Involvement of the activation loop of ERK in the detachment from cytosolic anchoring.

Ido Wolf, Hadara Rubinfeld, Seunghee Yoon, Goldie Marmor, Tamar Hanoch, and Rony Seger

This article has been withdrawn by the authors. One cell from the 12-h, -TPA panel was duplicated in the 6-h, +TPA panel in Fig. 1A. The 12-h, -TPA panel from Fig. 1A was duplicated in the ERK2, +TPA panel from Fig. 5. Also in Fig. 5, the cells shown in the ALC, -TPA panel were duplicated. The phosphorylated MBP panel from Fig. 4 was inappropriately manipulated. In Fig. 9, the ALC, -TPA and the 183A, +TPA panels were inappropriately manipulated. Because the original data are no longer available, in the interest of maintaining accuracy in the published scientific literature, the authors wish to withdraw this article. However, the authors have full confidence in the findings and conclusions of this paper.
Involvement of the activation loop of ERK in the detachment from cytosolic anchoring.
