MINIREVIEW

4025 The cholinesterases.
Palmer Taylor

COMMUNICATIONS

4029 Thymosin β, and Fx, an actin-sequestering peptide, are indistinguishable.
Daniel Safer, Marshall Elinga, and Vivianne T. Nachmias

4033 Site-specific mutagenesis of an essential histidine residue in pancreatic cholesterol esterase.
Linda P. DiPersio, Robert N. Fontaine, and David Y. Hui

4037 Insulin and nonhydrolyzable GTP analogs induce translocation of GLUT 4 to the plasma membrane in α-toxin-permeabilized rat adipose cells.
Giuila Baldini, Robert Holman, Maureen J. Charron, and Harvey F. Lodish

4041 On the reversible interaction of plasminogen activator inhibitor-1 with tissue-type plasminogen activator and with urokinase-type plasminogen activator.
H. Roger Lijnen, Berthe Van Hoef, and Desire Collen

4045 Platelet-derived growth factor-mediated Ca²⁺ entry is blocked by antibodies to phosphatidylinositol 4,5-bisphosphate but does not involve heparin-sensitive inositol 1,4,5-trisphosphate receptors.
Chow-Long Huang, Tadahumi Yakenawa, and Harlan E. Ives

4049 The organic functional group in copper-containing amine oxidases. Resonance Raman spectra are consistent with the presence of topa quinone (6-hydroxydopa quinone) in the active site.
Doreen E. Brown, Michele A. McGuirk, David M. Dooley, Susan M. Janes, David Mu, and Judith P. Kliman

4052 An insulin-stimulated Kemptide kinase purified from rat liver is deactivated by phosphatase 2A.
Jes K. Klariand, Stephen R. Jaspers, Nazer Khalaf, Andrew P. Bradford, Thomas B. Miller, and Michael P. Czech

ARTICLES

4056 Substitution of the conserved tryptophan 31 in Escherichia coli thioredoxin by site-directed mutagenesis and structure-function analysis.
Gunter Krause and Arne Holmgren

4067 Demonstration of the phosphorylation of dihydropyridine-sensitive calcium channels in chick skeletal muscle and the resultant activation of the channels after reconstitution.
Cecilia Mundiria-Weilenmann, Chan Fong Chang, Luis M. Gutierrez, and M. Marlene Hoosey

4074 Demonstration of apolipoprotein CII in guinea pigs. Functional characteristics, cDNA sequence, and tissue expression.
Yvonne Andersson, Lars Thelander, and Gunilla Bengtsson-Olicevra

4081 Carbohydrate variant of the recombinant β-subunit of human choriogonadotropin expressed in baculovirus expression system.
Wenyong Shen, Qing-Xiang Shen, and Om P. Bahl

4088 Adenine nucleotides are required for activation of rat atrial natriuretic peptide receptor/guananyl cyclase expressed in a baculovirus system.
Michael Chinkers, Sujay Singh, and David L. Garbers

4094 Quantitative analysis of the pathways of glycosgen repletion in periporal and perivenous hepatocytes in vivo.
Gary W. Cline and Gerald I. Shulman

4099 Characterization of a limited trypsin digestion form of eukaryotic elongation factor 1α.
Terri Goss Kinzy and William C. Merrick

4106 Role of band 3 tyrosine phosphorylation in the regulation of erythrocyte glycosylation.
Maretta L. Harrison, Prema Rathinavelu, Paolo Arese, Robert L. Geahlen, and Philip S. Low

4112 Effect of direct suppression of thymidylate synthase at the 5,10-methylene tetrahydrofolate binding site on the interconversion of tetrahydrofolate cofactors to dihydrofolate by antifolates. Influence of degree of dihydrofolate reductase inhibition.
Richard L. Seither, David F. T rent, Donald C. Mikulecky, Tracy J. Rape, and I. David Goldman

4119 Purification and characterization of an oxygen-insensitive NAD(P)H nitroreductase from Enterobacter cloacae.
Christopher Bryant and Marlene DeLuca

4126 Cloning, nucleotide sequence, and expression of the nitroreductase gene from Enterobacter cloacae.
Christopher Bryant, Lauren Hubbard, and William D. McElroy

4131 An analysis of lactose permease “sugar specificity” mutations which also affect the coupling between proton and lactose transport. I. Val¹⁷⁷ and Val¹²⁷/Asn³¹⁸ permeases facilitate proton uniport and sugar uniport.
Robert J. Broeker

