CONTENTS

MINIREVIEW

12949 Lyso phosphatidic acid, a multifunctional phospholipid messenger. Wouter H. Moolenaar

COMMUNICATIONS

12953 An antidiabetic thiazolidinedione is a high affinity ligand for peroxisome proliferator-activated receptor y (PPARy). Jürgen M. Lehmann, Linda B. Moore, Tracey A. Smith-Olser, William O. Wilkson, Timothy M. Willson, and Steven A. Kleeuer

12957 Evidence for a (triose phosphate isomerase-like) "catalytic loop" near the active site of glycolase I. Yin Lan, Tianfeng Lu, Paul S. Loeb, and Donald J. Creggton

12965 Different signaling roles of SHPT1 in insulin-induced GLUT1 expression and GLUT4 translocation. Sharon F. Hausdorf, Anton M. Bennett, Benjamin G. Noel, and Morris J. Birnbaum

12973 Reconstitution of yeast nucleotide excision repair with purified N4 proteins, replication protein A, and transcription factor TFIIH. Suni N. Guider, Verone Babenko, Patrick Sung, Louise Prakash, and Satya Prakash

12977 The third extracellular loop of the \( \mu \) opioid receptor is important for agonist selectivity. Ji-Chun Xue, Chongxuan Chen, Jinmin Zhu, Satya P. Kanapali, J. Kim de Briel, Lei Yu, and Lee-Yuan Liu-Chen

ARTICLES

12980 Inorganic polyphosphates in the acquisition of competence in Escherichia coli. Celia E. Castuma, Ruiping Huang, Arthur Kornberg, and Rosetta N. Rauch

12984 Effect of cellular expression of pleckstrin homology domains on G-coupled receptor signaling. Louis M. Luttrell, Brian E. Hauhs, Kazuhige Touhara, Tom van Biesen, Walter J. Koch, and Robert J. Lefkowitz

12990 A novel activity of OmpT. Proteolysis under extreme denaturing conditions. Camille Dudley White, Qin Chen, George L. Kenyon, and Patricia Clement Babbitt

12995 Kinetic analysis of lactose and proton coupling in Glu797 mutants of the lactose transport protein of Streptococcus thermophilus. Bert Poolman, Jon Knol, and John S. Lahena

13004 Modulation of cholesterol efflux from FuSAH hepatoma cells by the apolipoprotein content of high density lipoprotein particles. Particles containing various proportions of apolipoproteins A-I and A-II. Laurent Lagrost, Catherine Dergenmant, Anne Ahsias, Catherine de Gairese, Jean-Charles Fruchart, Christian Lallemand, Philippe Gambert, and Graciela Castro

13100 Characterization of aspen isoprene synthase, an enzyme responsible for leaf isoprene emission to the atmosphere. Gary M. Silver and Ray Fall

13107 Interactions between the subunits of casein kinase II. R. Daniel Gott, Kevin C. Graham, and David W. Litchfield

13102 A novel ubiquitous form of Munc18 interacts with multiple syntaxins. Use of the yeast two-hybrid system to study interactions between proteins involved in membrane traffic. Yutaka Hata and Thomas C. Sudhof

13029 Temperature-sensitive yeast GPI anchoring mutants gp2 and gp10 are defective in the synthesis of N-acetylglucosaminyl phosphatidylinositol. Cloning of the GPI gene. Steven D. Ledich, Elzbieta Kostova, Robert R. Lathe, Lisa C. Costello, Darren A. Drapp, William Grey, Jan S. Fastler, and Peter Otey

13036 The PPZ protein phosphatases are important determinants of salt tolerance in yeast cells. Francesca Pons, Manel Camps, and Joaquín Aris

13057 The molecular chaperonin cpn60 displays local flexibility that is reduced after binding with an unfolded protein. Boris M. Gorovits and Paul M. Horwich

13063 Functional domain analysis of interferon consensus sequence binding protein (ICSBP) and its association with interferon regulatory factors. Rakefet Sharf, Aino Ariyal, Flavio Lefkowitz, Sigal S. Winograd, Rachel Ehrlich, and Ben-Zion Levi

13076 Identification of a 38-kDa heparin-binding glycoprotein (gpHBP) in differentiating vascular muscle cells as a member of a group of proteins associated with tissue remodeling. Lisa M. Shackleton, David M. Mann, and Albert J. T. Millis

13084 The polypeptide precursor to the Euglena light-harvesting chlorophyll a/b-hinding protein is transported to the Golgi apparatus prior to chloroplast import and polypeptide processing. Chudananda Sulli and Steven D. Schwarzbach

