Chinese hamster ovary cells cultured with 3-β-2-[diethylamino]ethoxy]androst-5-ene-17-one.  
Laura Liscum and Jerry R. Faust

Glu-111 is required for activation of the DNA cleavage center of EcoRI endonuclease  
Klim King, Stephen J. Benkovic, and Paul Modrich

The negative charge of Glu-111 is required to activate the cleavage center of EcoRI endonuclease.  
David J. Wright, Klim King, and Paul Modrich

Role of a luciferin-binding protein in the celandean bioluminescent reaction of Gonyaulax polyedra.  
David Morse, A. M. Pappenheimer, Jr., and J. Woodland Hastings

Chlorophyll precursors in the plasma membrane of a cyasobacterium, Anacystis nidulans. Characterization of protochlorophyllide and chlorophyllide by spectrophotometry, spectrofluorometry, solvent partition, and high performance liquid chromatography.  
Gunter A. Peschek, Barbara Hinterstoissser, Marnik Wastyn, Otto Kunther, Bernard Pineau, Albert Misbichler, and Johanna Lang

Both a short hydrophobic domain and a carboxyl-terminal hydrophilic region are important for signal function in the Escherichia coli leader peptidase.  
Heng-yi Zhu and Ross E. Dolby

Ha-ras activates the Na⁺/H⁺ antiporter by a protein kinase C-independent mechanism.  
Karl Maly, Florian Oberwil, Hannes Lofener, Wolfgang Doppler, Hermann Oberhuber, Bernd Groner, and Hans H. Grünke

High molecular weight insulin-like growth factor binding protein complex. Purification and properties of the acid-labile subunit from human serum.  
Robert C. Baxter, Janet L. Martin, and Virginia A. Benias

A new Saccharomyces cerevisiae mnn mutant N-linked oligosaccharide structure.  
Luis M. Hernández, Lun Ballou, Eugene Alvarado, Beth L. Gillece-Castro, A. L. Burlingame, and Clinton E. Ballou

Protein glycosylation defects in the Saccharomyces cerevisiae mnn mutant class. Support for the stop signal proposed for regulation of outer chain elongation.  
Lun Ballou, Eugene Alvarado, Pei-kuo Tsai, Anne Dell, and Clinton E. Ballou

RAS2 protein of Saccharomyces cerevisiae is methyl-esterified at its carboxyl terminus.  
Robert J. Desenes, Julie B. Stimmel, Steven Clarke, Jeff Stock, and James R. Broach
11874 Characterization of an imidazoline/guanidinium recepto
receptor site distinct from the α2-adrenergic recep
to
Angele Parini, Isabelle Coupy, Robert M. Graham, Illla
Uzielli, Daphne Atlas, and Stephen M. Lanier

11879 Localization of 1,25-(OH)2D3-responsive alkaline
phosphatase in osteoblast-like cells (ROS 17/2.8, MG 63, and MC 3T3) and growth cartilage cells in culture.
Barbara D. Boyan, Zvi Schwartz, Lynda F. Bonewald, and Larry D. Swain

11887 Studies of crystalline trimethylamine dehydrogen-
ase in three oxidation states and in the presence of substrate and inhibitor
Henry D. Bellamy, Louis W. Lim, F. Scott Mathews, and William R. Dunham

11893 Osteogenesis imperfecta type IV. Detection of a
point mutation in one α1(I) collagen allele (COL1A1)
by RNA/RNA hybrid analysis.
Joan C. Martin, Dorothy K. Grange, Gary S. Gottesman, Mary Beth Lewis, and David A. Koeplin

11901 Expression of the thyroid sodium/iodide symporter
in Xenopus laevis oocytes.
Franck Vüijn and Nancy Carrasco

11904 Insulin rapidly induces the biosynthesis of elonga-
tion factor 2.
Richard M. Levenson, Angus C. Nairn, and Perry J. Blackshear

11912 Characterization of the phosphorylation sites in the
chicken and bovine myristoylated alanine-rich C
kinase substrate protein, a prominent cellular substrate
for protein kinase C.
Jonathan M. Graff, Deborah J. Stumpo, and Perry J. Blackshear