4139 An analysis of lactose permease “sugar specificity” mutations which also affect the coupling between proton and lactose transport. II. Second site revertants of the dihydrogalactoside-dependent proton leak by the Val¹⁷⁷/Asn³¹⁸ permease.
John A. Eeksema, Melissa A. O’Donnell, and Robert J. Broeker

4145 DNA sequence abnormalities of human glucose-6-phosphate dehydrogenase variants.
Ernest Beutler, Wanda Kuhl, Terri Gelbart, and Linda Forman

4151 Characterization of three related murine interleukin-3 surface receptor proteins.
Don A. Stevens, Jolanda Schreurs, James N. Ihle, and W. Stratford May

4159 Effects of cholesterol on the function and thermotropic properties of pure UDP-glucuronosyltransferase.
Michal Rotenberg and David Zakim

4162 Conversion of pig pancreas phospholipase A₂ by protein engineering into enzyme active against Escherichia coli treated with the bactericidal/permeability-increasing protein.
Jerrold Weiss, Grace Wright, Augustus C. A. P. A. Bekkers, Carel J. van den Bergh, and Hubertus M. Verheij

* The CONTENTS arranged by Subject Categories will be found immediately following these CONTENTS.

Full Instructions to Authors will be found in (1991) J. Biol. Chem. 266, 665-675, and reprints may be obtained from the editorial office.
The Journal of Biological Chemistry (ISSN 0021-9258) is published three times per month by the American Society for Biochemistry and Molecular Biology, Inc., 428 East Preston Street, Baltimore, MD 21202, U.S.A. Volume 266 for 1991. United States, $58.50; other countries, $72.00. Single copy: United States, $21.00; other countries, $28.00. Special subscription rates are available to members, graduate students, and postdoctoral fellows for personal use only. Qualifying forms are available from the ASBMB Office, 9650 Rockville Pike, Bethesda, MD 20814. Second class postage paid at Baltimore, MD 21202, U.S.A. and at additional mailing offices. Send address changes to The Journal of Biological Chemistry at 428 East Preston Street, Baltimore, MD 21202, U.S.A.
Antisera specific for rap1 proteins distinguish between processed and nonprocessed rap1b.
Deborah A. Winegar, Carol-A. Ohmstedt, Lily Chu, Bryan Reep, and Eduardo G. Lapetina

Isoprenylation of rap2 proteins in platelets and human erythroleukemia cells.
Deborah A. Winegar, Luis Molina y Vedia, and Eduardo G. Lapetina

Carboxyl methylation of platelet rap1 proteins is stimulated by guanosine 5'-O-(3-thiotriphosphate).
Huzoor-Akbar, Deborah A. Winegar, and Eduardo G. Lapetina

ATP-dependent uptake of 5-hydroxytryptamine by secretory granules isolated from thyroid parafollicular cells.
Shulamit Cidon, Hadassah Tamir, Eladio A. Nunez, and Michael D. Gerston

Clathrin assembly protein AP-3. The identity of a 155K protein, AP 180, and NP185 and demonstration of a clathrin binding domain.
Jo-Ellen Murphy, Irene T. Pleasure, Saul Pusztin, Kon-dury Prasad, and James H. Keen

Transcriptional regulation of ribosomal RNA synthesis during growth of cardiac myocytes in culture.
Paul J. McDermott, Lois L.Carl, Kimberly J. Conner, and Simon N. Allo

Genetic and biochemical characterization of Cu,Zn superoxide dismutase mutants in Saccharomyces cerevisiae.
Eric C. Chang, Brian F. Crawford, Zhi Hong, Tomasz Bilinski, and Daniel J. Kosman

Isolation of BamHI variants with reduced cleavage activities.
Shuang-yong Xu and Ira Schildkraut

Modification of low density lipoproteins by secretory granules of rat serosal mast cells.
Petri T. Kovanen and Jorma O. Kokkonen

Kenneth A. Beck and James H. Keen

Interaction of phosphoinositide cycle intermediates with the plasma membrane-associated clathrin assembly protein AP-2.
Kenneth A. Beck and James H. Keen

Purification to apparent homogeneity by immunoaffinity chromatography and partial characterization of the Gae ganglioside-forming enzyme. CMP-sialic acid:lactosylceramide α2,3-sialyltrasf erase (SAT-I), from rat liver Golgi.
Lydia J. Metherson-Watson and Charles C. Sweely

Bimodal effect of phorbol ester on B cell activation. Implication for the role of protein kinase C.
James J. Mond, Nils Feuerstein, Carl H. June, Anil K. Balapure, Robert I. Glazer, Kim Witherspoon, and Mark Brunswiek

