MINIREVIEW

1 Signaling through phosphatidylcholine breakdown. John H. Exton

COMMUNICATIONS

5 Angiotensin II inhibits luteinizing hormone-stimulated cholesterol side chain cleavage expression and stimulates basic fibroblast growth factor expression in bovine luteal cells in primary culture. David Stirling, Ronald R. Magnes, Rosalinda Stone, Michael R. Waterman, and Evan R. Simpson

9 An amino-terminal signal sequence abrogates the intrinsic membrane-targeting information of mitochondrial uncoupling protein. Xingquan Liu, Karl B. Freeman, and Gordon C. Shore

ARTICLES

20 Identification and preliminary characterization of an O2-methylguanine DNA repair methyltransferase in the yeast Saccharomyces cerevisiae. Mandana Sasanjar and Leona Samson

34 A single base exchange in an intron of the Dictyostelium discoideum a-actin gene inhibits correct splicing of the RNA but allows transport to the cytoplasm and translation. Walter Witke and Angelika A. Noegel

40 Hydrogen peroxide mediates the oxidative inactivation of enzymes following the switch from anaerobic to aerobic metabolism in Klebsiella pneumoniae. Michel Chevalier, E. C. C. Lin, and Rodney L. Levine

52 Purification and characterization of a maturation-activated myelin basic protein kinase from sea star oocytes. Jasbinder S. Sanghera, Harry B. Paddon, Sharon A. Bader, and Steven L. Pelech

58 Characterization of fully active biotinylated parathyroid hormone analogs. Application to fluorescence-activated cell sorting of parathyroid hormone receptor expressing cells. Abdul-Badii Abu-Sara, Mason Freeman, Harald Jüppner, Susumu Uneno, and Gino V. Segre

63 Multiple second messenger pathways of α-adrenergic receptor subtypes expressed in eukaryotic cells. Susanna Colecchia, Brian K. Kobihra, Kuerer W. Lusen, Roger D. Nolan, Eduardo Y. Lapetina, Marc G. Caron, Robert J. Lefkowitz, and John W. Regan

70 Inhibition of Na,K-ATPase and sodium pump by protein kinase C regulators sphingosine, lysophosphatidylcholine, and oleic acid. Kazuhiko Oishi, Bin Zheng, and J. F. Kuo

76 Sphingosine stimulates cellular proliferation via a protein kinase C-independent pathway. Hong Zhang, Nancy E. Buckley, Karen Gibson, and Sarah Spiegel

82 Studies on the mechanism of oxidative phosphorylation. Positive cooperativity in ATP synthesis. Akemi Matsuno-Yagi and Yousef Hatefi

89 Monoclonal antibodies against acidic phosphoproteins P0, P1, and P2 of eukaryotic ribosomes as functional probes. Toshio Uchiumi, Robert R. Traut, and Ryo Kominami

96 Pathways of purine metabolism in human adipocytes. Further evidence against a role of adenosine as an endogenous regulator of human fat cell function. Horst Kather

103 Carmustine augments the effects of tert-butyl hydroperoxide on calcium signaling in cultured pulmonary artery endothelial cells. Stephen J. Elliott and William F. Schilling

114 Human transferrin receptor contains O-linked oligosaccharides. Su-II Do, Caroline Enns, and Richard D. Cummings

126 Hemoglobin Warsaw (Phe62Arg) to Val, an unstable variant with decreased oxygen affinity. Characterization of its synthesis, functional properties, and structure. George R. Honig, Leyda N. Vida, Barnett B. Rosenblum, Max F. Perutz, and Giulio Fermi

133 Active site structure and antigen binding properties of idiotypically cross-reactive anti-fluorescein monoclonal antibodies. William D. Bedzyk, James N. Herron, Allen B. Edmundson, and Edward W. Voss, Jr.