11920 Activation and maturation mechanisms of boar ac-
crosin zymogen based on the deduced primary structure.
Tadashi Baba, Shin-ichi Kashiwabara, Ken Watonabe, Hisao Itoh, Yuichi Michikawa, Kaji Kimura, Masayasu Totaka, Akiyoshi Fukamizu, and Yuji Arai

11928 Synthesis and properties of 5-azido-UDP-glucose.
Development of photoaffinity probes for nucleotide
diphosphate sugar binding sites.
Richard B. Drake, Jr., Robert K. Evans, Martha J. Wolf, and Boyd E. Halcy

11934 Delayed cytotoxicity and selective loss of mitochon-
drial DNA in cells treated with the anti-human im-
umodeficiency virus compound 2',3'-dideoxyctydine.
Chin-Ho Chen and Yung-Chi Cheng

11938 The role of phosphorylation and limited proteolytic
clavage of talin and vinculin in the disruption of focal
adhesion integrity.
Christopher E. Turner, Fredrick M. Pavalko, and Keith Burridge

11945 Mouse angiotensin-converting enzyme is a protein
composed of two homologous domains.
Kenneth E. Bernstein, Brian M. Martin, Alise S. Ed-
wards, and Ellen A. Bernstein

11952 A C2 muscle cell variant defective in transport of
the acetylcholine receptor to the cell surface.
Yong Gu, Roy A. Black, George Ring, and Zach W. Hall

11958 Regulation of casein kinase II activity by epidermal
growth factor in human A-431 carcinoma cells.
Pat Ackerman and Neil Osheroff

11966 Purification and biologic characterization of a spe-
cific tumor necrosis factor a inhibitor.
Philippe Seckinger, Sylvie Issaa, and Jean-Michel Dayer

11974 A tumor necrosis factor-binding protein purified to
homogeneity from human urine protects cells from
necrosis factor toxicity.
Hartmut Engelmann, Dan Aderka, Menachem Rubi
stein, Dalia Rotman, and David Wallach

11981 Biosynthetic analysis of the human interferon-γ
receptor. Identification of N-linked glycosylation
intermediates.
Gurjit K. Khurana Hershey and Robert D. Schreiber

11989 Traf protein of plasmid RP4 binds to a 19-base pair
inverted repeat sequence within the transfer ori-
gin.
Gunter Ziegelin, Jens Peter Fürste, and Erich Lanka

11995 The cellular pool of Na+ channels in the amphibian
cell line A6 is not altered by mineralocorticoids.
Analysis using a new photoactive amiloride analog in
combination with anti-amiloride antibodies.
Thomas R. Kleyman, Edward J. Cragoe, Jr., and Jean Pierre Krachenbuhl

20001 Molecular cloning of a Chinese hamster mitochondrial
protein related to the "chaperonin" family of bacterial and plant proteins.
David J. Picketts, Chandra S. K. Mayanil, and Rudhey S. Gupta

20009 The primary structure of human secretotroganin II, a
widespread tyrosine-sulfated secretory granule
protein that exhibits low pH- and calcium-induced
aggregation.
Hans-Heinrich Gerdes, Patrizia Rosa, Elizabeth Philip-
ips, Patrick A. Bauerle, Rainer Frank, Patrick Argos, and Wieland B. Huttmann

20016 Hypersomolarity inhibits galactosyl receptor-mediat-
ed but not fluid phase endocytosis in isolated rat
hepatocytes.
Janet A. Oka, Monique D. Christensen, and Paul H. Wiegèl

20025 Transforming growth factor-β (TGF-β) receptor
proteoglycan. Cell surface expression and ligand
binding in the absence of glycosaminoglycan chains.
Sela Cheiftets and Joan Massaguè

20029 Fc “proton channel” of rat liver mitochondria. Rapid
purification of a functional complex and a study of its
interaction with the unique probe diethylstilbese-
trol.
Maureen W. McNerney, Joanne Hullihen, and Peter L. Pedersen

20037 Attenuated induction of heat shock gene expression
in aging diploid fibroblasts.
Alice Y.-C. Liu, Zheng Lin, Hueng-Sik Choi, Frank Sor-
hage, and Boshan Li