 Biosynthesis of phosphatidylinositol glycan-anchored membrane proteins. Design of a simple protein substrate to characterize the enzyme that cleaves the COOH-terminal signal peptide.
Krishna Kodukula, Radmila Micanovic, Louise Gerber, Mauricio Tamburrini, Larry Brink, and Sidney Udendfield

Calcium as a potential physiological regulator of integrin-mediated cell adhesion.
Daniel Kirchhofer, John Grezisak, and Michael D. Pierschbacher

GABA receptors display association of γ2-subunit with α1- and α2/3-subunits.
Dietmar Benke, Stephan Mertens, Arnold Trzeciak, Dieter Gillessen, and Hanna Mohler

Herpes simplex virus-1 helicase-primease. Physical and catalytic properties.
James J. Crute and I. R. Lehman

Defective brush-border expression of intrinsic factor-cobalamin receptor in canine inherited intestinal cobalamin malabsorption.
John C. Fye, Kalathur S. Ramanujam, Krishnamurthy Ramaswamy, Donald F. Patterson, and Beller Seetharam

Cellular differentiation regulates expression of CI transport and cystic fibrosis transmembrane conductance regulator mRNA in human intestinal cells.
Charzad Montrose-Rafisadeh, William B. Guggino, and Marshall H. Montrose

Depletion of cellular calcium accelerates protein degradation in the endoplasmic reticulum.
Thomas Willimann, Lawrence P. Kane, Gerald R. Carson, and Cox Terhorst

The α1(VIII) collagen gene is homologous to the α1(X) collagen gene and contains a large exon encoding the entire triple helical and carboxyterminal non-triple helical domains of the α1(VIII) polypeptide.
Norihiko Yamaguchi, Richard Mayne, and Yoshifumi Ninomiya

Purification of a 92-kDa cytoplasmic protein tightly associated with the cell-cell adhesion molecule E-cadherin (uvomorulin). Characterization and extractability of the protein complex from the cell cytoskeleton.
Pierre D. McCrea and Barry M. Gumbiner

Expression of normal and novel glucokinase mRNAs in anterior pituitary and islet cells.
Steven D. Hughes, Christian Quaade, Joseph L. Milburn, Laura Cassidy, and Christopher B. Neve

A specific type of ganglioside as a modulator of insulin-dependent cell growth and insulin receptor tyrosine kinase activity. Possible association of ganglioside-induced inhibition of insulin receptor function and monocytic differentiation induction in HL-60 cells.
Hiroh Nojiri, Mark Stroud, and Sen-jiro Hakomori

In vitro synthesis of G protein γy dimers.
Carl J. Schmidt and Eeva J. Neer

Full length and alternatively spliced pgp transcripts in multidrug-resistant Chinese hamster lung cells.
Scott E. Devine, Arif Hussain, Joseph P. Davide, and Peter W. Mela

Transcriptional regulation of the rat NAD(P)H:quinone reductase gene. Identification of regulatory elements controlling basal level expression and inducible expression by planar aromatic compounds and phenolic antioxidants.
Leonard V. Favreau and Cecil B. Pickett

Higher order structure of the ribosomal 5 S RNA.
Ross N. Nazar

Escherichia coli DNA polymerase II is stimulated by DNA polymerase III holoenzyme auxiliary subunits.
A. John Hughes, Jr., Sharon K. Bryan, Hong Chen, Robb E. Moses, and Charles S. McHenry

Analysis of protease-sensitive regions in the skeletal muscle sodium channel in vitro and implications for channel tertiary structure.
Susan J. Zwerling, Sidney A. Cohen, and Robert L. Barchi

The Ca**-dependent actin filament-severing activity of 74-kDa protein (adseverin) resides in its NH2-terminal half.
Takashi Sakurai, Hiro Kurakawa, and Yoshiaki Nonomura

Identification of proteins involved in intracellular copper metabolism. Low levels of a 48-kDa copper-binding protein in the brindled mouse model of Menkes disease.
Fakhruddin A. Palida and Murray J. Ettinger
Submit all manuscripts in triplicate to
Editor, The Journal of Biological Chemistry
9650 Rockville Pike
Bethesda, MD 20814, U.S.A.
Accepted manuscripts will be published with the implicit understanding that the author(s) will pay a charge per page (miniprint supplement excluded). Current page charges may be obtained by contacting the JBC Office. Under exceptional circumstances, when no source of grant or other support exists, the author(s) may apply, in exceptional circumstances, when no source of grant or other support exists, the author(s) may apply, for a grant-in-aid to Chairman, Publications Committee, American Society for Biochemistry and Molecular Biology, Inc., 9650 Rockville Pike, Bethesda, MD 20814. All such applications must be accompanied by an appropriate institutional official stating that no funds are available for page charges.
Queries on matters of general editorial policy, requests for reprints of the "Instructions to Authors," or of the "Editorial Policy and Practices," or for permission to reproduce any part of a previously published article should be directed to the Journal Editorial Office in Bethesda, telephone 301-530-7100.