139 Kinetic investigations of the quaternary enhancement effect and αβ differences in binding the last oxygen to hemoglobin tetramers and dimers. John S. Philo and Jeffrey W. Lary

144 Expression and characterization of human factor IX and factor IX-factor X chimeras in mouse C127 cells. Shu-Wha Lin, Kenneth J. Smith, Dean Welsch, and Darrel W. Stafford

* The CONTENTS arranged by Subject Categories will be found immediately following these CONTENTS.

Full Instructions to Authors will be found in (1990) J. Biol. Chem. 265, 595-605, and reprints may be obtained from the editorial office.

Kinetic analysis of yeast phosphatidate phosphatase toward Triton X-100/phosphatidate mixed micelles. Yi-Feng Lin and George M. Carman.

Calcium binding to extracellular sites of skeletal muscle calcium channels regulates dihydropyridine binding. Hitoshi Ebata, John S. Mills, Karen Nemeck, and J. David Johnson.

Molecular characterization of an anion pump. The ArsB protein is the membrane anchor for the ArsA protein. Louis S. Tsai and Barry P. Rosen.

Angiotensin II surface receptor coupling to inositol triphosphate formation in vascular smooth muscle cells. Michael E. Ullian and Stuart L. Linas.

Thermal stability of microsomal glucose-6-phosphatase. David M. Zahn and Andrew Dannenberg.

Down-modulation of epidermal growth factor receptor affinity in fibroblasts treated with interleukin 1 or tumor necrosis factor is associated with phosphorylation at a site other than threonine 654. Timothy A. Bird and Jeremy Sahatcua.

Heparin promotes the binding of thrombin to fibrin polymer. Quantitative characterization of a thrombin-fibrin polymer-heparin ternary complex. Philip J. Hogg and Craig M. Jackson.

Formation of a ternary complex between thrombin, fibrin monomer, and heparin influences the action of thrombin on its substrates. Philip J. Hogg and Craig M. Jackson.

Identification of a site in the α chain of platelet glycoprotein IIb that participates in von Willebrand factor binding. Vincenzo Vicente, Richard A. Houghten, and Zaverio M. Ruggeri.

Intramitochondrial transfer of phospholipids in the yeast, Saccharomyces cerevisiae. Renate Simbeni, Fritz Palttauf, and Günther Daum.

Site-directed mutagenesis of arginine 103 and lysine 185 in the proposed glycosaminoglycan-binding site of heparin cofactor II. Morey A. Blinder and Doulaas M. Tolleson.

A mitogenic fibrogen receptor that differs from glycoprotein IIb-IIIa. Identification by affinity chromatography and by covalent cross-linking. Jean-Pierre Levesque, Jacques Hatsfeld, and Antoinette Hatsfeld.

Ecto-ATPase activity in cytolytic T-lymphocytes. Protection from the cytolytic effects of extracellular ATP. Antonio Filippini, Rolf E. Taffs, Takashi Agui, and Michael V. Skittipovsky.

The cDNA sequence of mouse Pgp-1 and homology to human CD44 cell surface antigen and proteoglycan core/link proteins. Elizabeth J. Wolfe, William C. Gause, Clara M. Pelfrey, Steven M. Holland, Alfred D. Steinberg, and J. Thomas August.

pH and magnesium dependence of ATP binding to sarcoplasmic reticulum ATPase. Evidence that the catalytic ATP-binding site consists of two domains. Jean-Jacques Lacapère, Nelly Bennett, Yves Dupont, and Florent Guillin.
354 Expression and properties of two distinct classes of the phorbol ester receptor family, four conventional protein kinase C types, and a novel protein kinase C.

363 Identification of the benzothiazepine-binding polypeptide of skeletal muscle calcium channels with (+)-cis-azidodiltiazem and anti-ligand antibodies.

371 Mast cells contain spleen-type prostaglandin D synthetase.

376 Cellular and subcellular localization of an M, 64,000 protein autoantigen in insulin-dependent diabetes.

382 Bis(benzyl)polyamine analogs as novel substrates for polyamine oxidase.

389 Overproduction and purification of the unci gene product of the ATP synthase of Escherichia coli.

396 The formylmethanofuran:tetrahydromethanopterin formyltransferase from Methanobacterium thermoautotrophicum ΔH. Nucleotide sequence and functional expression of the cloned gene.