13091 Different carboxyl-terminal domain kinase activities are induced by heat-shock and arsenite. Characterization of their substrate specificity, separation by Mono Q chromatography, and comparison with the mitogen-activated protein kinase. Sylviane Tragon and Michel Morange

13099 Expression of calcium-permeable cation channel CD90 accelerates progression through the G1 phase in Balbo 974 cells. Makoto Kanzaki, Hiroshi Shibata, Hideo Megami, and Itaru Kojima

13105 Secretion and matrix assembly of recombinant type VI collagen. Alfonso Colombatti, Maria Teresa Mucignot, and Paolo Rondaldo

13118 Novel ligand binding properties of the myoglobin substituted with monoazahemin. Saburo Naya, Tomoko Kato, Noriaki Funasaki, Yoshitsugu Shiro, Tetsujiro Isaka, Ryoko Imai, and Hiroaki Hori

13124 Activation of NADPH-oxidase and its associated whole-cell H2* current in human neutrophils by recombinant human tumor necrosis factor α and formyl-methionyl-leucyl-phenylalanine. Muhammad A. Schuman, Chi Chia Leung, and Thomas A. Raffin

13133 Prolactin receptor antagonists that inhibit the growth of breast cancer cell lines. Germaine Fuh and James A. Wells

13138 Phosphatidylincholine turnover in activated human neutrophils. Agonist-induced cytidylyltransferase translocation is subsequent to phospholipase D activation. Helene Trouche, Valerie Planat, Michel Record, Francois Terent, Gerard Ribes, and Hughes Chap

*The CONTENTS arranged by Subject Categories will be found immediately following these CONTENTS. Full Instructions to Authors will be found in (1994) J. Biol. Chem. 269, 777-785, and reprints may be obtained from the editorial office.
13147 Quantification of compartmentalized metabolic fluxes in maize root tips using isotope distribution from 13C- or 14C-labeled glucose. Marta Zaninetti, Deudive Nsouhi, Paul Rafford, Paul Cantoni, Alain Pratlet, and Philippe Raymond

13160 Identification of arginine residues in the putative l-asparagine binding site of Escherichia coli adenylosuccinate synthetase. Wenyang Wang, Bradley W. Poland, Richard B. Hanzezko, and Herbert J. Fromm

13164 Purification and characterization of dog mast cell protease-3, an oligomeric relative of tryptases. Wilfred W. Raymond, Elizabeth K. Tam, John L. Blount, and George H. Couegh

13171 Regulation of lipid biosynthesis in Saccharomyces cerevisiae by fumaronitril B, Wen-Ju Wu, Virginia M. McDonagh, Joseph T. Nickels, Jr., Jesang Ro, Anthony S. Fishel, Teresa R. Vales, Alfred H. Merrill, Jr., and George M. Carman

13179 Evidence for a glycoprotein ID-IIIa- and aggregation-independent mechanism of phosphatidylinositol 3'-phosphate synthesis in human platelets. Mauro Torti, Giuseppe Ramacini, Nathalie Montserrat, Fabiola Sinigaglia, Cesare Baldini, Louis Pasteur, Monique Breton, Huges Chap, and Gerard Mauro

13186 The flavininylation reaction of trimethylamine dehydrogenase. Analysis by directed mutagenesis and electrospray mass spectrometry. Leonard C. Feckman, Martin Meurer, and Nigel S. Scrutton

13192 Novel, specific O-glycosylation of secreted Flavobacterium meningosepticum proteins. Asp-Ser* and Asn-Thr* aThr consensus sequences. Thomas H. Plummer, Jr., Anthony L. Tarentino, and Charles R. Rauer

13204 Influence of low molecular mass heparin on the kinetics of neutrophil elastase inhibition by mucus proteinase inhibitor. Martine Cadene, Christian Boudier, Guy Daney de Marcellus, and Joseph G. Biech

13210 The carboxyl terminus of the 36-subunit of rod cGMP phodophoresterase contains distinct sites of interaction with the enzyme catalytic subunits and the O-subunit of transducin. Nikolai P. Skibis, Nikolai O. Artemyev, and Hedi E. Hamm

13216 Kinetics and thermodynamics of virus binding to receptor. Studies with rhinovirus, intercellular adhesion molecule-1 (ICAM-1), and surface plasmon resonance. Jose M. Camaeas and Timothy A. Springer

13225 Phosphatidylinositol 3-kinase activity is required at a post-endocytic step in platelet-derived growth factor receptor trafficking. Marguerite Joly, Andrius Radlauskas, and Silvia Cernea