The Journal of Biological Chemistry publishes papers on a broad range of topics of interest to biochemists. The views expressed are those of the author(s) and not of The Journal of Biological Chemistry or the American Society for Biochemistry and Molecular Biology.

The Journal of Biological Chemistry is copyrighted by the American Society for Biochemistry and Molecular Biology, Inc. Reprographic copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law is allowed, provided that the $1.50 per-copy fee is paid through the Copyright Clearance Center, 21 Congress Street, Salem, MA 01970. © Printed on acid-free paper effective with Volume 254, Issue No. 1 (1979). Reproduction of any portion of an article for subsequent republication requires permission of the copyright owner. Requests should be made in writing to the American Society for Biochemistry and Molecular Biology, Inc., Attn: Editorial Office, 9650 Rockville Pike, Bethesda, MD 20814, and should include a statement of intended use as well as explicit specifications of the material to be reproduced. Address all correspondence and orders relative to subscriptions and back copies to The Journal of Biological Chemistry, 429 East Preston Street, Baltimore, MD 21202, U.S.A., telephone 301-228-4255. Subscriptions are entered on a calendar year basis only. Requests for termination of subscriptions will be honored with proportional refund less a $10 cancellation charge. Allow at least six weeks for address changes. Claims for replacement copies must be received within four months of the issue date.

GENERAL INFORMATION
The cholinesterases.
Palmer Taylor

CARBOHYDRATES, LIPIDS, AND OTHER NATURAL PRODUCTS
The structure of a neural specific carbohydrate epitope of horseradish peroxidase recognized by anti-horseradish peroxidase antiserum.
Akira Kuroaka, Azusa Yano, Nobuyuki Itoh, Yoshihiro Kuroda, Terumichi Nakagawa, and Toshisuke Kawasaki

Tumor necrosis factor α priming of phospholipase D in human neutrophils. Correlation between phosphatidic acid production and superoxide generation.

Evidence for an essential role of long chain acyl-CoA synthetase in animal cell proliferation. Inhibition of long chain acyl-CoA synthetase by triacsin caused inhibition of Raji cell proliferation.
Hiroshi Takoda, Kazuki Igarashi, Jong-Chol Cyong, and Satoshi Omura

Structure determination by 1H NMR spectroscopy of (sulfated) sialylated N-linked carbohydrate chains released from porcine thyroglobulin by peptide-N4-(N-acetyl-β-glucosaminyl)asparagine amydase-F.
Pieter de Waard, Anita Kooresvaar, Johannis P. Kamerling, and Johannes F. G. Vliegenthart

Monolayers of long chain lecithins at the air/water interface and their hydrolysis by phospholipase A2. Shinti Yokoyama and F. J. Kezdy

Purification to apparent homogeneity by immunoaffinity chromatography and partial characterization of the GM3 ganglioside-forming enzyme, CMP-sialic acid:lactosylceramide α2,3-sialyltransferase (SAT-1), from rat liver Golgi. Lydia J. Melbourn-Watson and Charles C. Sweelye

A specific type of ganglioside as a modulator of insulin-dependent cell growth and insulin receptor tyrosine kinase activity. Possible association of ganglioside-induced inhibition of insulin receptor function and monocytic differentiation induction in HL-60 cells.
Hisao Nojiri, Mark Stroud, and Sen-itiroh Hakomori

Variable O-glycosylation of CD13 (aminopeptidase N).
Philip J. O’Connell, Vicky Gerkis, and Anthony J. F. d’Apice

CELL BIOLOGY AND METABOLISM
Insulin and nonhydrolyzable GTP analogs induce translocation of GLUT 4 to the plasma membrane in α-toxin-permeabilized rat adipose cells.
Giulia Baldini, Robert Hofman, Maureen J. Charron, and Harvey F. Lodish

Platelet-derived growth factor-mediated Ca2+ entry is blocked by antibodies to phosphatidylinositol 4,5-bisphosphate but does not involve heparin-sensitive inositol 1,4,5-trisphosphate receptors.
Chou-Hang Huang, Tadaomi Takenawa, and Harlan E. Dies