401 Recombinant carboxyl-terminal fibrin-binding domain of human fibronectin expressed in mouse L cells.

408 Interdomain hydrolysis of a truncated Pseudomonas exotoxin by the human immunodeficiency virus 1 protease.

414 Purification and characterization of choline/ethanolamine kinase from rat liver.

423 Identification and molecular cloning of a novel mouse mucosal mast cell serine protease.

428 Protective action of phospholipid hydroperoxide glutathione peroxidase against membrane-damaging lipid peroxidation. In situ reduction of phospholipid and cholesterol hydroperoxides.

437 Molecular cloning and enzyme expression of a human skeletal muscle protein kinase C in Escherichia coli.

442 Protective action of phospholipid hydroperoxide glutathione peroxidase against membrane-damaging lipid peroxidation. In situ reduction of phospholipid and cholesterol hydroperoxides.

452 Crystallographic and preliminary x-ray investigation of recombinant human granulocyte-macrophage colony-stimulating factor.

454 Overproduction and purification of the unc1 gene product of the ATP synthase of Escherichia coli.

462 cDNA cloning and tissue distribution of mRNAs for two proteins that are related to the band 3 Cl- /HCO3-exchanger."
Identification of a cytoplasmic region of the Torpedo nicotinic acetylcholine receptor α-subunit by epitope mapping.
Steen E. Pedersen, Paul C. Bridgman, Shannan D. Sharp, and Jonathan B. Cohen

Isolation of Chinese hamster ovary ribosomal mutants differentially resistant to ricin, abrin, and modeccin.
Sandra Sallustio and Pamela Stanley

High-level expression of pig liver thioredoxin (glutaredoxin) in Escherichia coli.
Yanfeng Yang and William W. Wells

ADDITIONS AND CORRECTIONS

Hua Chuan, Johnson Lin, and Jui H. Wang

Joe C. Wu, Hua Chuan, and Jui H. Wang

Stanko S. Stojilkovic, Eduardo Rojas, Andres Stutzin, Shun-ichiro Izumi, and Kevin J. Catt

Instructions to authors.

The editorial policy and practices of The Journal of Biological Chemistry.

Nomenclature committee of IUB (NC-IUB) and IUPAC-IUB joint commission on biochemical nomenclature (JCBN). Newsletter 1989.

GENERAL INFORMATION

Submit all manuscripts in triplicate to
Editor, The Journal of Biological Chemistry
9650 Rockville Pike
Bethesda, MD 20814, U.S.A.

Accepted manuscripts will be published with the implicit understanding that the author(s) will pay a charge per page (miniprint supplement excluded). Current page charges may be obtained by contacting the JBC Office. Under exceptional circumstances, when no source of grant or other support exists, the author(s) may apply, at the time of submission, for a grant-in-aid to Chairman, Publications Committee, American Society for Biochemistry and Molecular Biology, Inc., 9650 Rockville Pike, Bethesda, MD 20814. All such applications must be countersigned by an appropriate institutional official stating that no funds are available for page charges.

Queries on matters of general editorial policy, requests for reprints of the "Instructions to Authors," or of the "Editorial Policy and Practices," or for permission to reproduce any part of a previously published article should be directed to the Journal Editorial Office in Bethesda, telephone 301-530-7150.

The Journal of Biological Chemistry publishes papers on a broad range of topics of interest to biochemists. The views expressed are those of the author(s) and not of The Journal of Biological Chemistry or the American Society for Biochemistry and Molecular Biology.

The Journal of Biological Chemistry is copyrighted by the American Society for Biochemistry and Molecular Biology, Inc. Reprographic copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law is allowed, provided that the $1.50 per-copy fee is paid through the Copyright Clearance Center, 21 Congress Street, Salem, MA 01970. Printed on acid-free paper effective with Volume 254, Issue No. 1 (1979). Reproduction of any portion of an article for subsequent republication requires permission of the copyright owner. Requests should be made in writing to the American Society for Biochemistry and Molecular Biology, Inc., Attn: Editorial Office, 9650 Rockville Pike, Bethesda, MD 20814, and should include a statement of intended use as well as explicit specifications of the material to be reproduced.