13231 How does the retinal rod Na+-Ca2+-K+ exchanger regulate cytosolic free Ca2+? Paul M. M. Schnetkamp

13240 Cell-specific activation of the glial-specific JC virus early promoter by large T antigen. John W. Henson, Bernd L. Schniier, Tien Shan Lee, and Jon McLellister

13245 Vav is necessary for prolactin-stimulated proliferation and is translocated into the nuclear nucleolus. Christine V. Clooswnger, Winnie Nyo, Deborah L. Sokol, Selina M. Lugor, and Alan M. Gewirtz

13254 Phosphorylation of the Gooodpasture antigen by type A protein kinase. Fernando Bevier, Joel R. Penades, Maria Plaza, Dolores Bernal, Charlait Johansson, Emilio Itarte, Javier Cervera, Jorgen Wesslinger, Susan Quinones, and Juan Saeu

13277 Molecular modeling of the substrate specificity of phospho-convertase SPC and SPC A. Gregory Lipkind, Quiming Gou, and Donald E. Stierer

13291 Ceramide as a modulator of endocytosis. Chi-Shiung Chen, Anne G. Rosenwald, and Richard E. Pogano

13298 Tissue-specific transcriptional regulation of human leukostatin (CD43) gene is achieved by DNA methylation. Shinichi Kudo and Minoru Fukuda

13318 Inhibition of secretion of truncated apolipoproteins B by monomethylolamine is independent of the length of the apolipoprotein. Antonio E. Ruotolo and Jean E. Vance

13326 Regulation of alternative splicing of protein kinase Cβ by insulin. Charles E. Chalot, Harolh Maestach, James E. Watson, Bruce C. Winkler, Jeanne Goodnight, Robert E. Parese, and Denise R. Cooper

13333 Transcriptional regulation of the rat vascular endothelial growth factor gene by hypoxia. Andrew P. Leys, Nina S. Levy, Scott Wegner, and Mark A. Goldberg

13348 Assembly of a chromosomal replication machine: two DNA polymerases, a clamp loader, and sliding clamps in one holoenzyme particle. I. Organization of the clamp loader. Rene Onrust, Jeff Finkenstein, Vytasuts Naktinis, Jennifer Turner, Linhua Fang, and Mike O'Donnell

13358 Assembly of a chromosomal replication machine: two DNA polymerases, a clamp loader, and sliding clamps in one holoenzyme particle. II. Intermediate complex between the clamp loader and its clamp. Vytasuts Naktinis, Rene Onrust, Linhua Fang, and Mike O’Donnell

13366 Assembly of a chromosomal replication machine: two DNA polymerases, a clamp loader, and sliding clamps in one holoenzyme particle. III. Interface between two polymerases and the clamp loader. Rene Onrust, Jeff Finkenstein, Jennifer Turner, Vytasuts Naktinis, and Mike O’Donnell

13378 Assembly of a chromosomal replication machine: two DNA polymerases, a clamp loader, and sliding clamps in one holoenzyme particle. IV. ATP-binding site mutants identify the clamp loader. Hsi Xiao, Vytasuts Naktinis, and Mike O’Donnell

13384 Assembly of a chromosomal replication machine: two DNA polymerases, a clamp loader, and sliding clamps in one holoenzyme particle. V. Four different polymerase-clamp complexes on DNA. P. Todd Stakeenberg and Mike O’Donnell

13392 The transcription factor, Nm23H2, binds to and activates the translocated c-mye allele in Burkitt’s lymphoma. Lin Ji, Magdalena Arinina, and Linda M. Buier

13415 A mammalian activity required for the second step of pre-messenger RNA splicing. Laura A. Lindsey, Allen J. Crow, and Mariana A. Garcia-Blanco

Membrane association of the myristoylated alanine-rich C kinase substrate (MARCKS) protein. Mutational analysis provides evidence for complex interactions. Sharon L. Sussczynski and Perry J. Blackshear

A sequence located 4.5 to 5 kilobases from the 5' end of the barley yellow dwarf virus (BVM) genome strongly stimulates translation of uncapped mRNA. Shaping Wang and W. Allen Miller

Tissue inhibitor of metalloproteinase-2 stimulates fibroblast proliferation via a CAMP-dependent mechanism. M otros L. Corcoran and William G. Stetler-Stevenson

Mode of action of peroxisome proliferators as hypolipidemic drugs. Suppression of apolipoprotein C-III. Rachel Herle, Jannette Bishop-Stuben, and Jacob Bar-Tana