An insulin-stimulated Kemptide kinase purified from rat liver is deactivated by phosphatase 2A.
Jes R. Klarlund, Stephen R. Jaspers, Nazer Khalaf, Andrew P. Bradford, Thomas B. Miller, and Michael F. Czeh

Demonstration of the phosphorylation of dihydro- pyridine-sensitive calcium channels in chick skeletal muscle and the resultant activation of the channels after reconstitution.
Cecilia Mundischa-Weilzmann, Chan Fong Chang, Luis M. Gutierrez, and M. Marlene Hoyer

Adenine nucleotides are required for activation of rat atrial natriuretic peptide receptor/guanylyl cyclase expressed in a baculovirus system. Michael Chinks, Sujay Singh, and David L. Garbers

Quantitative analysis of the pathways of glycogen repletion in perportal and perivenous hepatocytes in vivo.
Gary W. Cline and Gerald I. Shulman

Role of band 3 tyrosine phosphorylation in the regulation of erythrocyte glycolysis. Marsetta L. Harrison, Prema Rathinavelu, Paolo Arese, Robert L. Geahlen, and Philip S. Low

Effect of direct suppression of thymidylate synthase at the 5,10-methylenetetrahydrofolate binding site on the interconversion of tetrahydrofolate cofactors to dihydrofolate by antifolates. Influence of degree of dihydrofolate reductase inhibition.
Richard L. Seiler, David P. Trent, Donald C. Mihulecky, Tracy J. Rape, and I. David Goldman

Characterization of three related murine interleukin-3 surface receptor proteins.
Don A. Stevens, Jolanda Schreurs, James N. Iale, and W. Stratford May

Peroxyanitrite oxidation of sulfhydryls. The cytotoxic potential of superoxide and nitric oxide.
Rafael Rads, Joseph S. Beckman, Kenneth M. Bush, and Bruce A. Freeman

Thrombin attenuates the stimulatory effect of histamine on Ca2+ entry in confluent human umbilical vein endothelial cell cultures.
Craig B. Nenly and Robin F. Irvine

Isolation of the cDNA encoding glycoprotein-2 (GP-2), the major zymogen granule membrane protein. Homology to uromodulin/Tamm-Horsfall protein.
Timothy C. Hoops and Michael J. Rindler

Noncyclooxygenase metabolites of arachidonic acid amplify the vasopressin-induced Ca2+ signal in glomerular mesangial cells by releasing Ca2+ from intracellular stores.
Thomas Force, Gary Hyman, Roger Hajjar, Alois Seilmayer, and Joseph V. Bonventre

Uptake and concentration of bioactive macromolecules by K562 cells via the transferrin cycle utilizing an acid-labile transferrin conjugate.
Hans H. Weltlüber, David M. Neville, Jr., Kasturi Srinivasasachar, and Georg Erhardmann

 Trafficking of lipids from the endoplasmic reticulum to the Golgi apparatus in a cell-free system from rat liver.
Patrick Moreau, Maria Rodriguez, Claude Cassagne, Dorothy M. Morre, and D. James Marre

Cell-free transfer of membrane lipids. Evidence for lipid processing.
Patrick Moreau and D. James Marre

Binding of plasminogen activator inhibitor type-1 to extracellular matrix of Hep G2 cells. Evidence that the binding protein is vitronectin.
Dwaun A. Osenbry, Phillip A. Morton, Tsz-Chein Wun, and Alan L. Schwartz
Hydrolases in intracellular compartments of rat liver cells. Evidence for selective activation and/or delivery.
Lucia A. F. Casciola-Rosen and Ann L. Hubbard

Sequential processing of epidermal growth factor in early and late endosomes of rat liver.
Carol A. Renfrew and Ann L. Hubbard

Antisera specific for rap1 proteins distinguish between processed and nonprocessed rap1b.
Deborah A. Winegar, Carol-A. Ohmstede, Lily Chu, Bryan Reep, and Eduardo G. Lapetina

Isopenylation of rap2 proteins in platelets and human erythrocytes.
Deborah A. Winegar, Luis Molina y Vedia, and Eduardo G. Lapetina

Carboxyl methylation of platelet rap1 proteins is stimulated by guanosine 5'-[3-O-thio]triphosphate.
Huzoor-Akbar, Deborah A. Winegar, and Eduardo G. Lapetina

Jo-Ellen Murphy, Irene T. Pleasure, Saul Puszkln, Konnyr Prasad, and James H. Keen