Address all correspondence and orders relative to subscriptions and back copies to: The Journal of Biological Chemistry, 428 East Preston Street, Baltimore, MD 21202, U.S.A., telephone 301-528-4255. Subscriptions are entered on a calendar year basis only. Requests for termination of subscriptions will be honored with proportional refunds less a $10 cancellation charge. Allow at least six weeks for address changes. Claims for replacement copies must be received within four months of the issue date.

1 Signaling through phosphatidylcholine breakdown.
   John H. Exton

CARBOHYDRATES, LIPIDS, AND OTHER
NATURAL PRODUCTS

114 Human transferrin receptor contains O-linked oligosaccharides.
   Su-II Do, Caroline Enns, and Richard D. Cummings

CELL BIOLOGY AND METABOLISM

5 Angiotensin II inhibits luteinizing hormone-stimulated cholesterol side chain cleavage expression and stimulates basic fibroblast growth factor expression in bovine luteal cells in primary culture.
   David Stirling, Ronald R. Magness, Rowlanda Stone, Michael R. Waterman, and Evan R. Simpson

63 Multiple second messenger pathways of α-adrenergic receptor subtypes expressed in eukaryotic cells.
   Susanna Cotecchia, Brian K. Kobilka, Kiefer W. Daniel, Roger D. Nolan, Eduardo Y. Lapetina, Marc G. Caron, Robert J. Lefkowitz, and John W. Regan

76 Sphingosine stimulates cellular proliferation via a protein kinase C-independent pathway.
   Hong Zhang, Nancy E. Buchley, Karen Gibson, and Sarah Spiegel

96 Pathways of purine metabolism in human adipocytes. Further evidence against a role of adenosine as an endogenous regulator of human fat cell function.
   Horst Kather

103 Carmustine augments the effects of tert-butyl hydroperoxide on calcium signaling in cultured pulmonary artery endothelial cells.
   Stephen J. Elliott and William P. Schilling

156 Isolation, purification, and partial characterization of suppressin, a novel inhibitor of cell proliferation.
   Robert D. LeBoeuf, Jack N. Burns, Kenneth L. Bost, and J. Edwin Blalock

183 Interleukin 8 (monocyte-derived neutrophil chemotactic factor) dynamically regulates its own receptor expression on human neutrophils.
   Ajoy K. Samanta, Joost J. Oppenheim, and Kouji Matsumoto

195 Angiotensin II surface receptor coupling to inositol triphosphate formation in vascular smooth muscle cells.
   Michael E. Ullian and Stuart L. Linas

214 Differential association and distribution of acetyl- and butyrylcholinesterases within rat liver subcellular organelles.
   Aleksandra Perelman, Claudia Abojein, Carlos B. Hirschberg, Nibaldo C. Znestrosa, and Enrique Brandan

227 Purification of a novel insulin-stimulated protein kinase from rat liver.
   Jes R. Kliantand, Andrew P. Bradford, Maria G. Milla, and Michael P. Czech

235 Down-modulation of epidermal growth factor receptor affinity in fibroblasts treated with interleukin 1 or tumor necrosis factor is associated with phosphorylation at a site other than threonine 654.
   Timothy A. Bird and Jeremy Sokolowa

• Indicates a Communication

318 Vanadate stimulates oxygen consumption and tyrosine phosphorylation in electropheremobilized human neutrophils.
   Sergio Grinstein, Wendy Furuya, Diane J. Lu, and Gordon B. Mills

398 A mitogenic fibrinogen receptor that differs from glycoprotein IIb-IIIa. Identification by affinity chromatography and by covalent cross-linking.
   Jean-Pierre Levesque, Jacques Hatzfeld, and Antoinette Hatzfeld