Selective inactivation of two components of the multiprotein transcription factor TFIIIB in cycloheximide growth-arrested yeast cells. Giorgio Dece, Laura Duntu, Giovanna Peracchia, and Simona Ottolenghi

Molecular cloning, tissue-specific expression, and cellular localization of human prostate mRNA. Jack X. Yu, Lee Chao, and Julie Chao

Carbocub, substance P, and phorbol ester promote the tyrosine phosphorylation of protein kinase C in salivary gland epithelial cells. Stephen D. Seifert and Alex Toker

α2-Macroglobulin-mediated clearance of proteases from the plasma of the American horseshoe crab, Limulus polyphemus. Ralph Melchior, James F. Quigley, and Peter B. Armstrong

EEA1, an early endosome-associated protein. EEA1 is a conserved o-helical peripheral membrane protein flanked by cysteine "fingers" and contains a calmodulin-binding IQ motif. Fi-Tjen Mu, Judy M. Callaghan, Olivia Steele-Mortimer, Harald Stenström, Robert G. Parton, Paul L. Campbell, James McCluskey, Jing-Ping Yeo, Edward F. C. Toch, and Ben-Rock Tsoh

Interferon-induced MxA protein. GTP binding and GTP hydrolysis properties. Marc F. Richter, Martin Schuennlein, Christian Herrmann, Alfred Wittgenhafer, and Peter Stuheli

Unchanged structural requirements for GTPase activity of the interferon-induced MxA protein. Martin Schuennlein, Marc F. Richter, Christian Herrmann, Nicolas Nassar, and Peter Stuheli

Chaperone function of a Gsp-94-related protein for folding and transport of the pancreatic bile-salt-dependent lipase. Nadine Bruneau and Dominique Lombardo

The association of three subunits with yeast RNA polymerase I is stabilized by A14, Anke Smid, Michel Riva, Françoise Bouet, André Sautès, and Christophe Carles

Ceramide triggers meiotic cell cycle progression in Xenopus oocytes. A potential mediator of progesterone-induced maturation. Jay C. Strum, Katherine I. Swanson, J. Eric Turner, and Robert M. Bell

Integrin α2β1 is a positive regulator of collagenase (MMP-1) and collagen α1(II) gene expression. Terhi Räikkönen, Jukka Westermarch, Leeni Koivisto, Arsi Broberg, Veeti Matti Kähäri, and Jyrki Heino

Distinct tyrosine kinase activation and triton X-100 insolubility upon FcεRI or FcγRIIB ligation in human polymorphonuclear leukocytes. Implications for immune complex activation of the respiratory burst. Jigene Zhou, Douglas M. Lublin, Daniel C. Link, and Eric J. Brown

AdHPRSF-1 regulates cyclic AMP-induced transcription from the proximal promoter (P1) of the human aristatase P450 (CYP19) gene in the ovary. M. Dodson Michael, Michael W. Rigler, Ken ichiro Morohashi, and Brian C. Simpson

Expression of transforming growth factor β receptor III in vascular endothelial cells increases their responsiveness to transforming growth factor β2. Sabitha Sankar, Nagar Mahooti Brooks, Michael Centrella, Thomas L. McCarthy, and Joseph A. Madri

The differential processing of homodimers of reverse transcriptions from human immunodeficiency viruses type 1 and 2 is a consequence of the distinct specificities of the viral proteases. Naoshige Fuy, Kenneth B. Roeth, Joseph W. Levine, Robert L. Hehnle, Carol A. Barnow, Clark W. Smith, David B. Evans, Susan M. Poppe, W. Gary Torpsey, Donan J. Rothrock, Alfredo G. Tomasselli, and Satish K. Sharma

This publication is available on CD-ROM. Inquire about availability through your subscription agent or contact: The JOURNAL OF BIological CHEMISTRY, P.O. Box 3000, Reno, NV 89504, U.S.A. Minireviews are reprinted in January of the preceding year in a Minireview Compendium. Compendia for 1998 through 1999 are available through the ASBMB office: ASBMB Office, 9650 Rockville Pike, Bethesda, MD 20814, U.S.A.

Submit all manuscripts in triplicate to Editor, The JOURNAL OF Biological CHEMISTRY 9650 Rockville Pike Bethesda, MD 20814, U.S.A.