Transcriptional regulation of ribosomal RNA synthesis during growth of cardiac myocytes in culture.
Paul J. McDermott, Lois L. Carl, Kimberly J. Conner, and Simon N. Alo

Genetic and biochemical characterization of Cu,Zn superoxide dismutase mutants in Saccharomyces cerevisiae.
Eric C. Chang, Brian F. Crawford, Zhi Hong, Tomasz Bilinski, and Daniel J. Kosman

Kenneth A. Beck and James H. Keen

Interaction of phosphoinositide cycle intermediates with the plasma membrane-associated clathrin assembly protein AP-2.
Kenneth A. Beck and James H. Keen

Bimodal effect of phorbol ester on B cell activation. Implication for the role of protein kinase C.
James C. Mond, Nili Feuerstein, Carl H. June, Anil K. Balapure, Robert I. Glazer, Kim Witherspoon, and Mark Brunswick

Calcium as a potential physiological regulator of integrin-mediated cell adhesion.
Daniel Kirchhofer, John Gresziah, and Michael D. Pierschbacher

Defective brush-border expression of intrinsic factor-cobalamin receptor in canine inherited intestinal cobalamin malabsorption.
John C. Fyfe, Kalathur S. Ramuujum, Krishnamurthy Ramaswamy, Donald F. Patterson, and Bellur Seetharam

Cellular differentiation regulates expression of C1-transport and cystic fibrosis transmembrane conductance regulator mRNA in human intestinal cells.
Chahrazd Montrose-Rafizadeh, William B. Guggino, and Marshall H. Montrose

Depletion of cellular calcium accelerates protein degradation in the endoplasmic reticulum.
Thomas Wileman, Lawrence F. Kane, Gerald R. Carson, and Cox Terhorst

Purification of a 92-kDa cytoplasmic protein tightly associated with the cell-adhesion molecule E-cadherin (uvomorulin). Characterization and extractability of the protein complex from the cell cytoskeleton.
Pierre D. McCrea and Barry M. Gumbiner

The Ca2+-dependent actin filament-severing activity of 74-kDa protein (adseverin) resides in its NH2-terminal half.
Takashi Sakurai, Hiroo Kuroka, and Yoshiaki Nomura

Identification of proteins involved in intracellular copper metabolism. Low levels of a ~48-kDa copper-binding protein in the brindled mouse model of Menkes disease.
Fakhruddin A. Païda and Murray J. Ettlinger

Glycosylation of the M, 46,000 mannose 6-phosphate receptor. Effect on ligand binding, stability, and conformation.
Martin Wendlan, Abdul Waheed, Bernhard Schmidt, Annette Hille, Gerhard Nagel, Kurt von Figura, and Regina Pohlmann

Hyoscyamine 65-hydroxylase, an enzyme involved in tropane alkaloid biosynthesis, is localized at the pericycle of the root.
Takashi Hashimoto, Asuka Hayashi, Yasuhiro Amano, Junko Kohnoh, Hiroko Iwamari, Sadakazu Usuda, and Yasuyuki Yamada

Lipid modifications of G protein subunits. Myristoylation of Gα increases its affinity for βγ.
Maurine E. Linder, Jok-Hou Pong, Robert J. Duronio, Jeffrey I. Gordon, Paul C. Sternweis, and Alfred G. Gilman

Michelle F. Browner, Franco Taroni, Elizabeth Sztl, and Leon E. Rosenberg

ENZYMOTOLOGY

On the reversible interaction of plasminogen activator inhibitor-1 with tissue-type plasminogen activator and with urokinase-type plasminogen activator.
H. Roger Ljune, Berthe Van Hoef, and Désiré Collen

Structural and functional role of the amino-terminal region of porcine cytosolic aspartate aminotransferase. Catalytic and structural properties of enzyme derivatives truncated on the amino-terminal side.
Yuhji Fukumoto, Sumio Tanase, Fujio Nagashima, Shoichi Ueda, Keichi Izegami, and Yoshimasa Morino

Multiple components in an epidermal growth factor-stimulated protein kinase cascade. In vitro activation of a myelin basic protein/microtubule-associated protein 2 kinase.
Natalie G. Ahn, Rony Seger, Rebecca L. Bratlien, Curtis D. Ditl, Nicholas K. Tonks, and Edwin G. Krebs

sn-1,2-Diacetylglycerol choline- and ethanolamine-phosphotransferases in Saccharomyces cerevisiae. Mixed micellar analysis of the CPT1 and EPT1 gene products.
Russell H. Hjelmsstad and Robert M. Bell