334 Ecto-ATPase activity in cytolytic T-lymphocytes.
   Protection from the cytolytic effects of extracellular ATP.
   Antonio Filippini, Rolf E. Taffs, Takashi Agui, and Michael V. Sibbonsky

354 Expression and properties of two distinct classes of the phorbol ester receptor family, four conventional protein kinase C types, and a novel protein kinase C.
   Yoshiho Akita, Shigeo Ohno, Yasushi Konno, Akihiko Yano, and Koichi Suzuki

371 Mast cells contain spleen-type prostaglandin D synthetase.
   Yoshihiro Uraide, Mayumi Uijihara, Yuji Horiguchi, Makoto Igarashi, Akihisa Nagata, Kouichi Ikai, and Osamu Hayashi

396 Phosphatidylinositol kinase or an associated protein is a substrate for the insulin receptor tyrosine kinase.
   Gerda Endemann, Kazuyoshi Yonezawa, and Richard A. Roth

401 Recombinant carboxy-terminal fibrin-binding domain of human fibronectin expressed in mouse L cells.
   Keho Ichihara-Tanaka, Koiti Titans, and Kyotoshi Sekiguchi

430 Lactosaminoglycan assembly, cell surface expression, and release by mouse uterine epithelial cells.
   Anuradha Dutta and Daniel D. Carson

439 Purification of a 130-kDa T cell glycoprotein that binds human interleukin 4 with high affinity.
   Jean-Pierre Galizzi, Brian Castle, Osak Dijouso, Nobuyuki Harada, Helene Cabrillat, Smina Ait Yahia, Robin Barrett, Maureen Howard, and Jacques Banchereau

454 Vectorial secretion of extracellular matrix proteins, matrix-degrading proteinases, and tissue inhibitor of metalloproteinases by endothelial cells.
   Elaine N. Unemori, Karyn S. Bouhana, and Zena Werb

483 The structurally similar neuropeptides adipokinetic hormone I and II are derived from similar, very small mRNAs.
   Barbara E. Noyes and Martin H. Schaffer

529 Isolation and characterization of proteoglycans synthesized by cultured mesangial cells.
   Eisum Yosita, Kiyoko Oguri, Eiko Okahana, Katsutoshi Kawasaki, Satoshi Koiyama, Ataru Kihara, and Minoru Okahana

   Stanko S. Stojilkovic, Eduardo Rojas, Andres Stutzin, Shun-icho Izuw, and Kevin J. Catt
ENZYMIOLOGY

20 Identification and preliminary characterization of an O"-methylguanine DNA repair methyltransferase in the yeast Saccharomyces cerevisiae.
    Manliana Sassanj and Leona Samson

40 Hydrogen peroxide mediates the oxidative inactivation of enzymes following the switch from anaerobic to aerobic metabolism in Klebsiella pneumoniae.
    Michel Chevalier, E. C. C. Lin, and Rodney L. LeCoute

52 Purification and characterization of a maturation-activated myelin basic protein kinase from sea star oocytes.
    Jashinder Singh, Harry B. Paddon, Sharon A. Badger, and Steven L. Pelech

70 Inhibition of Na,K-ATPase and sodium pump by protein kinase C regulators sphingosine, lysophosphatidylcholine, and oleic acid.
    Kazuhiko Oishi, Bin Zheng, and Y. F. Kuo

139 Kinetic investigations of the quaternary enhancement effect and α/β differences in binding the last oxygen to hemoglobin tetramers and dimers.
    John S. Philo and Jeffrey W. Lary

166 Kinetic analysis of yeast phosphatidate phosphatase toward Triton X-100/phosphatidate mixed micelles.
    Yi-Ping Lin and George M. Carman

201 Thermal stability of microsomal glucose-6-phosphate.
    David Zukin and Andrew Dunnenberg

382 Bis(benzyl)polyamine analogs as novel substrates for polyamine oxidase.
    Alan J. Bitonti, Jennifer A. Dumont, Tammy L. Bush, David M. Stereick, Michael L. Edwards, and Peter P. McCann

414 Purification and characterization of choline/ethanolamine kinase from rat liver.
    Thomas J. Porter and Claudia Kent