Accepted manuscripts will be published with the implicit understanding that the authors will pay a charge per page. Current page charges may be obtained by contacting the JBC office. Under exceptional circumstances, when no source of grant or other support exists, the authors may apply, at the time of submission, for a grant-in-aid to Chairman, Publication’s Committee, American Society for Biochemistry and Molecular Biology, Inc., 9650 Rockville Pike, Bethesda, MD 20814. All such manuscripts must be counter signed by an appropriate institutional official stating that no funds are available for page charges.

Queries on matters of general editorial policy, requests for reprints of the “Instructions to Authors,” or of the “Editorial Policy and Practices,” or for permission to reproduce any part of a previously published article should be directed to the Journal Editorial Office in Bethesda, telephone 301-530-7150; fax 301-571-1824.

The JOURNAL OF Biological CHEMISTRY publishes papers on a broad range of topics of interest to biochemists. The views expressed are those of the authors and not of The Journal of Biological Chemistry or the American Society for Biochemistry and Molecular Biology.

The Journal of Biological Chemistry is copyrighted by the American Society for Biochemistry and Molecular Biology, Inc. Photographic copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law is allowed, provided that the $2.50 per-copy fee is paid through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. For those organizations that have granted photocopy license by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is 0021-9258/85/$2.50. © Printed on acid-free paper effective with Volume 254, Issue No. 1 (1979). Reproduction of any portion of an article for subsequent republication requires permission of the copyright owner. Requests should be made in writing to the American Society for Biochemistry and Molecular Biology, Inc., Attn.: Editorial Office, 9650 Rockville Pike, Bethesda, MD 20814, and should include a statement of intended use as well as explicit specifications of the material to be reproduced.

Address all correspondence and orders relative to subscriptions and back copies to: The JOURNAL OF Biological CHEMISTRY, P.O. Box 3000, Denver, NV 80201, U.S.A., telephone 800-875-2997 or 303-228-5997. Subscriptions are entered on a calendar year basis. The price for an institutional subscription will be honored with proportional refunds less a $10 cancellation charge. Allow at least six weeks for address changes. Claims for replacement copies must be received within four months of the issue date.

GENERAL INFORMATION
CONTENTS Arranged by Subject Categories

MINIREVIEW

12949  Lyosphosphatidic acid, a multifunctional phospholipid messenger. Wouter H. Moolenaar

CARBOHYDRATES, LIPIDS, AND OTHER NATURAL PRODUCTS

13004  Modulation of cholesterol efflux from FuAh hepatoma cells by the apolipoprotein content of high density lipoprotein particles. Particles containing various proportions of apolipoproteins A-I and A-II. Laurent Lagrost, Catherine Dengremont, Anne Athias, Catherine de Geiter, Jean-Charles Frucht, Christian Lallemant, Philippe Gambert, and Graceela Castro

13010  Characterization of aspen isoprene synthase, an enzyme responsible for leaf isoprene emission to the atmosphere. Gary M. Silver and Ray Fall

13029  Temperature-sensitive yeast GPI anchoring mutants gpl2 and gpl3 are defective in the synthesis of N-acetylglucosamini- nel phosphatidylinositol. Cloning of the GPl gene. Steven D. Leidich, Zlatko Kostova, Robert R. Leth, Lisa C. Costello, Darren A. Drap, William Gray, Jin S. Fassler, and Peter Orlean

13192  Novel, specific O-glycosylation of secreted Flavobacterium meningosepticum proteins. Ass-See®-Ex As-Tyr®-Thr consensus sites. Thomas H. Plummer, Jr., Anthony L. Tarentino, and Charles R. Hauser

13197  Detailed structural analysis of a novel, specific O-linked glycan from the prokaryote Flavobacterium meningosepticum. Bruce B. Reinholdt, Charles R. Hauser, Thomas H. Plummer, and Vernon N. Reinhold

CELL BIOLOGY AND METABOLISM

12965  Different signaling roles of SHPTP2 in insulin-induced GLUT1 expression and GLUT4 translocation. Sharon F. Hauser, Anton M. Bennett, Benjamin G. Neel, and Morris J. Borsimbaum

12984  Effect of cellular expression of pleckstrin homology domains on G-coupled receptor signaling. Louis M. Luttrell, Brian E. Hauen, Kazuhige Tsuohara, Tim van Biesen, Walter J. Koch, and Robert J. Leftowtis

13022  A novel ubiquitous form of Munc18 interacts with multiple syntaxins. Use of the yeast two-hybrid system to study interactions between proteins involved in membrane traffic. Yutaka Hata and Thomas C. Saitoh

13036  The PP2Z protein phosphatases are important determinants of salt tolerance in yeast cells. Francisco Ponas, Manel Camps, and Josep Adro