Paul J. Fritz, John M. Kauffman, Charles A. Robertson, and Melinda R. Wilson

MEmBRANES AND BIOENERGETICS

An analysis of lactose permease “sugar specificity” mutations which also affect the coupling between proton and lactose transport. I. Val177 and Val177
Asn116 permeases facilitate proton uniport and sugar uniport.
Robert J. Brocker
An analysis of lactose permease “sugar specificity” mutations which also affect the coupling between proton and lactose transport. II. Second site revertants of the thiodigalactoside-dependent proton leak by the Val177/Asn181 permease.
John A. Elhema, Melissa A. O’Donnell, and Robert J. Brooker

Effects of cholesterol on the function and thermotropic properties of pure UDP-glucuronosyltransferase.
Michal Rotenberg and David Zakim

The isoforms of yeast cytochrome c oxidase subunit V alter the in vivo kinetic properties of the holoenzyme.
Robert A. Waterland, Britton Chance, and Robert O. Poyton

Four tight nucleotide binding sites of chloroplast coupling factor 1.
Adam B. Shapiro, Andrew H. Huber, and Richard E. McCarty

A 57-kDa phosphatidylinositol-specific phospholipase C from bovine brain.
Thomas A. Tompkins and Mario A. Moscarello

Regulation of reverse uniport activity in mitochondria by extramitochondrial divalent cations. Dependence on a soluble intermembranace space component.
Urule Igbaaoba and Douglas R. Pfeifer

Akiko Yoshida, Tetsuo Nishikawa, Yasushi Tamura, and Sho Yoshida

ATP-dependent uptake of 5-hydroxytryptamine by secretory granules isolated from thyroid parafollicular cells.
Shulamit Cidon, Hadassah Tamir, Eladio A. Nunez, and Michael D. Gershon

Modification of low density lipoproteins by secretory granules of rat serosal mast cells.
Petri T. Kovanen and Jorma O. Kokkonen

Bioconversion of phosphatidylinositol glycan-anchored membrane proteins. Design of a simple protein substrate to characterize the enzyme that cleaves the COOH-terminal signal peptide.
Krishna Kodukula, Radmila Mecmanovic, Louise Gerber, Mauricio Tamburrini, Larry Bruns, and Sidney Udenski

GABA_A receptors display association of γ2-subunit with α1- and 2β3-subunits.
Dietmar Benke, Stephan Mertens, Arnold Trzeciak, Dieter Gillessen, and Hanns Mohler

Characterization of a limited trypsin digestion form of eukaryotic elongation factor 1α.
Terri Goss Kinzy and William C. Merrick

DNA sequence abnormalities of human glucose-6-phosphate dehydrogenase variants.
Ernest Beutler, Wanda Kuhl, Terri Gelbart, and Linda Forman

Post-transcriptional regulation of the human liver/bone/kidney alkaline phosphatase gene.
Megerditch Kiledjian and Tom Kadesch

The mechanism of nucleosome assembly onto oligonucleosomes of the sea urchin 5 S DNA positioning sequence.
Jeffrey C. Hansen, K. E. van Holde, and D. Lohr

Organization, structure, and expression of the gene encoding the rat substance P receptor.
Andrew D. Hershey, Philip E. Dykema, and James E. Krause

Herpes simplex virus-1 helicase-primase. Physical and catalytic properties.
James J. Crute and I. R. Lehman

The α1(VIII) collagen gene is homologous to the α1(X) collagen gene and contains a large exon encoding the entire triple helical and carboxy-terminal non-triple helical domains of the α1(VIII) polypeptide.
Noriro Yamanaguchi, Richard Mayne, and Yoshifumi Nomiyama

Expression of normal and novel glucokinase mRNAs in anterior pituitary and islet cells.
Steven D. Hughes, Christian Quaade, Joseph L. Milburn, Laura Cossidy, and Christopher B. Neugard

Full length and alternatively spliced pgp transcripts in multidrug-resistant Chinese hamster lung cells.
Scott E. Devine, Arif Hussain, Joseph P. Davide, and Peter W. Melen

Transcriptional regulation of the rat NAD(P)H: quinone reductase gene. Identification of regulatory elements controlling basal level expression and inducible expression by planar aromatic compounds and phenolic antioxidants.
Leonard V. Favreau and Cecil B. Pickett

Higher order structure of the ribosomal 5 S RNA.
Ross N. Nazar

Escherichia coli DNA polymerase II is stimulated by DNA polymerase III holoenzyme auxiliary subunits.
A. John Hughes, Jr., Sharon K. Bryan, Hong Chen, Robb E. Moses, and Charles S. McHenry

Modulation of antiviral activity of interferon and 2',5'-oligoadenylate synthetase gene expression by mild hyperthermia (39.5 °C) in cultured human cells.
Chih-Chao Chang and Joseph M. Wu

Mechanism of inhibition of sarcoplasmic reticulum Ca(2+)-ATPase by active site cross-linking. Impairment of nucleotide binding slows nucleotide-dependent phosphoryl transfer, and loss of active site flexibility stabilizes occluded forms and blocks E2-P formation.
David C. Ross, George A. Davidson, and David B. McIntosh

Mammalian adipose tissue and muscle are major sources of lipid transfer protein mRNA.