429 Identification and molecular cloning of a novel mouse mucosal mast cell serine protease.

    Joe C. Wu, Hua Chuan, and Jui H. Wang

    Hua Chuan, Johnson Lin, and Jui H. Wang

MEMBRANES AND BIOENERGETICS

82 Studies on the mechanism of oxidative phosphorylation. Positive cooperativity in ATP synthesis.
    Akemi Matsuno-Yagi and Yousei Hatfeli

190 Molecular characterization of an anion pump. The ArsB protein is the membrane anchor for the ArsA protein.
    Louis S. Tisa and Barry P. Rosen

281 Intramitochondrial transfer of phospholipids in the yeast Saccharomyces cerevisiae.
    Renate Simbemi, Fritz Paltouf, and Gunther Daum

299 Kinetic asymmetry of renal Na"+-lactate cotransport. Characteristic parameters and evidence for a ping pong mechanism of the trans-stimulating exchange by pyruvate.
    Raymond Mengual, Marie-Hélène Schlager, and Pierre Suda

300 Evidence for compartmentalized adenylate kinase catalysis serving a high energy phosphoryl transfer function in rat skeletal muscle.

348 pH and magnesium dependence of ATP binding to sarcoplasmic reticulum ATPase. Evidence that the catalytic ATP-binding site consists of two domains.
    Jean-Jacques Lacapare, Nelly Bennett, Yoes Dupont, and Florent Guillain

363 Identification of the benzothiazepine-binding polypeptide of skeletal muscle calcium channels with (+)cis-azidodiltiazem and anti-ligand antibodies.
    Joerg Striensig, Fritz Schaeffner, Joerg Mitterdorfer, Michael Schirmer, and Hartmut Glossmann

389 Overproduction and purification of the ucfI gene product of the ATP synthase of Escherichia coli.
    Bernard Schneps, Gabriel Decker, Hebestreit, and Karlheinz Altendorf

464 Protective action of phospholipid hydroperoxide glutathione peroxidase against membrane-damaging lipid peroxidation. In situ reduction of phospholipid and cholesterol hydroperoxides.
    James P. Thomas, Matilde Maiorano, Fulvio Ursini, and Albert W. Girotti

462 cDNA cloning and tissue distribution of mRNAs for two proteins that are related to the band 3 CT/HCO3 exchanger.
    Katarzyna E. Rudzyni, Paul R. Newman, and Gary E. Shull

532 Direct evidence for the cytoplasmic location of the NH2- and COOH-terminal ends of the Neurospora crassa plasma membrane H+-ATPase.
    John P. Hennessey, Jr. and Gene A. Scarborough

NUCLEIC ACIDS, PROTEIN SYNTHESIS, AND MOLECULAR GENETICS

5 An amino-terminal signal sequence abrogates the intrinsic membrane-targeting information of mitochondrial uncoupling protein.
    Xingquan Liu, Karl B. Freeman, and Gordon C. Shore

13 The deduced protein sequence of the human carboxypeptidase N high molecular weight subunit reveals the presence of leucine-rich tandem repeats.
    Fulong Tan, Deepshi K. Wearsinghe, Randal A. Skidgel, Hiroshi Tamei, Rajinder K. Kaul, Igor B. Roninson, James W. Schilling, and Ervin G. Erdös

    Toshikito Eki, Takemi Enomoto, Atsuko Miyajima, Hirosi Miyazawa, Yasufumi Murakami, Fumio Hanaoka, Masa-atsu Yamada, and Michio Uti

34 A single base exchange in an intron of the Dictyostelium discoideum actin gene inhibits correct splicing of the RNA but allows transport to the cytoplasm and translation.
    Walter Withe and Angelika A. Noegel

• Indicates a Communication
133 Monoclonal antibodies against acidic phosphoproteins P0, P1, and P2 of eukaryotic ribosomes as functional probes.
Toshiro Uchiumi, Robert W. Traut, and Kyo Romannl

