Supporting Information  Protein expression of K95-mutant CFTR expressed in BHK cells. (A) Representative Western blot for CFTR using protein from BHK cells transfected with the named CFTR variants. (B) Abundance of Band C protein (as a percentage of total) as determined by densitometric analysis. Tests of significance were carried out using one-way ANOVA with Bonferroni correction. Asterisk indicates a significant difference from wild-type ($p < 0.001$). Each point represents data from an independent transfection. Bars represent mean ± SD from $n = 8$ (wild-type), 3 (K95E) and 3 (K95Q) independent transfections.