13076  Identification of a 28-kDa hepatic-binding glycoprotein (gp38a) in differentiating vascular smooth muscle cells as a member of a group of proteins associated with tissue remodeling. Lisa M. Shacklelow, David M. Mann, and Albert J. T. Mills

13084  The polyprotein precursor to the Euglena light-harvesting chlorophyll a/b-binding protein is transported to the Golgi apparatus prior to chloroplast import and polyprotein processing. Chidananda Sulli and Steven D. Schwartzbach

13091  Different carboxyl-terminal domain kinase activities are induced by heat-shock and arsenite. Characterization of their substrate specificity, separation by Mono Q chromatography, and comparison with the mitogen-activated protein kinases. Sylviane Tregoue and Michel Morange

13099  Expression of calcium-permeable cation channel CD20 accelerates progression through the G1 phase in Balb/c 3T3 cells. Makoto Kanzaki, Hiroshi Shibata, Hideo Mogami, and Itaru Kojima

13124  Activation of NADPH-oxidase and its associated whole-cell H+ current in human neutrophils by recombinant human tumor necrosis factor α and formyl-methionyl-leucyl-phenylalanine. Muhammad A. Schummann, Chi Chiu Leung, and Thomas A. Ruffin

Indicates a Communication

13133  Prolactin receptor antagonists that inhibit the growth of breast cancer cell lines. Germaine Fuh and James A. Wells

13138  Phosphatidylcholine turnover in activated human neutrophils. Agonist-induced cytidylyltransferase translocation is subsequent to phospholipase D activation. Hélène Tranchère, Valérie Planut, Michel Record, François Terre, Gérard Ribbes, and Hugues Chap

13147  Quantification of compartmented metabolic fluxes in maize root tips using isotope distribution from 13C- or 14C-labeled glucose. Martiine Decaudie-Noubhani, Gerard Raffol, Paul Canioni, Alain Pradel, and Philippe Raymond

13171  Regulation of lipid biosynthesis in Saccharomyces cerevisiae by fumonisin B1. W.-J. Wu, Virginia M. McDonough, Joseph T. Nickels, Jr., Dasing Ko, Anthony S. Fincher, Teresa R. Valles, Alfred H. Merrill, Jr., and George M. Carman

13179  Evidence for a glycoprotein IIIb-IIIa- and aggregation-independent mechanism of phosphatidylinositol 3,4,5-trisphosphate synthesis in human platelets. Mauro Torri, Giuseppe Ramazzotti, Nathalie Montsarrat, Pobiola Sininga, Cesare Baldani, Monique Plantard, Monique Breton, Hugues Chap, and Gerard Mauno

13225  Phosphatidylinositol 3-kinase activity is required at a post-endocytic step in platelet-derived growth factor receptor trafficking. Marguerite Joly, Andris Kazlauskas, and Silvia Covara

13246  Vav is necessary for prolactin-stimulated proliferation and is translocated into the nucleus of a T-cell line. Charles V. Cleovenger, Winnie Ngo, Deborah L. Sokol, Selina M. Lu, and Alan G. Gewirtz

13291  Ceramide as a modulator of endocytosis. Chi-Shiurang Chen, Anne G. Rosenbaum, and Richard F. Fugns

13318  Inhibition of secretion of truncated apolipoproteins B by monensin/thalidomide is independent of the length of the apolipoprotein. Antonio E. Rusolito and Jean E. Vance

13325  Regulation of alternative splicing of protein kinase Cβ by insulin. Charles E. Chaffart, Harald Mischak, James E. Watson, Bruce C. Winkler, Joanne Goodnight, Robert V. Farese, and Denise R. Cooper

13436  Membrane association of the tryptophan hydroxylase-like protein YSRAP. Protein. Mutational analysis provides evidence for complex interactions. Sharon L. Staer-

13453  Tissue inhibitor of metalloproteinase-2 stimulates fibroblast proliferation via a CAMP-dependent mechanism. Maria L. Corcoran and William G. Stetler-Stevenson

13490  Carbocchio, substance P, and phorbol ester promote the tyrosine phosphorylation of protein kinase Cβ in salivary gland epithelial cells. Stephen F. Sollott and Alex Tober
α-Macroglobulin-mediated clearance of proteases from the plasma of the American horseshoe crab, Limulus polyphemus. Ralph Melcher, James P. Quigley, and Peter B. Armstrong