106 Elevation of rat liver mRNA for selenium-dependent glutathione peroxidase by selenium deficiency.
Nan-qian Li, Pamanji S. Reddy, Kenan Thayagaraju, Ambati P. Reddy, Benjamin L. Hsu, Richard W. Scholz, Chen-Pei D. Tu, and C. Chinnasa Reddy

209 Purification and characterization of the yeast transcriptional activator GAL4.
Mark R. Partchim and Judith A. Joehning

211 Heat shock and arsenite increase expression of the multidrug resistance (MDR1) gene in human renal carcinoma cells.
Kehw-Voon Chin, Shigeo Tanaka, Gretchen Darlington, Ira Pastan, and Michael M. Gottesman

472 The formylmethanofuranformyltetrahydromethanopterin formyltransferase from Methanobacterium thermoautotrophicum. Nucleotide sequence and functional expression of the cloned gene.
Anthony A. DeMarco, Karen A. Smen, Jordan Konisky, and Ralph S. Wolfe

477 Control of the adipin gene in adipocyte differentiation. Identification of distinct nuclear factors binding to single- and double-stranded DNA.
William O. Wiksion, Hye Yeong Min, Kevin P. Claffey, Brett L. Satterberg, and Bruce M. Spiegelman

493 Tagetitoxin inhibits RNA synthesis directed by RNA polymerases from chloroplasts and Escherichia coli.
Dennis E. Mathews and Richard D. Durbin

497 Tagetitoxin: a new inhibitor of eukaryotic transcription by RNA polymerase III.
Thomas H. Steinberg, Dennis E. Mathews, Richard D. Durbin, and Richard R. Burgess

506 Genomic organization of the human multidrug resistance (MDR1) gene and origin of P-glycoproteins.
Chang-jie Chen, Douglas Clark, Kazumitsu Ueda, Ira Pastan, Michael M. Gottesman, and Igor B. Roninson

582 Isolation of Chinese hamster ovary ribosomal mutants differentially resistant to riecin, abrin, and moidecin.
Sandra Saltusato and Pamela Stanley

589 High-level expression of pig liver thioltransferase (glutaredoxin) in Escherichia coli.
Yanfeng Yang and William W. Wells

PROTEIN CHEMISTRY AND STRUCTURE

58 Characterization of fully active biotinylated parathyroid hormone analogs. Application to fluorescein-activated cell sorting of parathyroid hormone receptor bearing cells.
Abdul-Dadi Abou-Samra, Mason Freeman, Harold Jüppner, Susumu Uneno, and Gino V. Segre

126 Hemoglobin Warsaw (Hb 429CD1→Val), an unstable variant with decreased oxygen affinity. Characterization of its synthesis, functional properties, and structure.
George R. Honig, Loyda N. Vida, Barnett B. Rosenblum, Max F. Perutz, and Giulio Ferri

133 Active site structure and antigen binding properties of idiotypically cross-reactive anti-fluorescein monoclonal antibodies.

144 Expression and characterization of human factor IX and factor IX-factor X chimeras in mouse C127 cells.
Shu-Wha Lin, Kenneth J. Smith, Dean Welsch, and Darrel W. Stafford

151 Interaction of fluorescent Δ7.8(11.12)-ergostatetraen-3-ol with sterol carrier protein-2.
Friedhelm Schroeder, Peter Butko, Gyorgy Nemecz, and Terence J. Scallen

177 Calcium binding to extracellular sites of skeletal muscle calcium channels regulates dihydropyridine binding.
Hitoshi Ebata, John S. Mills, Karen Nemcek, and J. David Johnson

241 Heparin promotes the binding of thrombin to fibrin polymer. Quantitative characterization of a thrombin-fibrin polymer-heparin ternary complex.
Philip J. Hop and Craig M. Jackson

248 Formation of a ternary complex between thrombin, fibrin monomer, and heparin influences the action of thrombin on its substrates.
Philip J. Hop and Craig M. Jackson