20046 Image processing of proteinasas- and methylamine-
transformed human α2-macroglobulin. Localization of the
proteinasas.
Nicolas Boisset, Jean-Christophe Taveau, François Po-
chon, Annette Tardieu, Martine Barray, Jean N. Lamy, and Etienne Delain

20053 Differential overexpression of three mdr gene family
members in multidrug-resistant J774.2 mouse
cells. Evidence that distinct P-glycoprotein precur-
sors are encoded by unique mdr genes.
Stephen I-Hong Hsu, Leonard Lothstein, and Susan
Band Horwitz

20063 The rat growth hormone gene contains multiple
thryoid response elements.
Mark F. Norman, Thomas N. Lavin, John D. Baxter, and Brian L. West

20074 Graphic rules in steady and non-steady state enzyme
kinetics.
Kao-Chen Chou

20080 Shared and distinct structural features of interstitial
proteoglycans from different bovine tissues re-
vealed by electron microscopy.
Mathias Mørgelin, Mats Paulsson, Anders Malmström, and Dick Heinegård

20091 Dispensable prerequisite for cellular localization and
function of mitochondrial malate dehydrogen-
ase from S. cerevisiae.
Leslie M. Thompson and Lee McAlister-Henn
Purification and biologic characterization of a specific tumor necrosis factor α inhibitor. 
Philippe Seckinger, Sylvie Isaaz, and Jean-Michel Dayer

A tumor necrosis factor-binding protein purified to homogeneity from human urine protects cells from tumor necrosis factor toxicity. 
Hartmut Engelmann, Dan Aderka, Menachem Rubinstein, Dalia Rotman, and David Wallach

The cellular pool of Na+ channels in the amphibian cell line A6 is not altered by mineralcorticoids. Analysis using a new photoactive amiloride analog in combination with anti-amiloride antibodies. 
Thomas R. Kleyman, Edward J. Craygo, Jr., and Jean Pierre Kraehenbuhl

Molecular cloning of a Chinese hamster mitochondrial protein related to the "chaperonin" family of bacterial and plant proteins. 
David J. Picketts, Chandra S. K. Mayanil, and Radhey S. Gupta

The primary structure of human secretogranin II, a widespread tyrosine-sulfated secretory granule protein that exhibits low pH- and calcium-induced aggregation. 
Hans-Bermann Gerdes, Patrizia Rosa, Elizabeth Philipps, Patrick A. Baeuerle, Rainer Frank, Patrick Argos, and Wieland B. Huttner

Hyperosmolarity inhibits galactosyl receptor-mediated but not fluid phase endocytosis in isolated rat hepatocytes. 
Janet A. Oka, Monguc D. Christensen, and Paul H. Weigel

Transferring growth factor-β (TGF-β) receptor protoligoxygenate. Cell surface expression and proteolytic binding in the absence of glycosaminoglycan chains. 
Sela Cheifetz and Joan Massagué

Attenuated induction of heat shock gene expression in aging diploid fibroblasts. 
Alice Y.-C. Liu, Zheng Lin, Hueng-Sik Choi, Frank Sorhage, and Boshan Li

Patrick K. Schoff, Jan Cheetham, and Henry A. Lardy

Purification and characterization of proline-$\gamma$-naphthylamidase, a novel enzyme from pig intestinal mucosa. 
Takayuki Takahashi, Atsushi Ikai, and Kenji Takahashi

The magnetic and electronic properties of Methanobacterium thermautotrophicum (strain D) methyl coenzyme M reductase and its nickel tetra(pyrrrole cofactor F₄300. A low temperature magnetic circular dichroism study. 
Cristi L. Hamilton, Robert A. Scott, and Michael K. Johnson

Bovine heart pyruvate dehydrogenase kinase stimulation by monovalent ions. 
James G. Robertson, Lynn L. Barron, and Merle S. Olson

Interaction of type 1 plasminogen activator inhibitor with the enzymes of the contact activation system. 
Mauro Berrettini, Raymond R. Schleif, Francisco Españo, David J. Loskutoff, and John H. Grifin

The "regulatory" sulfhydryl group of Penicillium chrysogenum ATP sulfurylase. Cooperative ligand binding after SH modification; chemical and thermodynamic properties. 