EEA1, an early endosome-associated protein. EEA1 is a conserved α-helical peripheral membrane protein flanked by cysteine "fingers" and contains a calmodulin-binding IQ motif. Yi-Tien Wu, Medalia M. Callaghan, Olivia Stoica-Mortimer, Harold Stenmark, Robert G. Parton, Paul L. Campbell, James McCluskey, Jing-Feng Yeo, Edward P. C. Teck, and Ban-Hock Toh

Chaperone function of a Gsp B-related protein for folding and transport of the pancreatic bile salt-dependent lipase. Nadine Brauneau and Dominique Lombardo

Integrin α2β1 is a positive regulator of collagenase (MMP-1) and collagen α1(I) gene expression. Terhi Räikkönen, Jukko Westermarck, Leena Kivistö, Arto Broberg, Veli-Matti Kahari, and Jyrki Heino

Distinct tyrosine kinase activation and triton X-100 insolubility upon FcγRII or FcγRIII ligation in human polymorphonuclear leukocytes. Implications for immune complex activation of the respiratory burst. Ming-jie Duan, Douglas M. Lublin, Daniel C. Link, and Eric J. Brown

Expression of transforming growth factor β receptor type III receptor in vascular endothelial cells increases their responsiveness to transforming growth factor β2. Sahiti Sankar, Negan Mehoob Brooks, Michael Contrerra, Thomas L. McCarthy, and Joseph A. Madri

ENZYMEOLOGY

Evidence for a (triosephosphate isomerase-like) "catalytic loop" near the active site of glyceraldehyde 3-phosphate dehydrogenase. Jay L. Saint, Donald J. Creighton

A novel activity of OmpF. Proteolysis under extreme denaturing conditions. Camille Bedley White, Qin Chen, George L. Kenyon, and Patricia Clement Babbitt

Identification of arginine residues in the putative α-spectrin binding site of Escherichia coli adenylsuccinate synthetase. Wenyang Yang, Bradley W. Poland, Richard B. Honzato, and Herbert J. Fromm

Purification and characterization of dog mast cell protease-3, an oligomeric relative of cryptases. Wilfred W. Raymond, Elizabeth K. Tam, John L. Blount, and George H. Caughey

Influence of low molecular mass heparin on the kinetics of neutrophil elastase inhibition by mucus protein inhibitors. Martina Cudone, Christian Baudrier, Guy Daney de Mavrille, and Joseph G. Bueh

MEMBRANES AND BIOENERGETICS

Inorganic polyphosphates in the acquisition of competence in Escherichia coli. Celina E. Costuma, Ruiping Huang, Arthur Kornberg, and Rosaria N. Brousseau

Kinetic analysis of lactone and proton coupling in Glu279 mutants of the lactate transport protein of Streptococcus thermophilus. Bert Poolman, Jan Kool, and Juhe S. Lokkema

How does the retinal rod Na-Ca-K exchanger regulate cytosolic free Ca2+? Paul P. M. Schneekamp

Interferon-induced MXα protein. GTP binding and GTP hydrolysis properties. Marc F. Richter, Martin Schaeumann, Christian Herrmann, Alfred Wittinghofer, and Peter Stahelin

NUCLEAR ACIDS, PROTEIN SYNTHESIS, AND MOLECULAR GENETICS

An antidiabetic thiazolidinedione is a high affinity ligand for peroxisome proliferator-activated receptor γ (PPARγ). Jürgen M. Lehmann, Linda R. Moore, Tracey A. Smith-Oliver, William O. Wilkison, Timothy M. Wilson, and Steven A. Klauser

Reconstitution of yeast nucleotide excision repair with purified Rad proteins, replication protein A, and transcription factor TFIIH. Samir N. Gosal, Yvette Hrabanek, Patrick Seng, Louis Prakash, and Satya Prakash

Functional domain analysis of interferon consensus sequence binding protein (ICSBP) and its association with interferon regulatory factors. Rakesh Sagar, Aviva Azriel, Flavio Leipnitzou, Sigal S. Wengruch, Rachel Ehrlich, and Ben Zion Levi

Secretion and matrix assembly of recombinant type VI collagens. Alfonso Colombatti, Maria Teresa Macagno, and Paolo Bonaldo

Cell-specific activation of the glial-specific JC virus early promoter by large T antigen. John W. Henao, Bernd L. Schütter, Tien-Shan Lee, and Jon McAllister

Tissue-specific transcriptional regulation of human leukosialin (CD43) gene is achieved by DNA methylation. Shinichi Kudo and Minoru Fukuda

Transcriptional regulation of the rat vascular endothelial growth factor gene by hypoxia. Andrew P. Levy, Nina S. Levy, Scott Weigner, and Mark A. Godbold