Lee W. Slice, Jonathan H. Freedman, and Charles S. Rubin

264 Disulfiram administration affects substance P-like immunoreactive and monoaminergic neural systems in rodent brain.
James E. Marchand, Kenneth Hershman, M. S. Amarendra Kumar, Michael L. Thompson, and Richard M. Krew

274 Identification of a site in the α chain of platelet glycoprotein IIb that participates in von Willebrand factor binding.
Vicente Vicente, Richard A. Houghten, and Zauverio M. Ruggeri

286 Site-directed mutagenesis of arginine 103 and lysine 165 in the proposed glycosaminoglycan-binding site of heparin cofactor II.
Nan-qian Li, Pamanji S. Reddy, Kedam Thyagaraju, John S. Mills, Karen Nemcek, and J. David Johnson

296 Expression and characterization of human factor IX and factor IX-factor X chimeras in mouse C127 cells.
Shu-Wha Lin, Kenneth J. Smith, Dean Welsch, and Darrel W. Stafford

301 Interaction of fluorescent Δ7.8(11.12)-ergostatetraen-3-ol with sterol carrier protein-2.
Friedhelm Schroeder, Peter Butko, Gyorgy Nemecz, and Terence J. Scallen

324 Calcium binding to extracellular sites of skeletal muscle calcium channels regulates dihydropyridine binding.
Hitoshi Ebata, John S. Mills, Karen Nemcek, and J. David Johnson

341 The cDNA sequence of mouse Pgp-1 and homology to human CD44 cell surface antigen and proteoglycan core/lkprotein.
Elizabeth J. Wolfe, William C. Gause, Clara M. Pelfrey, Steven M. Holland, Alfred D. Steinberg, and J. Thomas August

376 Cellular and subcellular localization of an M₉₆,₀₀₀ protein autoantigen in insulin-dependent diabetes.
Michael R. Christie, Daniel G. Pipeleers, Ake Lernmark, and Steinunn Backhekkou

408 Interdomain hydrolysis of a truncated Pseudomonas exotoxin by the human immunodeficiency virus-1 protease.
Alfredo G. Tomasselli, John O. Hui, Tomi K. Sawyer, Douglas J. Staples, David J. Fitz, Gerald Vigny, Joseph Chmiel, Ira Pastan, and Robert L. Heinrichsson

459 Crystallization and preliminary x-ray investigation of recombinant human granulocyte-macrophage colony-stimulating factor.
Paul Reichert, William J. Cook, Steven E. Ealick, Gerald S. Hammond, Hung V. Le, Tattonahalli L. Nagabhushan, Paul P. Trotta, and Charles E. Bugg
490 Crystallization and preliminary x-ray diffraction study of synthetic apolipoprotein E fragment (residues 129–169).
Prakash R. Maulik, Robert A. Reed, Doris A. Sparrow, James T. Sparrow, and G. Graham Shipley

515 Sodium cholate-induced changes in the conformation and activity of rat pancreatic cholesterol esterase.
Patrick W. Jacobson, Paddy W. Wiesenfeld, Linda L. Gallo, Ramon L. Tate, and James C. Osborne, Jr.

538 The amino terminus of muscle tropomyosin is a major determinant for function.
Young-Joon Cho, Jing Liu, and Sarah E. Hitchcock-DeGregori

546 Manduca sexta lipid transfer particle acts upon a lipoprotein to catalyze lipid and apoprotein disproportionation.
Robert 0. Ryan, Rik Van Antwerpen, Dick J. Van der Horst, Ad M. Th. Beenakkers, and John H. Law

553 Use of bacterial expression cloning to localize the epitopes for a series of monoclonal antibodies against apolipoprotein B100.
Richard J. Pease, Ross W. Milne, Wendy K. Jessup, Adam Law, Pierre Provost, Jean-Charles Fruchart, Roger T. Dean, Yves L. Marcel, and James Scott

569 Identification of a cytoplasmic region of the Torpedo nicotinic acetylcholine receptor α-subunit by epitope mapping.
Steen E. Pedersen, Paul C. Bridgman, Shannan D. Sharp, and Jonathan B. Cohen