PROTEIN CHEMISTRY AND STRUCTURE

Thymosin α1 and Fx, an actin-sequestering peptide, are indistinguishable.
Daniel Safer, Marshall Elzinga, and Vivianne T. Nachmias

Site-specific mutagenesis of an essential histidine residue in pancreatic cholesterol esterase.
Linda P. DiPersio, Robert N. Fontaine, and David Y. Krause

The organic functional group in copper-containing Ca(2+)-ATPase by active site cross-linking. Impairment of nucleotide binding slows nucleotide-dependent phosphoryl transfer, and loss of active site flexibility stabilizes occluded forms and blocks E2-P formation.
David C. Ross, George A. Davidson, and David B. McIntosh

PROTEIN CHEMISTRY AND STRUCTURE

Thymosin α1 and Fx, an actin-sequestering peptide, are indistinguishable.
Daniel Safer, Marshall Elzinga, and Vivianne T. Nachmias

Site-specific mutagenesis of an essential histidine residue in pancreatic cholesterol esterase.
Linda P. DiPersio, Robert N. Fontaine, and David Y. Hui

The organic functional group in copper-containing amine oxidases. Resonance Raman spectra are consistent with the presence of azaquinone (6-hydroxydopa quinone) in the active site.
Doreen E. Brown, Michele A. McGuirt, David M. Dooley, Susan M. Janes, David Mu, and Judith P. Klinman

* Indicates a Communication
Substitution of the conserved tryptophan 31 in *Escherichia coli* thioredoxin by site-directed mutagenesis and structure-function analysis.

Gunter Krause and Arne Holmgren

Demonstration of apolipoprotein CII in guinea pigs. Functional characteristics, cDNA sequence, and tissue expression.

Yvonne Anderson, Lars Thelander, and Gunilla Bengts

Carbohydrate variant of the recombinant β-subunit of human choriogonadotropin expressed in baculovirus expression system.

Wenyong Chen, Qing-Xiang Shen, and Om P. Bahl

Purification and characterization of an oxygen-insensitive NAD(P)H nitroreductase from *Enterobacter cloacae*.

Christopher Bryant and Marlene DeLuca

Cloning, nucleotide sequence, and expression of the nitroreductase gene from *Enterobacter cloacae*.

Christopher Bryant, Lauren Hubbard, and William D. McElroy

Conversion of pig pancreas phospholipase A2 by protein engineering into enzyme active against *Escherichia coli* treated with the bactericidal/permeability-increasing protein.

Jerrold Weiss, Grace Wright, Augustus C. A. P. A. Bekkers, Carel J. van den Bergh, and Hubertus M. Verheij

Studies of ligand binding to arrestin.

Krzysztof Palczewski and Paul A. Hargrave

Biological recognition of phosphate and sulfate.

Zoltan F. Kanyo and David W. Christianson

Mapping of the amino acids in membrane-embedded helices that interact with the retinal chromophore in bovine rhodopsin.

Tomoko A. Nakayama and H. Gobind Khorana

The product of the rap2 gene, member of the ras superfamily. Biochemical characterization and site-directed mutagenesis.

Isabelle Lerosey, Pierre Chardin, Jean de Gunzburg, and Armand Tavitian

Isolation of BamHI variants with reduced cleavage activities.

Shuang-yong Xu and Ira Schildkraut

*In vitro* synthesis of G protein βγ dimers.

Carl J. Schmidt and Eva J. Neer

Analysis of protease-sensitive regions in the skeletal muscle sodium channel *in vitro* and implications for channel tertiary structure.

Susan J. Zwerling, Sidney A. Cohen, and Robert L. Barchi

Site-directed mutagenesis of rat cellular retinol-binding protein. Alteration in binding specificity resulting from mutation of glutamine 108 to arginine.

Donald G. Stump, R. Stephen Lloyd, and Frank Chytil

Altered hapten recognition by two anti-digoxin hybridoma variants due to variable region point mutations.