Solubilization and partial purification of hyaluronic acid synthetase from oligodendroglia cells. 
Kian F. Ng and Nancy B. Schwartz

Examination of the function of active site lysine 329 of ribulose-bisphosphate carboxylase/oxygenase as revealed by the proton exchange reaction. 
Fred C. Hartman and Eva H. Lee

Glu-111 is required for activation of the DNA cleavage center of EcoRI endonuclease. 
Klim King, Stephen J. Benkovic, and Paul Modrich

The negative charge of Glu-111 is required to activate the cleavage center of EcoRI endonuclease. 
David J. Wright, Klim King, and Paul Modrich

Graphic rules in steady and non-steady state enzyme kinetics. 
Kuo-Chen Chou

Andrew J. Prongay, David R. Engelske, and Charles H. Williams, Jr.

Studies on the purified, lipid-reconstituted (Na+ + Mg2+)-ATPase from Acholobasplasma laidawai B membranes. Dependence of enzyme activity on lipid headgroup and hydrocarbon chain structure. 
Bajan George, Rathven N. A. H. Lewis, Sandeep Mohan, and Ronald N. McElhaney

Carboxyl-terminal truncations of the melibiose carrier of Escherichia coli. 
Martyn C. Botfield and T. Hastings Wilson

Peptide-specific antibody for the melibiose carrier of Escherichia coli localizes the carboxyl terminus to the cytoplasmic face of the membrane. 
Martyn C. Botfield and T. Hastings Wilson

Topology of the transposon Tn10-encoded tetracycline resistance protein within the inner membrane of Escherichia coli. 
Bernhard Eckert and Christoph F. Beck

The function of Gp170, the multidrug resistance gene product, in rat liver canalicular membrane vesicles. 
Yuko Kamimoto, Zenaida Gaitman, Janet Hsu, and Irwin M. Arias

Studies on the active site of the Neurospora crassa plasma membrane H+-ATPase with periodate-oxidized nucleotides. 
Ashok P. Bideau, Nihmat A. Morjana, and Gene A. Scarborough

Chlorophyll precursors in the plasma membrane of a cyanobacterium, Anacystis nidulans. Characterization of protochlorophyllide and chlorophyllide by spectrophotometry, spectrofluorimetry, solvent partition, and high performance liquid chromatography. 
Günther A. Pesche, Barbara Hinterstösser, Marnik Wastyn, Otto Kuntner, Bernard Pineau, Albert Mössbacher, and Johanna Lang

Both a short hydrophobic domain and a carboxyl-terminal hydrophilic region are important for signal function in the Escherichia coli leader peptidase. 
Heng-yi Zhu and Rose E. Dalbey

Expression of the thyroid sodium/iodide symporter in Xenopus laevis oocytes. 
Franck Vilijn and Nancy Carrasco

F, "proton channel" of rat liver mitochondria. Rapid purification of a functional complex and a study of its interaction with the unique probe diethylstilbestrol. 
Maureen W. McEnery, Joanne Hullihan, and Peter L. Pedersen
NUCLEIC ACIDS, PROTEIN SYNTHESIS, AND MOLECULAR GENETICS

11584 Regulation of the expression of the L-type pyruvate kinase gene in adult rat hepatocytes in primary culture.
Jean-François Decaux, Bénédicte Antoine, and Axel Kahn

11632 A partial methylation profile for a CpG site is stably maintained in mammalian tissues and cultured cell lines.
Mitchell S. Turner, Karen Swisshelm, Annette C. Smith, and George M. Martin

11653 Chromatin aggregation changes substantially as pH varies within the physiological range.
Xiao-wei Guo and R. David Cole

11662 Mutations affecting the catalytic activity of Bacillus cereus 5/B/6 β-lactamase II.
Heon M. Lim and Jacques J. Pine

11893 Osteogenesis imperfecta type IV. Detection of a point mutation in one α1(1) collagen allele (COL1A1) by RNA/RNA hybrid analysis.
Joan C. Marini, Dorothy R. Granger, Gary S. Gottesman, Mary Beth Lewis, and David A. Koeplin