Assembly of a chromosome replication machine: two DNA polymerases, a clamp loader, and sliding clamps in one holoenzyme particle. I. Organization of the clamp loader. Rene Orrust, Jeff Finkelstein, Vyvius Naktinis, Jennifer Turner, Linhua Fang, and Mike O'Donnell

Assembly of a chromosome replication machine: two DNA polymerases, a clamp loader, and sliding clamps in one holoenzyme particle. II. Intermediate complex between the clamp loader and its clamp. Vyvius Naktinis, Rene Orrust, Linhua Fang, and Mike O'Donnell

Assembly of a chromosome replication machine: two DNA polymerases, a clamp loader, and sliding clamps in one holoenzyme particle. III. Interface between two polymerases and the clamp loader. Rene Orrust, Jeff Finkelstein, Jennifer Turner, Vyvius Naktinis, and Mike O'Donnell

Assembly of a chromosome replication machine: two DNA polymerases, a clamp loader, and sliding clamps in one holoenzyme particle. IV. ATP-binding site mutants identify the clamp loader. Hai Xia, Vyvius Naktinis, and Mike O'Donnell

Assembly of a chromosome replication machine: two DNA polymerases, a clamp loader, and sliding clamps in one holoenzyme particle. V. Four different polymerase-clamp complexes on DNA. P. Todd Staubenberg and Mike O'Donnell

The transcription factor, Nmr23H2, binds to and activates the translocated c-myc allele in Burkitt's lymphoma. Jin Ji, Megalomena Arcinarc, and Linda M. Roer

A mammalian maternal requirement for the second step of pre-messenger RNA splicing. Laura A. Lindsey, Allen J. Crow, and Mariano A. Garcia-Blanco

A sequence located 4.5 to 5 kilobases from the 5′ end of the barley yellow dwarf virus (BdV) genome strongly stimulates translation of uncapped mRNA. Shangping Wang and W. Allen Miller

Mode of action of peroxisome proliferators as hypolipidemic drugs. Suppression of apolipoprotein C-III. Rachel Hertz, Janette Bishara-Shaviv, and Jacob Bar-Tana

Selective inactivation of two components of the multiprotein transcription factor TFIIIB in cycloheximide growth-arrested yeast cells. Giorgio Dierio, Laura Duijnio, Giovanna Peroschi, and Simone Ottolino

Molecular cloning, tissue-specific expression, and cellular localization of human prasin mRNA. Jack X. Yu, Lee Chao, and Julie Chao

Unexpected structural requirements for GTPase activity of the interferon-induced MXα protein. Martin Schaeumann, Marc F. Richter, Christian Herrmann, Nicolas Nassar, and Peter Stahelin

The association of three subunits with yeast RNA polymerase I is stabilized by A14, Amke Smid, Michel Riva, Françoise Boutet, Andre Sentenac, and Christophe Carles
PROTEIN CHEMISTRY AND STRUCTURE

12961 The Escherichia coli malonyl-CoA acetyl carrier protein transacylase at 1.5 Å resolution. Crystal structure of a fatty acid synthase component. Laurence Serre, Elizabeth C. Verbee, Zhiguo Dauger, Antoine R. Streut, and Zygmunt M. Derewenda

12977 The third extracellular loop of the μ-opioid receptor is important for agonist selectivity. Ji-Chun Xue, Changgang Chen, Jianmin Zhu, Satro P. Kunapuli, Jin K. de Riel, Lei Yu, and Lee-Yuan Liu-Chen

13017 Interactions between the subunits of casin kinase II. R. Daniel Gietz, Kevin C. Graham, and David W. Litchfield

13057 The molecular chaperon cvp60 displays local flexibility that is reduced after binding with an unfolded protein. Boris M. Gorovitz and Paul M. Horowitz

13118 Novel ligand binding properties of the myoglobin substituted with monoazahein. Saburo Neya, Tomoko Kako, Noriaki Funasaka, Yoichi Shira, Tetsujiro Iizuka, Kiyohiro Imas, and Hiroshi Hori

13186 The flavinylation reaction of trimethylhydantoin dehydrogenase. Analysis by directed mutagenesis and electrospray mass spectrometry. Leonard C. Fuchskin, Martin Meswes, and Nigel S. Scrutton

13210 The carboxyl terminus of the γ-subunit of rod CGBP-phosphodiesterase contains distinct sites of interaction with the enzyme catalytic subunit and the α-subunit of transducin. Nikolai F. Stolbo, Nikolai O. Arjemydii, and Heidi E. Hamilton

Indicates a Communication
