ATP/ADP turnover and import of glycolytic ATP into mitochondria in cancer cells is independent of the adenine nucleotide translocator.

Eduardo N. Maldonado, David N. DeHart, Jyoti Patnaik, Sandra C. Klatt, Monika Beck Gooz, and John J. Lemasters

During the copyediting of this article, an error was introduced in the abstract. "These findings indicated that ANT did mediate mitochondrial ATP/ADP exchange in cancer cells" should read as follows: "These findings indicated that ANT was not mediating mitochondrial ATP/ADP exchange in cancer cells."