11920 Conformational stability and activity of ribonuclease T1 and mutants. Gln<sup>186</sup> → Lys, Glu<sup>186</sup> → Ala, and the double mutant.
Bret A. Shirley, Patrick Stanessens, Ian Steyaert, and C. Nick Pace

11954 Mouse angiotensin-converting enzyme is a protein composed of two homologous domains.
Kenneth E. Bernstein, Brian M. Martin, Alise S. Edwards, and Ellen A. Bernstein

12011 Conformational stability and mechanism of folding of ribonuclease T1.
James A. Thomson, Bret A. Shirley, Gerald R. Grimsley, and C. Nick Pace

12063 The rat growth hormone gene contains multiple transcriptional regulatory elements.
Christopher A. Makoff, Ingrid J. Apel, and Jeffrey D. Palmer

12091 Dispensable presequence for cellular localization and function of mitochondrial malate dehydrogenase from Saccharomyces cerevisiae.
Leslie M. Thompson and Lee McAllister-Henn

11614 PROTEIN CHEMISTRY AND STRUCTURE

11548 Overproduction and preliminary crystallographic study of ribonuclease II from Escherichia coli.
Shigenori Kanayo, Atuko Kohara, Miyuko Miyagawa, Tatsuo Matsuishi, Kosuke Morikawa, and Morio Ikahara

11550 A jack bean protein similar to pea seed ferritin and unrelated to concanavalin A is the only iron storage protein in jack bean seeds, although concanavalin A can form ferritin-like iron cores in vitro.
Jean-François Briat, Olivier Massenet, and Jean-Pierre Lauthère

11575 Amino acid sequence of a Crotalus atrox venom metalloproteinase which cleaves type IV collagen and gelatin.
John D. Shannon, Eugenia N. Baramova, Jon B. Bjarnason, and Jay W. Fox

11621 Amino acid sequence of a Crotalus atrox venom metalloproteinase which cleaves type IV collagen and gelatin.
John D. Shannon, Eugenia N. Baramova, Jon B. Bjarnason, and Jay W. Fox

11671 Interaction of the γ-subunit of retinal rod outer segment phosphodiesterase with transducin. Use of synthetic peptides as functional probes.
Daniel F. Morrison, Jess M. Cunnick, Brenda Oppert, and Dolores J. Takemoto

11682 Identification, purification, and characterization of truncated forms of the human nerve growth factor receptor.

11750 Reconstitution of the thermostable trimeric phage P22 tailspike protein from denatured chains in vitro.
Robert Seckler, Albert Fuchs, Jonathan King, and Rainer Jaenicke

11754 Cloning, sequence analysis, and permanent expression of a human α<sub>2</sub>-adrenergic receptor in Chinese hamster ovary cells. Evidence for independent pathways of receptor coupling to adenylate cyclase attenuation and activation.
Claire M. Fraser, Shoji Arakawa, W. Richard McCombie, and J. Craig Venter

11865 Characterization of an imidazoline/guanidinium receptor.
Angelo Parini, Isabelle Coupry, Robert M. Graham, Illana Uzieli, Daphne Atlas, and Stephen M. Lanier

11878 Synthesis and properties of 5-azido-UDP-glucose. Development of photoaffinity probes for nucleotide diphosphate sugar binding sites.
Richard R. Drake, Jr., Robert K. Evans, Martha J. Wolf, and Boyd E. Haeley
Biosynthetic analysis of the human interferon-γ receptor. Identification of N-linked glycosylation intermediates.

Gurjit K. Khurana Hershey and Robert D. Schreiber

Image processing of proteinases- and methylamine-transformed human α2-macroglobulin. Localization of the proteinases.

Nicolas Boisset, Jean-Christophe Taveau, François Pochon, Annette Tardieu, Martine Baray, Jean N. Lamy, and Etienne Delain

Shared and distinct structural features of interstitial proteoglycans from different bovine tissues revealed by electron microscopy.

Matthias Morgelin, Mats Paulsson, Anders Malmström, and Dick Heinegård

Purification and characterization of human immunodeficiency virus (HIV) core precursor (p55) expressed in Saccharomyces cerevisiae.
